Gender, Indian, Nation Erin O'Connor, 2022-09-13 Until recently, few scholars outside of Ecuador studied the country's history. In the past few years, however, its rising tide of indigenous activism has brought unprecedented attention to this small Andean nation. Even so, until now the significance of gender issues to the development of modern Indian-state relations has not often been addressed. As she digs through Ecuador's past to find key events and developments that explain the simultaneous importance and marginalization of indigenous women in Ecuador today, Erin O'Connor usefully deploys gender analysis to illuminate broader relationships between nation-states and indigenous communities. O'Connor begins her investigations by examining the multilayered links between gender and Indian-state relations in nineteenth-century Ecuador. Disentangling issues of class and culture from issues of gender, she uncovers overlapping, conflicting, and ever-evolving patriarchies within both indigenous communities and the nation's governing bodies. She finds that gender influenced sociopolitical behavior in a variety of ways, mediating interethnic struggles and negotiations that ultimately created the modern nation. Her deep research into primary sources—including congressional debates, ministerial reports, court cases, and hacienda records—allows a richer, more complex, and better informed national history to emerge. Examining gender during Ecuadorian state building from "above" and "below," O'Connor uncovers significant processes of interaction and agency during a critical period in the nation's history. On a larger scale, her work suggests the importance of gender as a shaping force in the formation of nation-states in general while it questions recountings of historical events that fail to demonstrate an awareness of the centrality of gender in the unfolding of those events.

Life Course, Work, and Labour in Global History Josef Ehmer, Carola Lentz, 2023-09-18 This multidisciplinary volume offers unique perspectives, across the globe and throughout the centuries, on the complexity of the nexus between work and the life course. For industrialized regions, from Germany and Western Europe to China and Japan, it questions the widespread notion of an overall growing working life course instability, since the 1970s. For unindustrialized or industrializing regions, from West Africa to state socialist East Central Europe, as well as for transnational and transcontinental labour migrations, it shows the enormous influence of the extended family and wider kin on individual pathways into and out of work. For early modern Europe, India, and China, and up to twentieth-century state socialism and to current welfare states, it stresses and concretizes the crucial impact of age and gender for both societal labour relations and individual work-related decision making. With all chapters based on original research, the volume reflects a close cooperation between historians, anthropologists, and sociologists. Its multidisciplinary approach finds expression in its methodological plurality, reaching from archival research and sophisticated statistical analyses to biographical interviews and participant observation. This mix allows to grasp the interaction between societal change and individual agency.

The Linguistics Enterprise Martin B.H. Everaert, Tom Lentz, Hannah De Mulder, Øystein Nilsen, Arjen Zondervan, 2010-01-13 Linguistics investigates the systems underlying language, speech, and language use. Linguists seek to develop an understanding of the rules and laws that govern the structure and use of particular languages and the manner in which these interact with internal systems and processes (interpretation, speech perception, and production) and with the outside world (acquisition, use, change and role in society). The articles in this volume present a valuable addition to answering three important questions about knowledge in linguistics: What is knowledge in linguistics, how is it acquired, and how is it put to use? Apart from the data on the specific phenomena addressed in the articles, the book presents insight into the palette of present-day linguistics. In this way, it aims to break open the division of linguistics into subfields thereby making possible cross-fertilisation.

The Sum of the People Andrew Whitby, 2020-03-31 This fascinating three-thousand-year history of the census traces the making of the modern survey and explores its political power in the age of big data and surveillance. In April 2020, the United States will embark on what has been called the largest peacetime mobilization in American history: the decennial population census. It is part of a tradition of counting people that goes back at least three millennia and now spans the globe. In *The Sum of the People*, data scientist Andrew Whitby traces the remarkable history of the census, from ancient China and the Roman Empire, through revolutionary America and Nazi-occupied Europe, to the steps of the Supreme Court. Marvels of democracy, instruments of exclusion, and, at worst, tools of tyranny and genocide, censuses have always profoundly shaped the societies we've built. Today, as we struggle to resist the creep of mass surveillance, the traditional census -- direct and transparent -- may offer the seeds of an alternative.

Presocratics and Papyrological Tradition Christian Vassallo, 2019-10-08 The papyri transmit a part of the testimonia relevant to pre-Socratic philosophy. The 'Corpus dei Papiri Filosofici' takes this material only partly into account. In this volume, a team of specialists discusses some of the most important papyrological texts that are major instruments for reconstructing pre-Socratic philosophy and doxography. Furthermore, these texts help to increase our knowledge of how pre-Socratic

thought – through contributions to physics, cosmology, ethics, ontology, theology, anthropology, hermeneutics, and aesthetics – paved the way for the canonic scientific fields of European culture. More specifically, each paper tackles (published and unpublished) papyrological texts concerning the Orphics, the Milesians, Heraclitus, Empedocles, Anaxagoras, the early Atomists, and the Sophists. For the first time in the field of pre-Socratics studies, several papers are devoted to the Herculanean sources, along with others concerning the Graeco-Egyptian papyri and the Derveni Papyrus.

Beyond Exceptionalism Rebekka Mallinckrodt,Josef Köstlbauer,Sarah Lentz,2021-08-23 While the economic involvement of early modern Germany in slavery and the slave trade is increasingly receiving attention, the direct participation of Germans in human trafficking remains a blind spot in historiography. This edited volume focuses on practices of enslavement taking place within German territories in the early modern period as well as on the people of African, Asian, and Native American descent caught up in them.

Heraclides of Pontus Eckart Schutrumpf,2018-04-24 Heraclides of Pontus hailed from the shores of the Black Sea. He studied with Aristotle in Plato's Academy, and became a respected member of that school. During Plato's third trip to Sicily, Heraclides served as head of the Academy and was almost elected its head on the death of Speusippus. His interests were diverse. He wrote on the movements of the planets and the basic matter of the universe. He adopted a materialistic theory of soul, which he considered immortal and subject to reincarnation. He discussed pleasure, and like Aristotle, he commented on the Homeric poems. In addition, he concerned himself with religion, music, and medical issues. None of Heraclides' works have survived intact, but in antiquity his dialogues were much admired and often pillaged for sententiae and the like. The volume contains a new edition of the sources for Heraclides' life and thought. The text is by Eckart Schutrumpf and the translation by Peter Stork, Jan van Ophuijsen, and Susan Prince. The discussion of the sources includes contributions by twelve scholars: La Tradizione Papirologica di Eraclide Pontico by Tiziano Dorandi; Heraclides' Intellectual Context by Jorgen Mejer; Heraclides of Pontus and the Philosophical Dialogue by Matthew Fox; Heraclides on Pleasure by Eckart Schutrumpf; Heraclides on the Soul and Its Ancient Readers by Inna Kupreeva; Unjointed Masses: A Note on Heraclides Physical Theory by Robert W. Sharples; Heliocentrism in or out of Heraclides by Paul T. Keyser; The Reception of Heraclides' Theory of the Rotation of the Earth from Posidonius to Simplicius: Texts, Contexts and Continuities by Robert B. Todd and Alan C. Bowen; Heraclides of Pontus on the Motions of Venus and Mercury by Alan C. Bowen and Robert B. Todd; The Woman Not Breathing by Philip van der Eijk; Heraclides of Pontus on Homer by Malcolm Heath; and Heraclides and Musical History by Andrew Barker.
