**Anna Hersey**

Scandinavian Song Anna Hersey, 2016-08-11 Scandinavian art songs are a unique expression of the cultures of Sweden, Norway, and Denmark. Although these three countries are distinct from one another, their languages and cultures share many similarities. Common themes found in art and literature include a love of nature, especially of the sea, feelings of longing and melancholy, the contrast between light and dark, the extremes of the northern climate, and lively folk traditions. These shared sensibilities are reflected and expressed in a tangible way through music. Scandinavian art song has faced several challenges over the years in North America (even in the American Midwest, where descendants of Scandinavian immigrants are concentrated). But matters have changed recently with the recent expansion of diction curricula to cover languages other than English, French, German, and Italian. The primary obstacle remains practical resources for the study of art songs and lyric diction of Sweden, Norway, and Denmark. This guide remedies this problem. *Scandinavian Song* is a practical guide to the art songs of Sweden, Norway, and Denmark. Unlike other sources that give at best a cursory overview of lyric diction in the Scandinavian languages, this guide provides practical information, enabling teachers and students to render transcriptions of Swedish, Norwegian, and Danish texts into the International Phonetic Alphabet (IPA)—an absolute necessity for any study of repertoire. An extensive survey of available music, sample IPA transcriptions and translations, as well as a website link with native speakers reciting selected song texts, make this book an invaluable resource for students and professors in North American college, university, and conservatory voice programs.

*The Nordic Languages* Oskar Bandle, Lennart Elmevik, Gun Widmark, 2002 The handbook is not tied to a particular

methodology but keeps in principle to a pronounced methodological pluralism, encompassing all aspects of actual methodology. Moreover it combines diachronic with synchronic-systematic aspects, longitudinal sections with cross-sections (periods such as Old Norse, transition from Old Norse to Early Modern Nordic, Early Modern Nordic 1550-1800 and so on). The description of Nordic language history is built upon a comprehensive collection of linguistic data; it consists of more than 200 articles written by a multitude of authors from Scandinavian and German and English speaking countries. The organization of the book combines a central part on the detailed chronological developments and some chapters of a more general character: chapters on theory and methodology in the beginning and on overlapping spatio-temporal topics in the end.
