Responsible Research with Biological Select Agents and Toxins Committee on Laboratory Security and Personnel Reliability Assurance Systems for Laboratories Conducting Research on Biological Select Agents and Toxins,Board on Life Sciences,Division on Earth and Life Studies,National Research Council,2010-01-12 The effort to understand and combat infectious diseases has, during the centuries, produced many key advances in science and medicine--including the development of

vaccines, drugs, and other treatments. A subset of this research is conducted with agents that, like anthrax, not only pose a severe threat to the health of humans, plants, and animals but can also be used for ill-intended purposes. Such agents have been listed by the government as biological select agents and toxins. The 2001 anthrax letter attacks prompted the creation of new regulations aimed at increasing security for research with dangerous pathogens. The outcome of the anthrax letter investigation has raised concern about whether these measures are adequate. Responsible Research with Biological Select Agents and Toxins evaluates both the physical security of select agent laboratories and personnel reliability measures designed to ensure the trustworthiness of those with access to biological select agents and toxins. The book offers a set of guiding principles and recommended changes to minimize security risk and facilitate the productivity of research. The book recommends fostering a culture of trust and responsibility in the laboratory, engaging the community in oversight of the Select Agent Program, and enhancing the operation of the Select Agent Program.

Musculoskeletal Manual Medicine Jiri Dvorak,Vaclav Dvorak,Wolfgang G. Gilliar,Werner Schneider,Hans Spring,Thomas Tritschler,2019-04-04 An evidence-based reference for integrating manual medicine into everyday clinical practice Written by the authors of the popular Manual Medicine: Diagnostics and Manual Medicine: Therapy, this book is a comprehensive guide to integrating manual medicine into the diagnosis and clinical management of musculoskeletal disorders and pain syndromes. Brimming with instructive images and illustrations, the book provides a solid foundation in general principles of manual medicine, spinal biomechanics, neurophysiology, as well as

treatments for each disorder and condition. Separate sections on the spine, limbs, and muscles present clinical applications for structural diagnosis and functional treatment. Highlights: Practical examples of evidence-based approaches to manual medicine 1,313 illustrations and photographs of superb quality that rapidly demonstrate key concepts Coverage of the essentials of the neuro-musculoskeletal examination with step-by-step descriptions of the techniques for observation, palpation, motion tests, functional examination, and provocative tests, including quick screening tests Chapter on the various components of nonradicular pain syndromes, including muscle pain syndromes, with clear diagnostic criteria for distinguishing the non-radicular and soft-tissue pain syndromes from other pain syndromes Succinct descriptions of common clinical neuro-orthopedic disorders and syndromes of the spine, upper limb, and lower limb in tabular format - ideal for rapid reference and review Discussion of the rationale for selecting particular low-risk treatment interventions, as well as a thorough discussion of indications and contraindications for patients with potentially increased risk Discussion of important considerations for documentation, informed consent, patient monitoring, and follow-up measures Practical section with descriptions of exercises for patients to do on their own Potential considerations for future research This book will serve as the definitive reference for all practitioners involved in the diagnosis and medical management of locomotor disorders and painful conditions. It will enable clinicians to enhance their diagnostic and treatment armamentarium by incorporating manual medicine techniques based on the current, evidence-based knowledge of the interrelationships between structure and function.

Stoking the Fire Kirby Brown, 2019-01-15 The years between Oklahoma statehood in 1907 and the 1971 reemergence of the Cherokee Nation are often seen as an intellectual, political, and literary “dark age” in Cherokee history. In *Stoking the Fire*, Kirby Brown brings to light a rich array of writing

that counters this view. A critical reading of the work of several twentieth-century Cherokee writers, this book reveals the complicated ways their writings reimagined, enacted, and bore witness to Cherokee nationhood in the absence of a functioning Cherokee state. Historian Rachel Caroline Eaton (1869–1938), novelist John Milton Oskison (1874–1947), educator Ruth Muskrat Bronson (1897–1982), and playwright Rollie Lynn Riggs (1899–1954) are among the writers Brown considers within the Cherokee national and transnational contexts that informed their lives and work. Facing the devastating effects on Cherokee communities of allotment and assimilation policies that ultimately dissolved the Cherokee government, these writers turned to tribal histories and biographies, novels and plays, and editorials and public addresses as alternative sites for resistance, critique, and the ongoing cultivation of Cherokee nationhood. *Stoking the Fire* shows how these writers—through fiction, drama, historiography, or Cherokee diplomacy—inscribed a Cherokee national presence in the twentieth century within popular and academic discourses that have often understood the “Indian nation” as a contradiction in terms. Avoiding the pitfalls of both assimilationist resignation and accommodationist ambivalence, *Stoking the Fire* recovers this period as a rich archive of Cherokee national memory. More broadly, the book expands how we think today about Indigenous nationhood and identity, our relationships with writers and texts from previous eras, and the paradigms that shape the fields of American Indian and Indigenous studies.

Death & Dying, Life & Living Charles A. Corr, Donna M. Corr, 2013 Practical and inspiring, this respected book helps readers navigate encounters with death, dying, and bereavement. The authors integrate classical and contemporary material, present task-based approaches for individual and family coping, and include four substantial chapters devoted to death-related issues faced by children, adolescents, adults, and the elderly. The text discusses a variety of cultural and religious

perspectives that affect people's understanding and practices associated with such encounters, and offers practical guidelines for constructive communication designed to encourage productive living in the face of death.
