Using R for Introductory Statistics John Verzani, 2018-10-03 The second edition of a bestselling textbook, *Using R for Introductory Statistics* guides students through the basics of R, helping them overcome the sometimes steep learning curve. The author does this by breaking the material down into small, task-oriented steps. The second edition maintains the features that made the first edition so popular, while updating data, examples, and changes to R in line with the current version. See What's New in the Second Edition: Increased emphasis on more idiomatic R provides a grounding in the functionality of base R. Discussions of the use of RStudio helps new R users avoid as many pitfalls as possible. Use of knitr package makes code easier to read and therefore easier to reason about. Additional information on computer-intensive approaches motivates the traditional approach. Updated examples and data make the information current and topical. The book has an accompanying package, *UsingR*, available from CRAN, R's repository of user-contributed packages. The package contains the data sets mentioned in the text (`data(package=UsingR)`), answers to selected problems (`answers()`), a few demonstrations (`demo()`), the errata (`errata()`), and sample code from the text. The topics of this text line up closely with traditional teaching progression; however, the book also highlights computer-intensive approaches to motivate the more traditional approach. The authors emphasize realistic data and examples and rely on visualization techniques to gather insight. They introduce statistics and R seamlessly, giving students the tools they need to use R and the information they need to navigate the sometimes complex world of statistical computing.

Space and the Architect Herman Hertzberger, 2010 The work of Herman Hertzberger is the subject of wide international esteem. 1991 first saw publication of Hertzberger's *Lessons for Students in Architecture*, an elaborated version of lectures he had given since 1973 at Delft University of Technology. This immensely successful book has gone through many reprints and has also been published in Japanese, German, Italian, Portuguese, Taiwanese, Dutch, Greek, Polish, Iranian, Korean and Chinese. *Space and the Architect* is the second book written by Hertzberger. It charts the backgrounds to his work of recent years and the ideas informing it, drawing on a wide spectrum of subjects and designs by artists, precursors, past masters and colleagues, though with his own work persistently present as a reference. Space is its principal theme, physical space but also the mental or intellectual regions the architect calls upon during the process of designing. Once again Hertzberger's broad practical experience, his ideas and his seemingly inexhaustible 'library' of images are a major source of inspiration for anyone whose concern is the design of space.

Reflections on the Revolution in Europe Christopher Caldwell, 2009-07-28 In light of cultural crises such as the Danish cartoon controversy and the terrorist attack on the *Charlie Hebdo* newspaper in Paris, Christopher Caldwell's incisive perspective has never been more timely or indispensable. *Reflections on the Revolution in Europe* is destined to become the classic work on how Muslim immigration permanently reshaped the West. This provocative and unflinching analysis of Europe's unexpected influx of immigrants investigates the increasingly prominent Muslim populations actively shaping the future of the continent. Muslims dominate or nearly dominate many important European cities, including Amsterdam and Rotterdam, Strasbourg and Marseille, the Paris suburbs and East London, and in those cities Islam has challenged the European way of life at every turn, becoming, in effect, an "adversary culture." In *Reflections on the Revolution in Europe*, Caldwell examines the anger of natives and newcomers alike. He exposes the strange ways in which welfare states interact with Third World customs, the anti-Americanism that brings European natives and Muslim newcomers together, and the arguments over women and sex that drive them apart. He considers the appeal of sharia, "resistance," and jihad to a second generation that is more alienated from Europe than the first, and addresses a crisis of faith among native Europeans that leaves them with a weak hand as they confront the claims of newcomers.

Show Your Work! Austin Kleon, 2015-11-04 Kata Edgar Allan Poe, sebagian besar penulis takut jika proses berkaryanya diketahui orang lain. Sementara itu, Pablo Picasso kerap membuat orang yang berkomunikasi dengannya justru kehilangan energi dan motivasi berkarya. Ya, keduanya memang maestro legendaris, tapi sekarang bukan saatnya lagi berkarya ala mereka. Bukan juga zamannya Mozart sang genius musik. Ini eranya kamu, siapa pun kamu, bisa berkarya! Lalu, apa kuncinya? Tunjukkan saja. Di zaman keterbukaan ini, semua orang punya kesempatan sama untuk jadi hebat. Jangan sembunyikan proses kreatifmu. Undang orang-orang untuk melihatnya. Jangan khawatir kritik, karena itu bahan pelajaran buatmu. Ide yang menurutmu tidak menarik, siapa tahu luar biasa bagi orang lain. Lebih dari itu, karyamu juga bisa menginspirasi orang lain. Jadi, tunggu apa lagi? Tak perlu ragu atau malu. Berbagi karya membuatmu kaya! ... Semakin banyak kamu memberi, semakin banyak yang kembali kepadamu.-Paul Arden [Mizan, Noura Books, Karya, Hidup, Berkarya, Kerja, Indonesia]

