Nature's Web Peter Marshall, 2015-02-12 This powerful book provides the first comprehensive overview of the intellectual roots of the worldwide environmental movement - from ancient religions and philosophies to modern science and ethics - and synthesizes them into a new philosophy of nature in which to ground our moral values and social action. It traces the origins and evolution of the dominant worldview that has built our industrial, technocratic, man-centered civilization, and brought us to the current ecological crisis. At the same time, it uncovers an alternative cultural tradition in the world's different religions and philosophies and describes how these ideas are now surfacing and coalescing to form an ecological sensibility and a new vision of nature which recognizes the inter-relatedness of all living things. Finally, this book integrates these varied traditions with modern physics and the science of ecology into a larger philosophical whole that provides the environmental movement with a comprehensive vision of an organic and sustainable society in harmony with nature. As ecological disasters continue to threaten our planet, becoming worse with every passing moment of indifference, it has become clear that we must take action. We must change our relationship with nature, and

return to the days when our lives were intimately connected to and dependent upon the natural world. Nature's Web lays the foundations for that change by explaining where our complex ideas about nature come from, why they are wrong, and what we can do to change them.

Self-Esteem Issues and Answers brings together these various perspectives in a unique format. The book is divided into

five sections. Section I focuses on core issues pertaining to the conceptualization and assessment of self-esteem, and when self-esteem is optimal. Section II concentrates on the determinants, development, and modifiability of self-esteem. Section III examines the evolutionary significance of self-esteem and its role in psychological processes and therapeutic settings. The Outfit Gus Russo, 2008-12-02 This is the story of the Outfit, the secretive organized crime cartel that began its reign in

prohibition-era Chicago before becoming the real puppet master of Hollywood, Las Vegas, and Washington D.C. The Outfit recounts the adventures and exploits of its bosses, Tony 'Joe Batters' Accardo (the real Godfather), Murray 'The Camel' or 'Curly' Humphreys (one of the greatest political fixers and union organizers this country has ever known), Paul 'The Waiter' Ricca, and Johnny Rosselli (the liaison between the shadowy world and the outside world). Their invisibility was their strength, and what kept their leader from ever spending a single night in jail. The Outfit bosses were the epitome of style and grace, moving effortlessly among national political figures and Hollywood studio heads-until their world started to crumble in the 1970s. With extensive research including recently released FBI files, the Chicago Crime files of entertainer Steve Allen, first-ever access to the voluminous working papers of the Kefauver Committee, original interviews with the members of the Fourth Estate who pursued the Outfit for forty years, and exclusive access to the journals of Humphrey's widow, veteran journalist Gus Russo uncovers sixty years of corruption and influence, and examines the shadow history of the United States.

Offering a unique look at the cultural and literary history of food in the eighteenth century, some highlights include: treatises on food and drink adulteration; vegetarian tracts; the period's most influential pamphlet about boycotting sugar as part of the anti-slavery debate; works on alcohol consumption, Shelley's translation of Euripedes' satyr play about cannibalism; and much more.

Rituals of Power Frans Theuws, Janet Laughland Nelson, 2000 13 papers by 16 leading archaeologists and historians of late antiquity and the early middle ages break new ground in their discussion, analysis and criticism of present interpretations of early medieval rituals and their material correlates. Some deal with rituals relating to death, life cycles and the circulation in other contexts of objects otherwise used in the burial ritual. Others are concerned with the symbolism and ideology of royal power, the formation of a political ideology east of the Rhine from the mid-5th

century onwards, and penance rituals in relation to Carolingian episcopal discourse on ecclesiastical power and morale. All deal with the creation of new identities, cultures, norms and values, and their expression in new rituals and ideas from the period of the Great Migrations through the Later Roman Empire down to the society of Beowulf and the later Carolingians.

Independent Television in Britain P. Bonner, L.

Aston, 2002-12-13 Success out of near disaster, finances taken to the edge of bankruptcy, resignations - this volume tells the dramatic stories of the major new commercial television developments in Britain between 1981-92. This is an authoritative account, from the people involved and from official documents, of the launches and first ten years of Channel 4 and TV-am, the expansion of cable television and early difficulties of satellite broadcasting.

