Leadership for a world that does not yet exist: Education with no limits Steve and Paula Kenning, 2019-12-13 An increasing societal trend is the belief that the 21st century requires a rethink of the education system. Change is happening fast and our students are growing up in a world where jobs are not certain or guaranteed. The purpose of education is to prepare students for a world we can't envisage, so when they are stuck, they choose to think, instead of remember. Alongside this, there is also a need for education systems to impart higher level skills aligned with the demands of growing economies, where many jobs are being automated and skill sets are changing fast. Are professionals, employers and educational institutions ready for the challenge of developing the new skills this future will demand? This book has evolved out of many years of implementing innovation in education, it has been written because we believe we have something to say which might inspire, support or encourage other educationalists to take action to align the education our schools deliver with the needs of the 21st century.

The Oxford Handbook of Intellectual Property Law Rochelle C. Dreyfuss, Justine Pila, 2018-04-12 We live in an age in which expressive, informational, and technological subject matter are becoming increasingly important. Intellectual property is the primary means by which the law seeks to regulate such subject matter. It aims to promote innovation and creativity, and in doing so to support solutions to global environmental and health problems, as well as freedom of expression and democracy. It also seeks to stimulate economic growth and competition, accounting for its centrality to EU Internal Market and international trade and development policies. Additionally, it is of enormous and increasing importance to business. As a result there is a substantial and ever-growing interest in intellectual property law across all spheres of industry and social policy, including an interest in its legal principles, its social and normative foundations, and its place and operation in the political economy. This handbook written by leading academics and practitioners from the field of intellectual property law, and suitable for both a specialist legal readership and an intelligent but non-specialist legal and non-legal readership, provides a comprehensive account of the following areas: - The foundations of IP law, including its emergence and development in different jurisdictions and regions; - The substantive rules and principles of IP; and - Important issues arising from the existence and operation of IP in the political economy.
