Learning Numbers with Jax Veronica Cameron,2020-05-25 Number recognition and counting skills are the cornerstones of numeracy, problemsolving, and critical thinking.Learning Numbers with Jax is the foundation all children need to begin their journey to becoming Number Masters.

Teaching Number in the Classroom with 4-8 year olds Robert J Wright, Garry Stanger, Ann K Stafford, James Martland, 2006-01-05 `At last a book is written by teachers for teachers based on sound research that will generate enquiry based learning. It is essential for every classroom with lots of mathematical activities. These will purposefully engage children and allow for differentiation for those who require additional support to understand the number system and the more able children who require to be challenged. Mathematical standards in our schools will improve tremendously following these instructional activities' - Carole Cannon, Development Officer for Mathematics Recovery 'This book 'Teaching Number in the Classroom with 4-8 year olds' is an absolute must have for all educators involved in early number. Based on sound theoretical foundations, it offers a wealth of down-to-earth, tried and tested, effective approaches to teaching early number concepts and skills. It is a clearly a book written by teachers for teachers. Every single activity in the book is a nugget. Engaging with these activities will change your whole approach to teaching early number' -Noreen O'Loughlin, Associate Vice-President/Lecturer in Maths Education, Mary Immaculate College, University of Limerick, Ireland. 'The authors prove it is possible to write a teacher friendly/teacher useful mathematics book that connects theory and practice. This book may become the primary teacher's Math Bible' - Angela Giglio Andrews, Primary Intervention Specialist and Coordinator, and Assistant Professor of Mathematics Education, National Louis University 'Teaching Number in the Classroom translates years of research into a very understandable and comprehensive approach for teaching children how the number system is structured and how to think like a mathematician. For too many years there has been the perception that children who are struggling with mathematics don't know the basic facts. The reality is that these children lack number knowledge and skills. Teaching Number in the Classroom will guide the educational professional through the steps of understanding the development of number sense, identifying the current levels of knowledge and providing instruction that helps children use the framework of mathematics to solve number problems. Teaching Number in the Classroom is a thinking skills approach to mathematics. Children are taught a variety of strategies for solving mathematical problems. The teacher using this book will be able to help all children develop a strong foundation of mathematical understanding' - Carol Meland, K-3rd Grade Principal for the School District of Milton Wisconsin, USA Teaching Number in the Classroom with 4-8 year olds is an absolute must-have for all

educators involved in early number. Based on sound theoretical foundations, it offers a wealth of down-to-earth, tried and tested, effective approaches to teaching early number concepts and skills. It is a clearly a book written by teachers for teachers. Every single activity in the book is a nugget. Engaging with these activities will change your whole approach to teaching early number' - Noreen O'Loughlin, Associate Vice-President/Lecturer in Maths Education, Mary Immaculate College, University of Limerick Following the success of their previous bestselling titles, Early Numeracy and Teaching Number, the authors of this brand-new text now bring the principles and practice of their acclaimed Mathematics Recovery Programme to whole-class teaching. Central to the book is the concept of an inquiry-based approach to classroom instruction, and topics covered range from beginning number and early counting strategies to multi-digit addition and subtraction right through to multiplication and division. As world leaders in the field of Mathematics Recovery, this book's authors have drawn on their vast experience to create a user-friendly, practical guide focusing on classroom teaching. With its step-by-step approach, the text can be used as a training manual and course reference by teachers everywhere. Key features which make the book such a valuable tool include: - Real-life examples from classroom work - Teaching activities - Assessment tasks - Guidance on classroom organization and teaching specific topics - Activities for parents to do with children An invaluable resource for experienced mathematics recovery teachers, as well as all primary classroom teachers, from kindergarten level to Year three, this text will also be of use to classroom assistants and learning support personnel. Primary mathematics advisors, numeracy consultants and educational psychologists will also find it helpful.

Our workbooks and learning kits feature activities, stories, and games to reinforce the skills children need to develop and achieve their academic potential. Students will re

Learning Numbers Oksana Siniukov, Maryna Kuznetsova, Math Country, 2020-02-18 Dear Parents! The Math Country team is made up of practicing mathematics teachers with a combined teaching experience of more than 35 years, who are also authors of unique methods of intensive children's education. With our notebooks LEARNING NUMBERS you can effectively and efficiently teach your 4-5 year old children. Children will learn numbers from 0 to 9 and will accurately correlate the amount of objects with the number. Specially developed images help to easily memorize numbers, and create a solid foundation for the introduction of mnemonic techniques which greatly facilitate the memory. A feature of our notebooks is the symbiosis of mental arithmetic and classical mathematics. Mental arithmetic is a UNIQUE method of teaching children that trains the speed of perception and

processing of information, allows you to harmoniously develop both hemispheres of the brain at the same time by mentally visualizing the calculations on the abacus. A developed brain is the basis for successful future activities.LEARNING NUMBERS is a colorful notebook that uses games as exercises, the main character of which is a curious rabbit Shoosha. The book will allow children to easily and naturally get acquainted with the design of the abacus and the rules of moving the beads.From the first lessons the exercises train the ability to quickly state the previous and the next numbers to a given one, the ability to count from anywhere in the direct and reverse order, and to determine the place of a given number in the number series.In addition, the workbook contains a lot of funny pictures, interesting tasks that create positive motivation for learning and actively develop the logic, memory, attention, and intelligence of children.We wish you and your child success in teaching mathematics and mental arithmetic!
