The Lighthouse Alison Moore, 2017-07-10 Futh, a middle-aged, recently separated man heads to Germany for a restorative walking holiday. During his circular walk along the Rhine, he contemplates the formative moments of his childhood. The Lighthouse Christopher Parker,2021-10-26 Amy Tucker is struggling to put her life back together following the death of her mother. The loss has left the eighteen-year-old heartbroken, and she doesn't know if her world will ever be whole again. Beatrice and Croc Harry Lawrence Hill,2022-01-11 One of Canada's most celebrated author's

debut novel for young readers Beatrice, a young girl of uncertain age, wakes up all alone in a tree house in the forest. How did she arrive in this cozy dwelling, stocked carefully with bookshelves and oatmeal accoutrements? And who has been leaving a trail of clues, composed in delicate purple handwriting? So begins the adventure of a brave and resilient Black girl's search for identity and healing in bestselling author Lawrence Hill's middle-grade debut. Though Beatrice cannot recall how or why she arrived in the magical forest of Argilia—where every conceivable fish, bird, mammal and reptile coexist, and any creature with a beating heart can communicate with any other—something within tells her that beyond this forest is a family that is waiting anxiously for her return. Just outside her tree-house door lives Beatrice's most unlikely ally, the enormous and mercurial King Crocodile Croc Harry, who just may have a secret of his own. As they form an unusual truce and work toward their common goal, Beatrice and Croc Harry will learn more about their forest home than they ever could have imagined. And what they learn about themselves may destroy Beatrice's chances of returning home forever.

history. He lives in Pebble Beach, California.

Fire Island Lighthouse Bill Bleyer, 2017-05-15 The first Fire Island Lighthouse was constructed in 1826 after numerous shipwrecks along the barrier island. A replacement tower built in 1858 incorporated innovations in lighthouse design such as the Fresnel lens. Vessels anchored offshore, known as lightships, augmented the lighthouse for many years. The Coast Guard shut down the site in 1973. Through the efforts of the Fire Island Lighthouse Preservation Society and the National Park Service, the beautiful structure was meticulously restored and the tower relit in 1986. Along with a selection of wonderful color photographs depicting the grandeur of the lighthouse, author Bill Bleyer charts the history of Long Island's cherished Fire Island Lighthouse.

Cape Hatteras Lighthouse Mary Ellen Riddle, Douglas Stover, 2021-05-03 The Cape Hatteras Lighthouse, standing 198.49 feet, is the tallest brick lighthouse in the United States. From 1803, when the first Cape Hatteras Lighthouse was built, to today, it cast its light over the waters off the Outer Banks of North Carolina, also called the Graveyard of the Atlantic. Its history--stretching from Augustin-

Jean Fresnel's lens laboratory in France to the beaches of Hatteras Island where the lighthouse keepers labored--includes war, shipwrecks, hurricanes, and cutting-edge technology. Due to politics, funding, and its precarious location, it took great effort to erect and protect a lighthouse built on a barrier island. The supporters and caretakers were many, including Alexander Hamilton in the 1700s and children donating coins to a statewide preservation campaign in 1982. In the 21st century, the Cape Hatteras Lighthouse continues to send out its beam to mariners.

When the Southern Lights Went Dark Mary Louise Clifford, J. Candace Clifford, 2023-10-01 The Confederacy extinguished the lights in all the lighthouses it controlled long before any shots were fired at Fort Sumter. *When the Southern Lights Went Dark: The Lighthouse Establishment During the Civil War* tells the story of the men who assumed the daunting task of finding the lenses and lamps, repairing deliberate destruction to the towers and lightships, and relighting them as soon as the Navy could afford them protection. From Cape Hatteras to Ocracoke Light, Jupiter Inlet to Tybee Island, St. Simons to Cockspur Island and others, these are the stories from a unique era in United States

lighthouse history. Unlike in peace time, when military officers filled the posts of engineer and inspector in each lighthouse district, civilians had to be found who were not only talented enough to build and maintain lighthouses, but also could supervise a party of workmen and make decisions on their own. Those men in the field had to find keepers, see that they were paid, and ensure they had food, water, and essential supplies. The Lighthouse Board was far away in Washington and could do little more than give advice, order needed equipment, record the dispatches from the field, and pay the bills it received. From Cape Hatteras to Ocracoke Light, Jupiter Inlet to Tybee Island, St. Simons to Cockspur Island and others, these are the stories from a unique era in United States lighthouse history.

Lighthouses and Lightships of the United States George Rockwell Putnam, 1917

The Cape Hatteras Lighthouse, 2000 Carr tells the story of the noble lighthouse from its earliest history to details of the 1999 relocation of the treasured landmark. For now, North Carolinians have succeeded in protecting their lighthouse as it has protected thousands of sailors for over a century. 32

Point Pinos Light Aileen Weintraub, 2002-12-15 Provides a history of the Point Pinos Light, the West Coast's oldest continuously operating lighthouse, completed in 1855.

