Applied Principles of Horticultural Science Laurie Brown,2008-09-10 Applied Principles of Horticultural Science is that critical thing for all students of horticulture - a book that teaches the theory of horticultural science through the practice of horticulture itself. The book is divided into three sections - Plant science, Soil science, Pest and disease. Each section contains a number of chapters relating to a major principle of applied horticulture. Each chapter starts with a key point summary and introduces the underpinning knowledge which is then reinforced by exercises. The Long War Against God Henry Morris,2019-05-21 Darwin Challenged God's Word With Evolution...But Was He The Only One? Discover the old, ongoing war against biblical truth Dissect the origins of and arguments for atheistic thought Determine what you can do to defend your faith The denial of God is the root of every human problem, taking many forms over time - one of which is evolution. And this concept goes much farther back in time than we think. In The Long War Against God, the late Dr. Henry Morris, a renowned creationist, delves into the history of modern atheistic worldviews. Drawing from the writings of the Greeks, Babylonians, and other ancient philosophers, Morris demonstrates the long history and age of the plan to undermine God's Word. Whether it's evolutionism, humanism, pantheism, or atheism, Morris illuminates the past and present of these belief systems that seek to eliminate God. The Long War Against God will give you the tools you need to strengthen your own - and others' - faith in the battle for God's truth.

**Cultural Anthropology & Human Experience** Katherine A. Dettwyler, 2011-03-31 Katherine A. Dettwyler, author of the Margaret Mead Award-winning *Dancing Skeletons*, has written a compelling and original introductory text. *Cultural Anthropology & Human Experience* is suitable for use in Cultural and Social Anthropology courses, and its twelve chapters easily fit into quarter or semester terms, while leaving room for additional readings, discussions, or other projects. All the standard topics are covered, but with less emphasis on method and theory and more coverage of a variety of industrial and postindustrial societies. Auxiliary materials bells and whistles have been kept to a minimum to reduce distractions and maintain a reasonable price to students. The author has chosen all the photographs with great care to illustrate or amplify important points. The *Instructors Manual* includes summaries of each chapter, student exercises, and a test bank. Dettwyler's upbeat tone inspires students to: develop the ability to think logically, objectively, and critically about different cultural beliefs, practices, and social structures; understand that humans are primates with culture, with a complex overlay of environmental and cultural influences; appreciate how powerful cultural beliefs and practices can be in shaping human perceptions of the world; realize that culture is not the same thing as social constructions of race, ethnic identity, or place of geographic origin; understand why/how cultural practices make sense within the cultures that practice them; articulate how an anthropological perspective helps discern everyday situations and interactions at the local, national, and international levels; understand that anthropology is not just an academic discipline it is a way of looking at and understanding the world; appreciate the ways cultural beliefs and practices, social structures, and human lifestyles contribute to a meaningful life.
