Rhode Island Lighthouses Richard Holmes, 2008 The book is a pictorial history of Rhode Island's thirty-one lighthouses and two lightships stations. There are over 200 photographs in the book, including rare views of Gould Island Lighthouse, Nayatt Point Lighthouse and Point Judith Lighthouse. There are plans for Nayatt Point Lighthouse and Brenton Reef Lightship LV-102/WAL 525.

Florida Lighthouses John Hairr, 1999 Sporting the second-longest coastline in the United States, Florida has over 8,000 miles of sparkling beaches and waterfront property. This valuable landscape and the region's position between the Atlantic Ocean and the Gulf of Mexico made Florida key in the early expansion of American trade routes, but the state's several capes and dangerous reefs, rocks, and shoals made travel quite perilous to unwary mariners. When commerce and traffic began to grow between ports on the East Coast and along the Gulf of Mexico in the nineteenth century, it became necessary to construct aids to navigation along the state's long and treacherous coast. Lighthouses were the solution. Constructed in a variety of styles and sizes, Florida's lighthouses were erected on what, at the time, were some of the most desolate regions of the southeastern United States and included lonely offshore islands. Manned and inhabited by vigilant keepers and their families, these towers illuminated the dark seas and provided the beacon that guided lost travelers. Large brick structures watched over St. Augustine, Pensacola, and Ponce de Leon Inlet; iron skeletons towered over Crooked River and Hillsboro Inlet; and screwpile

lighthouses stood as sentinels in the waters off the Florida Keys.

Lighthouses of Humboldt County Julie Clark ,2021-10-11 The impenetrable coast of Humboldt County has been a historic navigational conundrum for sea captains since the 16th century. The Humboldt bar crossing, the lack of safe harbors, the storms, the unpredictable seas, and the rocky shores caused tragic shipwrecks, drownings, and maritime disasters. Beginning in 1850, the Department of the Treasury funded the construction of 11 lighthouses in California, including the Humboldt Harbor Lighthouse, the first one in Humboldt County. Due to its poor location in the sand dunes, the lighthouse was abandoned in 1892. New lighthouses were built in more appropriate locations such as Table Bluff, Cape Mendocino, Trinidad, and Punta Gorda. An increase in population on the north coast resulted in the reliance on passenger schooners and freight vessels, making these lighthouses critical to Humboldt County's economic stability and success. The Trinidad Head Lighthouse is the only one in operation today, yet the lighthouses of Humboldt County and their keepers remain integral to California's maritime history.

Eastern Great Lakes Lighthouses Bruce Roberts,Ray Jones,2001 Eastern Great Lakes Lighthouses combines the fascinating history and lore of lighthouses with stunning color and black-and-white photographs. The stories of the most significant lighthouses on Lakes Ontario, Erie, and Huron--on both the American and Canadian sides--come alive in the stirring profiles and photos contained in these pages. Descriptions of forty-three [count may change] lighthouses, including eighteen [count may change] on the Canadian side of the lakes, contain directions to the lights and details on visiting them. Together with striking photographs and regional locator maps, they complete this comprehensive examination of memorable Great Lakes landmarks. The Photo Information section discloses how photographer Bruce Roberts took many of the shots appearing in the book.

Inside this book, you'll find: *The fascinating origins of Nubble Light and the history of the surrounding region *True tales of shipwrecks and daring rescues *Efforts undertaken for preservation *Stories of colorful keepers In addition, this book is filled with information for visiting and viewing the lighthouse. North Carolina Lighthouses and Lifesaving Stations John Hairr,2004 Since the earliest days of European exploration, mariners have heard tales and relayed their own stories of North Carolina's perilous shoreline. With bold capes jutting into the ocean, sandy shoals extending miles offshore, fickle weather, and treacherous currents, it is no wonder that the coastline of the Old North State came to be known as the The Graveyard of the Atlantic. The inherent dangers of traveling North Carolina's coast long ago gave rise to a fascinating and world-renowned strand of lighthouses and lifesaving stations from Currituck to Cape Fear. For more than two centuries, these bright beacons of safety have guided ships into busy harbors, signaled dangerous navigational obstacles, and warmed the hearts of homesick travelers. Their unique shapes and stoic beauty, as well as the adventures and lore that surround them, have elevated North Carolina's lighthouses to a legendary level far beyond their practical purposes. Indeed, they have become symbols of a brave and triumphant way of life. As the use of satellite navigation increases, many of the lighthouses along the coast are being phased out of operation. Not surprisingly, a new wave of travelers have begun making pilgrimages, whether by land or sea, to visit these famous landmarks.