Florida Lighthouses for Kids Elinor De Wire, 2004 Presents a history of Florida's thirty-three lighthouses, including how they were designed and built, how they operate, and the bravery of their keepers.

Florida Lighthouses John Hairr, 1999 Sporting the second-longest coastline in the United States, Florida has over 8,000 miles of sparkling beaches and waterfront property. This valuable landscape and the region's position between the Atlantic Ocean and the Gulf of Mexico made Florida key in the early expansion of American trade routes, but the state's several capes and dangerous reefs, rocks, and shoals made travel quite perilous to unwary mariners. When commerce and traffic began to grow between ports on the East Coast and along the Gulf of Mexico in the nineteenth century, it became necessary to construct aids to navigation along the state's long and treacherous coast. Lighthouses

were the solution. Constructed in a variety of styles and sizes, Florida's lighthouses were erected on what, at the time, were some of the most desolate regions of the southeastern United States and included lonely offshore islands. Manned and inhabited by vigilant keepers and their families, these towers illuminated the dark seas and provided the beacon that guided lost travelers. Large brick structures watched over St. Augustine, Pensacola, and Ponce de Leon Inlet; iron skeletons towered over Crooked River and Hillsboro Inlet; and screwpile lighthouses stood as sentinels in the waters off the Florida Keys.

Wind Point Lighthouse Barb Wardius, Ken Wardius, 2007 Several lighthouses have called Racine home, but none is more synonymous with the nautical heritage of the Belle City than Wind Point. Always a beehive of activity, the Wind Point Lighthouse is one of the larger lighthouse complexes on the Great Lakes, and a hardworking keeper, two assistants, and their families made their livelihood here. For over 125 years, the tall stately tower has faithfully stood guard, shining its bright beam out over Lake Michigan nightly. Countless mariners relied on the Wind Point Lighthouse, along with a

booming trademark foghorn for safe passage. Today the Wind Point Lighthouse is the most well-known symbol of Racine and is a success story among Great Lakes lights. A devoted friends group, in partnership with the Village of Wind Point, sees that the legacy and history of the Wind Point Lighthouse is preserved for future generations.

Lighthouse Christmas Toni Buzzeo, 2011 Christmas is two days away, but Frances and her little brother Peter, who recently moved with their father to a lighthouse on an isolated island, fear that they will have no treats, no music, and no visit from Santa. Includes facts about the Flying Santa Service. Full color.

Lighthouses of the Mid-Atlantic Coast, 2011-03-11 Interest in the history and preservation of lighthouses has never been stronger. Lighthouses of the Mid-Atlantic Coast details the history of lighthouses and much more, and shows why these structures continue to fascinate us. Discover what life for lighthouse keepers was really like. Learn about the history of U.S. colonial lighthouses and the role lighthouses have played in several wars. Meet the brave, nefarious, and colorful characters who

served as lighthouse keepers and government overseers. Learn about lighthouse technology and architecture and find out how these treasures are being preserved.

Lighthouses of America Tom Beard, 2017-08-01 A spectacular collection of America's most iconic and stunning lighthouses. Through gorgeous photography, this book celebrates these unique and magnificent beacons and their history. The construction of lighthouses began as this new nation's first public-works project in 1789 and established the United States as a maritime world power by making ports safe for navigation. These structures—many still active and serving their original purpose even in the era of global positioning systems—are living museums, yet they often prove difficult to access for visitors due to their necessary remoteness. From Maine's West Quoddy Head on the easternmost headlands to the iconic Cape Hatteras Lighthouse, and the West Coast lighthouses from New Point Loma to New Dungeness and Michigan's Grand Haven Pier Lighthouse, the images here will delight both the armchair traveler and those who have taken the back roads or trekked across sandy beaches to visit these special and often artful buildings. This is a great gift for lovers of lighthouses, boaters,

and those who live or dream of living on the seashore.

To the Lighthouse Steve Murray, 2015-05-25

Sentinel of the Seas Dennis M. Powers, 2007 One of the most rugged expanses in the continental U.S., the coast of northern California and Oregon saw frequent shipping disasters in the 19th century, before Congress ordered the construction of lighthouses on such dangerous promontories as Heceta Head, Cape Mendocino and a seaward-trending pile of rocks called St. George Reef. The brave, resourceful engineer who directed the Tillamook Rock lighthouse construction, Alexander Ballantyne, was later engaged for the St. George job, and it's this story that author Powers (*Treasure Ship*) chronicles here. Without any maps to illustrate it, however, readers will need an atlas to follow the movement of men and ships up and down the coast. Later chapters describing lighthouse life prove less problematic; lighthouse keepers were fascinating, courageous characters (and included a good number of women) who not only kept lights burning and fog horns sounding, but also risked life and limb to rescue people stranded in torrential weather.
