Learning, Policy Making, and Market Reforms Covadonga Meseguer, Covadonga Meseguer Yebra, 2009-03-30 In the 1980s and 1990s, market reforms swept the world. It is widely believed that the reformist wave can be partly explained in terms of the lessons learned from policy failures of the past. Whereas this interpretation of events is well established, it has never been empirically proved. Learning and Market Reforms is the first study that tests the impact of policy learning on economic policy choices across time and space. The study supports the popular explanation that on average, governments around the world adopted privatization and trade liberalization, and sustained open capital accounts, as a result of learning from the experience of others.

Gender Relations in Global Perspective Nancy Cook, 2007 Faced with an increasingly diverse student population, an expanding field of gender scholarship, and an academic emphasis on multidisciplinary, social science professors often struggle to address and integrate such a broad array of gender issues in their courses. This book addresses that challenge by increasing students' understandings of gender relations in multiple social fields across time and space.
