The Oxford Handbook of Consumption Dr. Frederick F. Wherry, Dr. Ian Woodward, 2019-09-02 The Oxford Handbook of Consumption consolidates the most innovative recent work conducted by social scientists in the field of consumption studies and identifies some of the most fruitful lines of inquiry for future research. It begins by embedding marketing in its global history, enmeshed in various political, economic, and social sites. From this embedded perspective, the book branches out to examine the rise of consumer culture theory among consumer researchers and parallel innovative developments in sociology and anthropology, with scholarship analyzing the roles that identity, social networks, organizational dynamics, institutions, market devices, materiality, and cultural meanings play across a wide variety of applications, including, but not limited to, brands and branding, the sharing economy, tastes and preferences, credit and credit scoring, consumer surveillance, race and ethnicity, status, family life, well-being, environmental sustainability, social movements, and social inequality. The volume is unique in the attention it gives to consumer research on inequality and the focus it has on consumer credit scores and consumer behaviors that shape life

chances. The volume includes essays by many of the key researchers in the field, some of whom have only recently, if at all, crossed the disciplinary lines that this volume has enabled. The contributors have tried to address several key questions: What motivates consumption and what does it mean to be a consumer? What social, technical, and cultural systems integrate and give character to contemporary consumption? What actors, institutions, and understandings organize and govern consumption? And what are the social uses and effects of consumption?

*Re-thinking Mediations of Post-truth Politics and Trust* Jayson Harsin, 2024-01-23 This collection reaches beyond fake news and propaganda, beyond misinformation and charismatic liars, to explore the lesser-publicized cultural forms and practices that serve as a cultural infrastructure for post-truth society and politics. Situating post-truth in specific contexts as a site of contestation or crisis, the book critically explores it as a dynamic and shifting site around which political and cultural practices in specific contexts revolve and overlap. Through a breadth of perspectives, the volume considers a number of overlapping cultural and political developments across varying national and transnational contexts: changing technologies and practices of cultural production that sometimes shift and at other times reproduce authority of traditional institutional truth-tellers; seismic cultural changes in representations, values and roles regarding gender, sexuality, race and historical memory about them, as well as corresponding reactionary discourses in the "culture wars"; questions of authenticity, honesty, and power relations that combine many of the former shifts within an all-encompassing culture of (self-) promotional, attentional capitalism. These considerations lead scholars to focus on corresponding shifting cultural dynamics of popular truth-telling and (dis-) trust-making that inform political culture. In this more global view, post-truth becomes foremost an influentially anxious public mood about the struggles to secure or undermine publicly accepted facts. This nuanced

and insightful collection will interest scholars and students of communication studies, media and cultural studies, media ethics, journalism, media literacy, sociology, anthropology, philosophy, and politics.

**Disruptive Fintech** James Deitch,2019-12-16  
Throughout history, innovators have disrupted existing financial services norms to change the landscape of the marketplace. Disruptive Fintech briefly traces fractional reserves, the creation of bank currency that traded at a premium to bullion value, central bank regulation, securitization of assets and loans, the current state of digital currency and electronic payments. The author then looks toward the future of fintech and the forces of disruption that will change the landscape of financial life as we know it. Using over 100 interviews with thought leading CEOs, this book develops a methodology to identify financial services that are ripe for innovation and discusses how innovative thinking can be used as a disruptive weapon to attack incumbents and create effective new fintech models. The book discusses How to relate historical innovations and disruptions in financial services to the current

landscape How to follow a process to identify the threats facing incumbent processes and businesses, and how innovative thinking can be used as a disruptive weapon to attack incumbents and create effective new fintech models How many fintech innovations will be constructed by re-arranging or re-purposing existing core processes In this insightful book, author James Deitch, CPA CMB, argues that some of today's high-flying fintech innovators will flourish, but many may perish as the fire of innovation consumes those fintechs that are slow to monetize their promises.
