Written in conjunction with a field of advisors, this study represents the twenty-first in an annual series of royalty rate studies in the merchandising and trademark licensing area. While these changes are generally subtle, should you find yourself in the negotiation of a multi-year license agreement for a hot property, a half-point difference in royalty rates over a five-year period can mean millions of dollars in additional (or decreased) royalty income. Seemingly minor changes can have substantial consequences. In addition to the table of royalty rates that we have provided in years past, the 2022 Edition has important features that should be of interest to our readers: A new subsection discussing common marketing funds (CMFs). CMFs are relatively common in the industry and are included in roughly fifty percent of cases. Updated royalty

rate surveys with product categories listed alphabetically and by trademark class. Survey charts have been completely revamped to include a range of typical royalty rates for each product category, as well as the industry average royalty rate for each particular product. Sections 2 and 3 now include royalty rate surveys for interior design properties. An updated listing of the top franchises from 2021. Updated Section 6 detailing the state of the licensing industry, with updated survey and statistical information on worldwide licensing revenues by property type and product category, as well as the latest information on the top properties and agents in the industry. The 2022 survey includes property segment category for interior designers as licensor properties. This is a small but growing segment of the licensing marketplace. Updated listing of licensing agents and consultants actively working in the industry. New Appendix containing the latest reported court decisions with respect to royalty rates in all facets of the industry, including consumer products, computer technology, telecommunications, plant patents, biotechnology, video games, music, and reasonable royalty rates.