George Harrison Philip Norman, 2023-10-24 From the author of the million-copy selling *Shout!: The Beatles in Their Generation* and the bestselling *John Lennon: The Life* comes a revealing portrait of George Harrison, the most undervalued and mysterious Beatle. Despite being hailed as one of the best guitarists of his era, George Harrison, particularly in his early decades, battled feelings

of inferiority. He was often the butt of jokes from his bandmates owing to his lower-class background and, typically, was allowed to contribute only one or two songs per Beatles album out of the dozens he wrote. Now, acclaimed Beatles biographer Philip Norman examines Harrison through the lens of his numerous self-contradictions. Compared to songwriting luminaries John Lennon and Paul McCartney he was considered a minor talent, yet he composed such masterpieces as 'While My Guitar Gently Weeps' and 'Here Comes the Sun', and his solo debut album 'All Things Must Pass' achieved enormous success, appearing on many lists of the 100 best rock albums ever. Modern music critics place him in the pantheon of Sixties guitar gods alongside Eric Clapton, Jimi Hendrix, Keith Richards and Jimmy Page. Harrison railed against the material world yet wrote the first pop song complaining about income tax. He spent years lovingly restoring his Friar Park estate as a spiritual journey, but quickly mortgaged the property to help rescue a film project that would be widely banned as sacrilegious, Monty Python's *Life of Brian*. Harrison could be fiercely jealous, but not only did he stay friends with Eric Clapton when Clapton fell in love with Harrison's wife, Pattie Boyd, the two men grew even closer after Clapton walked away with her. Unprecedented in scope

and filled with numerous colour photos, this rich biography captures George Harrison at his most multi-faceted: devoted friend, loyal son, master guitar-player, brilliant songwriter, cocaine addict, serial philanderer, global philanthropist, student of Indian mysticism, self-deprecating comedian and, ultimately, iconic artist and man beloved by millions.

Life Strategies, Human Evolution, Environmental Design V.

Geist, 2013-11-11 Consider that you were asked how to ensure human survival. Where would you begin? Conservation of resources jumps to mind. We need to conserve resources in order that economic activities may continue. Alas, this is a false start. Resources are always defined by a given economic system, and only it determines what is and what is not a resource. Therefore, conserving resources implies only the perpetuation of the appropriate economic system. Conservation of resources as we know them has nothing to do with the survival of mankind, but it has very much to do with the survival of the industrial system and society we live in today. We have to start, therefore, at a more basic level. This level, some may argue, is addressed by ensuring for human beings clean genes. Again, this is a mistaken beginning. It is thoroughly mistaken-for reasons of science. It is a false start

because malfunctioning organs and morphological structures are not only due to deleterious hereditary factors but particularly due to unfavorable environments during early growth and development. Moreover, eugenics is not acceptable to any but a small fraction of society. Eugenics may not be irrelevant to our future, but is premature and should be of little concern until we understand how human genes and environment interact.

Lies with a Straight Face Wayne R. Besen, 2023-10-11 *Lies with a Straight Face* tells the fascinating story of the precipitous rise and fall of the “ex-gay” conversion industry in a manner that is both enlightening and entertaining. This fast-moving, fact-based book is perfect for those who enjoy the marriage of politics, history and current events. The book features the riveting story of the 1998 Truth in Love ad campaign, where the Religious Right’s most prominent organizations joined forces to prove that LGBTQ people could be converted to heterosexuality through prayer and therapy. Their provocative national ad campaign created saturation media coverage, turned “ex-gay” into a household term and sparked innumerable water cooler conversations. In this book, you’ll find out the shocking results of the Truth in Love campaign and learn about what happened to their outspoken “ex-gay” poster boys and girls.

Lies with a Straight Face also discusses the contemporary con artists in the “ex-gay” industry and offers tangible ways for today’s leaders to fight back. Lies with a Straight Face is a sequel published on the twenty-year anniversary of Anything But Straight: Unmasking the Scandals and Lies Behind the Ex-Gay Myth. Nominated for two Lambda Literary Awards, Besen’s original book documents the history of conversion “cure” programs from the early 20th Century to 2002. His new book discusses what happened from 2003 up to the present day. “To prevail in our present-day battles, we must learn from our past,” said Besen. “Ex-gay conversion programs are a farce that wreck families and destroy lives.”