Your Complete Guide to Factor-Based Investing Andrew L. Berkin, Larry E. Swedroe, 2016-10-07 There are hundreds of exhibits in the investment factor zoo. Which ones are actually worth your time, and your money? Andrew L. Berkin and Larry E. Swedroe, co-authors of *The Incredible Shrinking Alpha*, bring you a thorough yet still jargon-free and accessible guide to applying one of today's most valuable quantitative, evidence-based approaches to outperforming the market: factor investing. Designed for savvy investors and professional advisors alike, *Your Complete Guide to Factor-Based Investing: The Way Smart Money Invests Today* takes you on a journey through the land of academic research and an extensive review of its 50-year quest to uncover the secret of successful investing. Along the way, Berkin and Swedroe cite and distill more than 100 academic papers on finance and introduce five unique criteria that a factor (at its most basic, a characteristic or set of characteristics common among a broad set of securities) must meet to be considered worthy of your investment. In addition to providing explanatory power to portfolio returns and delivering a premium, Swedroe and Berkin argue a factor should be persistent, pervasive, robust, investable and intuitive. By the end, you'll have learned that, within the entire factor zoo, only certain exhibits are worth visiting and only a handful of factors are required to invest in the same manner that made Warren Buffett a legend. *Your Complete Guide to Factor-Based Investing: The Way Smart Money Invests Today* offers an in-depth look at the evidence practitioners use to build portfolios and how you as an investor can benefit from that knowledge, rendering it an essential resource for making the informed and prudent investment decisions necessary to help secure your financial future.

Everything you learn in this course can also be applied to trading stocks or Forex as well. Trading doesn't have to be difficult, even though some educators try to impress you with how much they know by complicating something that is in reality pretty easy to learn. I'm not going to impress you with how much I know. What I'm going to impress you with is how fast you are going to learn to trade fulltime for a living. After all, isn't that what's really important? This course is unlike anything you have ever seen before. First I start out with the concept that you don't even know what the commodities market is, much less how to trade it. Not only have I made this course easy to understand, I've also made it fun! The course is over 450 pages printed in full color and comes with 39 online videos that show you exactly how each of the strategies work in the real markets. The Front Office Tom Costello, 2021-02-05 Getting into the Hedge Fund industry is hard, being successful in the hedge fund industry is even harder. But the most successful people in the hedge fund industry all have some ideas in common that often mean the difference between success and failure. The Front Office is a guide to those ideas. It's a manual for learning how to think about markets in the way that's most likely to lead to sustained success in the way that the top Institutions, Investment Banks and Hedge Funds do. Anyone can tell you how to register a corporation or how to connect to a lawyer or broker. This isn't a book about those 'back office' issues. This is a book about the hardest part of running a hedge fund. The part that the vast majority of small hedge funds and trading system developers never learn on their own. The part that the accountants, settlement clerks, and back office staffers don't ever see. It explains why some trading systems never reach profitability, why some can't seem to stay profitable, and what to do about it if that happens to you. This isn't a get rich quick book for your average investor. There are no easy answers in it. If you need someone to explain what a stock option is or what Beta means, you should look somewhere else. But if you think you're ready to reach for the brass ring of a career in the institutional investing world, this is an excellent guide. This book explains what those people see when they look at the markets, and what nearly all of the other investors never do.

Ruimte en leren Herman Hertzberger, 2008 In het omvangrijke oeuvre van Herman Hertzberger is de bouw van scholen een van de belangrijkste opgaven. Hij bouwde tot op heden ruim dertig scholen. Volgens Hertzberger is scholenbouw vandaag de dag een van de weinige deelgebieden binnen de architectuur waarbij de ontwerper nog de menselijke condities kan bepalen en beïnvloeden. Hij stelt dat er evenwicht moet zijn tussen gebruik, functionaliteit en de architectuur van schoolgebouwen, waarbij de architectuur geïnspireerd wordt door het onderwijs. Juist met de huidige ontwikkelingen in het onderwijs, van klassikaal naar meer individueel gericht onderwijs, dienen de gebouwen steeds opnieuw bedacht te worden. De wisselwerking tussen onderwijs, onderwijssystemen en architectuur is evident. In Ruimte en Leren legt Hertzberger zijn ruime ervaring, kennis en opvattingen vast in een theoretische beschouwing over de ruimtelijke condities van leren.
