Public Employment Services and European Law ,2007-09-27 Employment services are at the centre of a complex web of rules deriving from the EU, national public law and from private agreements. This book examines the law and regulation of public services through case studies of the public employment services in EU member states.

The Evolving Psyche of Law in Europe Magdalena Smieszek,2021-06-04 The book applies an interdisciplinary analytical framework, based on social psychology theories of inclusion and exclusion, to a discussion of legal discourse and the development of legal frameworks in Europe concerning migrants, asylum seekers, refugees, and European citizens. It adopts a psycho-historical perspective to discuss the evolution of international and European law with regard to the rights of citizens and asylum-seeking non-citizens, from the law's inception following the Second World War up to present-day laws and policies. The book reveals the embracing of a European identity based on human rights as the common feature in European treaties and institutions, one that is focused on European citizens and has inclusionary objectives. However, a cognitive dissonance can also be found, as this common identity-making runs counter to national proclivities, as well as securitized, threat-perception-oriented perspectives that can produce exclusionary manifestations concerning persons seeking asylum. In particular, a view of inclusion and exclusion via legal categorizations of status, as well as distributions of social and economic rights, draws attention to the links between social psychology and international law. What emerges in the analysis: a process of creating value is present both at its psychological roots and the expressions of value in the law. Fundamentally speaking, the emergence of laws and policies that center on human beings and human dignity, when understood from a psychological and emotion-based perspective, has the potential to transcend the dissonances identified.

Employment Privacy Law in the European Union Catarina Castro,2002 This book contains the national reports and a comparative synthesis regarding the employment privacy law in the European Union. It reflects the background research that has been undertaken to prepare a European study conducted with the support of the European Commission, DG Employment, and Social Affairs. The main purpose of this research has been to undertake a comparative study in the European Union on the issue of the protection of workers' personal data, more in particular concerning the case of surveillance and monitoring. The study has focused on the situation in the various Member States of the European Union and has aimed to focus on the extent of the Member State laws and guidelines in this area, on whether such laws or existing guidelines adequately protect the worker, and on suggestions or recommendations or appropriate guidelines that would ensure suitable protection for the worker in relation to his or her monitoring and surveillance by the employer. The research has been undertaken under the supervision of the editor with the cooperation of the contributors who are all specialists in the field of employment privacy. Each expert has prepared a country study regarding the situation in the relevant Member State. The national research activities have resulted in a general discussion at a closed expert meeting on 4 and 5 October 2001, organised at the Law Faculty of the University of Leuven (Belgium). During this seminar, country surveys have been further explained and discussed, and policy options or suggestions have been looked upon in the examined field of study. The comparative overview departs from the horizontal approach of comparativism. This means that it integrates all relevant information regarding Member States horizontally, throughout the general theme and its appropriate subthemes. Contributions to this book are made by: C. Castro, X.C. Vásquez, M. Colucci, M. Forde, A. Höland, T. Homan, A. Johansson, L. Kanellos, J. Kristiansen, N. Melzer, G. Morris, S. Nerbonne, A. von Koskull.

Understanding Labor and Employment Law in China Ronald C. Brown,2009-10-12 Continued economic prosperity in China and its international competitive advantage have been due in large part to the labor of workers in China, who for many years toiled in underregulated workplaces. More recently, labor law reforms have been praised for their progressive measures and, at the same time, blamed for placing too many economic burdens on companies, especially those operating on the margins, which in some cases have caused business failures. This, combined with the global downturn and the millions of displaced and unemployed Chinese migrant laborers, has created ongoing debate about the labor laws. Meanwhile, the Chinese Union has organized many of the Global Fortune 500 companies, and a form of collective bargaining is occurring. Workers are pursuing their legal labor rights in increasing numbers. This book provides a clear overview of the labor and employment law environment in China and its legal requirements, as well as practices under these laws used to deal with labor issues.

Encyclopedia of Law Enforcement Larry E. Sullivan,2005 This three-volume Encyclopedia of Law Enforcement provides a comprehensive, critical, and descriptive examination of all facets of law enforcement on the state and local, federal and national, and international stages. This work is a unique reference source that provides readers with informed discussions on the practice and theory of policing in an historical and contemporary framework. The volumes treat subjects that are particular to the area of state and local, federal and national, and international policing. Many of the themes and issues of policing cut across disciplinary borders, however, and several entries provide comparative information that places the subject in context.

In the Best Interest of Students Kelly Gallagher,2023-10-10 In his new book, *In the Best Interest of Students: Staying True to What Works in the ELA Classroom*, teacher and author Kelly Gallagher notes that there are real strengths in the Common Core standards, and there are significant weaknesses as well. He takes the long view, reminding us that standards come and go but good teaching remains grounded in proven practices that sharpen students' literacy skills. Instead of blindly adhering to the latest standards movement, Gallagher suggests: Increasing the amount of reading and writing students are doing while giving students more choice around those activities Balancing rigorous, high-quality literature and non-fiction works with student-selected titles Encouraging readers to deepen their comprehension by moving beyond the four corners of the text Planning lessons that move beyond Common Core expectations to help young writers achieve more authenticity through the blending of genres Using modeling to enrich students' writing skills in the prewriting, drafting, and revision stages Resisting the de-emphasis of narrative and imaginative reading and writing Amid the frenzy of trying to teach to a new set of standards, Kelly Gallagher is a strong voice of reason, reminding us that instruction should be anchored around one guiding question: What is in the best interest of our students?

Careers in Law Enforcement Coy H. Johnston,2016-02-03 *Careers in Law Enforcement* is a valuable resource for students considering a career in the criminal justice field, specifically in policing. Written in a concise and conversational tone, author Coy H. Johnston includes three main sections: planning a realistic path, selecting an appropriate career path in law enforcement, and preparing for the hiring process. The first chapter offers students a unique opportunity to take a personality/career test to help them discover the types of jobs that might be a good fit. Consequently, students will set sensible goals at the beginning of their degree program and seek appropriate internships and volunteer opportunities. This text is a helpful resource students will be able to peruse repeatedly when they are ready to start the process of applying for jobs within law enforcement.

Education 2.0 Leonard J. Waks,2015-11-17 Thirty years of spirited school reforms have failed to improve our schools and instead have left our public school systems in disarray. Meanwhile, employment prospects for high school and college graduates are fading, and the public is losing faith in its schools. The education paradigm inherited from the Industrial Era is in crisis. In the last decade, however, the Internet and new Web 2.0 technologies have placed the entirety of human knowledge in the hands of everyone. What will our educational institutions make of this unprecedented flood of Web-based learning resources? How can schools be transformed to accommodate the new possibilities for personal and social learning? Leonard Waks gathers all the pieces of our current educational puzzle together in this groundbreaking book. Drawing on new organizational models grounded in complexity theory, Waks maps out an inspiring new paradigm for education in the Internet age, and connects all the dots in constructing detailed models for new schools-now transformed into open learning centers. Finally, Waks details action steps readers can take to speed this transformative process along in their own locations.
