Fine Art Wedding Photography Jose Villa,Jeff Kent,2011-04-05 Many semi-pro and professional wedding photographers are looking to wake up their style, stay current, and stimulate business. And today, that means lifestyle photography, also referred to as fine art wedding photography. Fine art wedding photography isn't just a catchy phrase; it's a modern approach in which design is paramount. Fine art wedding images are more graphic and stylized than traditional wedding photojournalism, as if they were pulled from the pages of a glossy wedding or lifestyle magazine. Acclaimed wedding photographer Jose Villa was a pioneer in fine art wedding photography before it became a trendy buzzword. Here, he shares his secrets for bringing a stylized sense of composition, lighting, posing, and most important, design, to your images, while still keeping them organic and narrative. You'll learn Jose's trademark technique of capturing the more natural moment after a pose, and tips for getting images right in-camera to avoid the need for heavy postproduction. Final chapters show you how to integrate design through the delivered product, whether an album or slideshow, and continue nurturing clients after the wedding by expanding to baby and family portraiture. Packed with real-life examples, solid techniques, and stunning images from one of the wedding industry's brightest stars, this book will both educate and inspire photographers seeking to update their work and satisfy a new generation of brides.

Astrophotography for the Amateur Michael A. Covington,1999-05-03 First published in 1999, this is an expanded and updated edition of the best-selling, standard handbook on astrophotography for amateurs.

Lighting for Photographers Joseph Lavine,Brad Bartholomew,2019-08-13 Lighting is one of the most important aspects of any photograph. The best images create dimension and drama, which goes beyond formulas and lighting recipes. In *Lighting for Photographers: An Introductory Guide to Professional Photography*, commercial photographers and instructors Joe Lavine and Brad Bartholomew offer a unique philosophy of lighting, starting with an understanding of the characteristics of lighting to build great shots. Including interviews from professional photographers and illustrated with over 200 images, this book introduces basic photographic concepts and equipment needs, and takes the reader from the lighting process through to starting a successful career in photography both in the studio and on location. Readers will learn a comprehensive approach to lighting including what light does, composition, experimentation, practical tools and techniques, equipment, metering and histograms, and how to launch and grow their career. With downloadable instructor resources featuring discussion questions and quizzes, this fully updated edition is ideal for introductory level photography and lighting courses as well as the amateur photographer looking to apply the appropriate lighting to realize their conceptual and aesthetic goals.
