LEED Green Associate Exam Practice Questions Exam Secrets Test Prep Staff Leed, 2018-04-12 LEED Green Associate Exam Practice Questions are the simplest way to prepare for the LEED test. Practice is an essential part of preparing for a test and improving a test taker's chance of success. The best way to practice taking a test is by going through lots of practice test questions. If someone has never taken a practice test, then they are unprepared for the types of questions and answer choices that they will encounter on the official test. There is a tremendous advantage to someone taking the test that is already familiar with the questions and answer choices. Another advantage of taking practice tests is that you can assess your performance and see if you need to study and practice more, or if you're already prepared enough to achieve success on your test day. If you do well on the practice test, then you know you're prepared. If you struggle on the practice test, then you know you may still have more work to do to get prepared. Taking lots of practice tests helps ensure that you are not surprised or disappointed on your test day. Our LEED Green Associate Exam Practice Questions give you the opportunity to test your knowledge on a set of questions. You can know everything that is going to be covered on the test and it will not do you any good on test day if you have not had a chance to practice. Repetition is a key to success and using practice test questions allows you to reinforce your strengths and improve your weaknesses. Detailed answer explanations are also included for each question. It may sound obvious, but you have to know which questions you missed (and more importantly why you missed them) to be able to avoid making the same mistakes again when you take the real test. That's why our practice questions include answer keys with detailed answer explanations. These in-depth answer explanations will allow you to better understand any questions that were difficult for you or that you needed more help to understand.

The questions in this book could very well be found on the exam, but most actual exam questions will not be as complex as they are made here. Most of these questions on these mock exams have a twist or trick and many can only be answered if you know the materials backwards and forward. This makes for GREAT exam preparation because it makes you acutely aware of the types of tricks and the level of detail you MIGHT see on the exam..." – G. Patton "I highly recommend this book! What others are saying about LEED Green Associate Exam Guide...(Part I) Finally! A comprehensive study tool for LEED GA Prep! I took the one-day Green LEED Green Associate course and walked away with a power point binder printed in very small print--which was missing MUCH of the required information (although I didn't know it at the time). I studied my little heart out and took the test, only to fail it by 1 point. Turns out I did NOT study all the material I needed to in order to pass the test. I found this book, read it, marked it up, retook the test, and passed it with a 95%. Look, we all know the LEED Green Associate Exam is new and the resources for study are VERY limited. This one's the VERY best out there right now. I highly recommend it. --Consultant VA Complete overview for the LEED Green Associate exam I studied this book for about three days and passed the exam ... if you are truly interested in learning about the LEED system and green building design, this is a great place to start. --K.A. LEED Green Associate V4 Exam Complete Study Guide (Second Edition) A. Togay Koralturk, 2016-07-21 PASS THE LEED GREEN ASSOCIATE EXAM WITH FLYING COLORS! The LEED Green Associate V4 Exam Complete Study Guide aims to provide deep insight into the principles of green building; and helps the reader to learn, rather than to memorize the essential information for the exam. Thus, this approach equips candidates to successfully pass the LEED Green Associate exam with flying colors in order to actively apply green building and LEED principles in real life. This book is the only resource a candidate needs, in order to successfully pass the exam. As LEED v4 is quite different in comparison to the former versions, the book was entirely re-written; thus, it was not updated from a previous edition. All of the chapters contain guidance on the aspects that require extensive attention, while the book points out the finer details to focus on for the exam purposes. It does not matter how much time passes after taking the exam, as learning the real reasons behind the green building and LEED principles through observation will help to consolidate this information concisely. Even though the LEED Green Associate exams are sometimes referred to as conceptual exams, in reality the exam goes well beyond that. Without diving into the LEED prerequisites and credits, a candidate cannot ever guarantee passing the test; as a result, the book covers the core concepts of each LEED credit category, and then evaluates the LEED prerequisites and credits to demonstrate how those green building concepts turn into real projects with LEED requirements. The book is also recommended for students, professionals, and anyone who has not chosen to take an LEED professional exam, but nonetheless retains a strong interest in LEED and green buildings.