Tourists from all over the world now make the journey to lighthouses at Currituck Beach, Bodie Island, Cape Hatteras, and others. North Carolina Lighthouses and Lifesaving Stations presents to readers the tales behind the lighthouses, illuminating their past in both word and image.

Lighthouses of Bar Harbor and the Acadia Region Timothy E. Harrison, 2009-03-23 With the exception of Mount Desert Island's Bass Harbor Head Lighthouse, the lighthouses of Bar Harbor and the Acadia region are among the most remote and lesser-known lighthouses of Maine. As the vessel traffic changed in these areas in the early 1900s, some of these lighthouses were sold into private ownership while others became less important as aids to navigation. Since the structures were located on remote islands or in a highly restricted military installation, the photographs and historical firsthand memories of most of these lighthouses have remained elusive and seemingly lost in the dusty pages of time. Through vintage photographs, *Lighthouses of Bar Harbor and the Acadia Region* uncovers the history of these structures that kept watch over Maine's rocky coast.

Wave-Swept Lighthouses of New England Jeremy D'Entremont, 2018-07-02 The lighthouse is a pervasive icon in our culture, often used to symbolize positive qualities like faith, guidance, strength, and steadfastness. No structures embody these qualities more than wave-swept lighthouses, which were built to withstand the most extreme forces of wind and ocean waves, often in isolated, rocky locations far offshore. In the United States, the earliest attempts to build wave-swept lighthouses in the 1830s led to several masterpieces of engineering, a few of which are in the New England region. This book primarily focuses on six such structures: Whaleback (Maine), Saddleback Ledge (Maine), Minot's Ledge (Massachusetts), Halfway Rock (Maine), Graves Ledge (Massachusetts), and Ram Island Ledge (Maine). All of these wave-swept lighthouses stand in rugged testimony to the people who designed and built them, and they also serve to remind us of the struggles and sacrifices of the lighthouse keepers who kept a good light for so many years before automation.

Thomas Point Shoal Lighthouse: A Chesapeake Bay Icon David Gendell, 2020-10-12 For centuries, the hard-packed shoal at Thomas Point menaced Chesapeake Bay mariners. Even after two separate stone towers were built on the shoreline, sailors continued to request a light at the end of the mile-long shoal. When a new lighthouse was finally approved in 1873, experts deemed its novel design too fragile for the location--it was built anyway. Long overdue and of an inappropriate design, the iconic Thomas Point Shoal Lighthouse was lit in November 1875 and continues to serve mariners. Thomas Point is the last Chesapeake Bay screwpile-style lighthouse in its original location and one of only twelve American lighthouses designated as a National Historic Landmark. Join Annapolis sailor David Gendell as he explores Thomas Point.

Historically Famous Lighthouses (Classic Reprint) United States Coast Guard, 2017-10-22 Excerpt from *Historically Famous Lighthouses* Under the supervision of the United States Coast Guard, there are today some 158 manned lighthouses in the nation. Another 60 are cared for by other Coast Guard units in the general area. There are hundreds of other lights of varied description that are operated automatically. And, as technology improves, more and more lighthouses are being operated without a full time crew. Indeed, many of the isolated lighthouses described in this booklet are scheduled for automation. In the course of our history as a nation, and before that as British colonies, we have built hundreds of lighthouses, some of which still stand though now inactive, having been sold for private residential or other use. Many have been rebuilt and not a few have succumbed to the ravages of time. The history of our lighthouses thus parallels the history

of our nation. Since 1716, when the Province of Massachusetts built Boston Light, scarcely a year has passed that has not seen a new light structure erected somewhere along our sea coasts, on our navigable rivers, or along our lake shores. To tell the story of these lighthouses would be a major undertaking. These stories of some of them, however, have been selected chiefly for their historical interest. Others have been included because their unique locations or types of construction are of more than usual interest. The lighthouse typifies maritime safety. As part of our early coastal defense system, they played a major role in important Coast Guard duties related to military readiness. Additionally, the light's strategic locations along our coasts aided another early Coast Guard function, law enforcement, by making it possible for cutters to judge their distances from the coast and so prevent smuggling operations within the three-mile limit. The stories of 56 lighthouses have been told here. The stories of hundreds of others, of equal interest, could have been included had space permitted. The oldest lighthouse described is the Boston Light built in 1716. The newest in this booklet is Buzzards Bay Light which is located some five miles off the Massachusetts coast, replacing a lightship that had been there for many years.
