Leopard Gecko Care: The Complete Guide to Caring for and Keeping Leopard Geckos as Pets Tabitha Jones, 2019-03-05 Leopard geckos have become a very popular, and common, pet and have been extensively bred within the United States over the last thirty years. Due to the extensive breeding there are multiple different colour morphs available which adds to the desirability of the leopard gecko as a pet. The leopard gecko (scientifically known as *Eublepharis macularius*) is a crepuscular ground-dwelling lizard. Unlike the majority of other gecko species, the leopard gecko possesses moveable eyelids which gives the gecko an anthropomorphic quality. The species' extraordinary set of eyelids is the basis for the scientific name. *Eublepharis* is a combination of the Greek words *Eu*, meaning 'good, ' and *Blephar*, meaning 'eyelid.' The name *Macularius* is derived from the Latin word *Macula* which translates to 'spot' or 'blemish' which is in obvious reference to the animal's spotted markings. They are

naturally found in the deserts of Asia, Pakistan and northern India. This book was previously published by 'Pet Care Professionals' under the same name.
