Soon after the Knight Commission delivered its findings, the FCC initiated a working group to identify crosscurrent and trend, and make recommendations on how the info. needs of communities can be met in a broadband world. This report by the FCC Working Group on the Info. Needs of Communities addresses the rapidly changing media landscape in a broadband age. **Pedagogical Psychology: Beyond the 21st Century** Gretchen M. Reevy,Stanley N. Bursten,2015-07-22 Frontiers in Psychology is introducing a new research topic, Pedagogical Psychology: Beyond the 21st Century, which will be released as an online journal issue in summer 2014. The purpose of Beyond the 21st Century will be to publish goal- oriented articles leading to improvement of teaching and learning at all levels of psychology education. Until perhaps 20 years ago, educational approaches to teaching were largely informed by a “Stand and Deliver” pedagogical attitude. The psychology of this approach has often invested unrealistic and unrealizable responsibilities in both teachers and students. With the emergence of electronic data sharing (e.g., the Internet) and global cooperation/competition, newer approaches to teaching have begun to supplement and sometimes replace the older model of teaching. These newer approaches have simultaneously taken advantage of technological advances, global changes, and an evolving understanding of successful student-mentor relationships. As the pedagogical models driven by these changes evolve into the 22nd century and beyond, what seems groundbreaking today will, in hindsight, be seen as hidebound. Thus, the major goal of Beyond the 21st Century will be to publish manuscripts which imaginatively, but realistically anticipate future trends in teaching undergraduate psychology. Types of manuscripts which are appropriate for Pedagogical Psychology should be visionary, yet empirically and/or theoretically based. We welcome manuscripts in all domains of pedagogical psychology, with a special interest on topics that are new, or expected to evolve rapidly. Such innovative topics include, but are not limited to: Online and hybrid teaching; Massive Open Online Courses (MOOCs). How has student success improved with the introduction of online/distance education? Are there dangers associated with online/distance education, especially MOOCs? How can student success be improved as technology evolves beyond the MOOC concept? What technological advances will make psychology education available and useful for more, and more diverse students? How can the physical classroom be transformed into a student centered, effective, virtual environment? Using the internet as resources for classes (e.g., stat tutorials, etc.) Uses of technology, such as social media (e.g., Facebook, Twitter), wikis, and clickers in the classroom The challenge of teaching particular courses online, such as psychology laboratory courses or practicums Seeking effective user feedback (i.e., regarding user friendliness, teaching effectiveness) for online courses, including MOOCs The Wikipedia initiative of the Association for Psychological Science Teaching “Generation Me;” anticipating changing generational needs Teaching international students Teaching non-traditional-age students Undergraduate research projects Integrating multiculturalism into all courses Infusing social justice issues into psychology courses Creating opportunities for interdisciplinary learning Teaching techniques for psychology courses which are often offered as electives rather than core curriculum (e.g., evolutionary psychology, psychology and the law, cross-cultural psychology, health psychology, positive psychology) Assessing institutional student learning objectives across the curriculum Contingent faculty/adjunct faculty/lecturers in psychology departments Working with changing legislative & accreditation constraints and unpredictable budgets Co-Hosts of Pedagog

**Dilettante** Dana Brown,2022-03-22 A witty, insightful, and delightfully snarky blend of pop culture meets memoir meets real-life Devil Wears Prada as readers learn the stories behind twenty-five years at Vanity Fair from the magazine’s former deputy editor “Dilettante offers the best seat in the house into the workings of one of

the great cultural institutions of our time.”—Buzz Bissinger, New York Times bestselling author of Friday Night Lights Dana Brown was a twenty-one-year-old college dropout playing in punk bands and partying his way through downtown New York’s early-nineties milieu when he first encountered Graydon Carter, the legendary editor of Vanity Fair. After the two had a handful of brief interactions (mostly with Brown in the role of cater waiter at Carter’s famous cultural salons he hosted at his home), Carter saw what he believed to be Brown’s untapped potential, and on a whim, hired him as his assistant. Brown instantly became a trusted confidante and witness to all of the biggest parties, blowups, and takedowns. From inside the famed Vanity Fair Oscar parties to the emerging world of the tech elite, Brown’s job offered him access to some of the most exclusive gatherings and powerful people in the world, and the chance to learn in real time what exactly a magazine editor does—all while trying to stay sober enough from the required party scene attendance to get the job done. Against all odds, he rose up the ranks to eventually become the magazine’s deputy editor, spending a quarter century curating tastes at one of the most storied cultural shops ever assembled. Dilettante reveals Brown’s most memorable moments from the halcyon days of the magazine business, explores his own journey as an unpedigreed outsider to established editor, and shares glimpses of some of the famous and infamous stories (and people) that tracked the magazine’s extraordinary run all keenly observed by Brown. He recounts tales from the trenches, including encounters with everyone from Anna Wintour, Lee Radziwill, and Condé Nast owner Si Newhouse, to Seth Rogen, Caitlyn Jenner, and acclaimed journalists Dominick Dunne and Christopher Hitchens. Written with equal parts affection, cultural exploration, and nostalgia, Dilettante is a defining story within that most magical time and place in the culture of media. It is also a highly readable memoir that skillfully delivers a universal coming-of-age story about growing up and finding your place in the world.

*Preserving the Press* Leo Bogart, 1991 The Newspaper Readership Project (1977-1983) was an unprecedented cooperative attempt by the American newspaper industry to halt the downward trend in readership and circulation. The Project had an enormous impact on American newspapers; it spurred such changes in their content as special sections and new graphics, and led to important innovations in distribution and promotion. Leo Bogart was a central figure in the conception and execution of the Project, so his account is truly an insider's view of the interplay of the Project and the people involved in it. *Preserving the Press: How Daily Newspapers Mobilized to Keep Their Readers* is an insider account that vividly describes the personalities, organizations, and policy debates of the American daily newspaper business at a critical moment in its history. Exciting and informative, it shows how this major American institution confronted the great social and technological changes that threatened its established position. Bogart demonstrates the difficulties of translating research findings into actual changes in practice, reviews controversies over the Project's promotional efforts, and reports on dramatic changes that occurred in newspaper distribution methods.

Rejection Proof Jia Jiang, 2015-04-14 An entertaining and inspiring account of conquering the fear of rejection, offering a completely new perspective on how to turn a no into a yes. Jia Jiang came to the United States with the dream of being the next Bill Gates. But despite early success in the corporate world, his first attempt to pursue his entrepreneurial dream ended in rejection. Jia was crushed, and spiraled into a period of deep self doubt. But he realized that his fear of rejection was a bigger obstacle than any single rejection would ever be, and he needed to find a way to cope with being told no without letting it destroy him. Thus was born his 100 days of rejection experiment, during which he willfully sought rejection on a daily basis--from requesting a lesson in sales from a car salesman (no) to asking a flight attendant if he could make an announcement on the loud speaker (yes) to his famous request to get Krispy Kreme doughnuts in the shape of Olympic rings (yes, with a viral video to prove it). Jia learned that even the most preposterous wish may be granted if you ask in the right way, and shares the secret of successful asking, how to pick targets, and how to tell when an initial no can be converted into something positive. But more important, he learned techniques for steeling himself against rejection and ways to develop his own confidence--a plan that can't be derailed by a single setback. Filled with great stories and valuable insight,

Rejection Proof is a fun and thoughtful examination of how to overcome fear and dare to live more boldly.
