Million Dollar Directory Dun and Bradstreet, inc,2005
D&B Million Dollar Directory ,2009

The Conspirators' Hierarchy John Coleman,1997 This work argues for the existence of a committee of 300, an elite body which controls every aspect of politics, religion, commerce and industry, answerable to no one except itself. It maintains that the confusion of social and moral values in the free world has been deliberately created.

Inform ,2005

When the Senate Worked for Us Michael Pertschuk,2017-09-26 Every politically sentient American knows that Congress has been dominated by special interests, and many people do not remember a time when Congress legislated in the public interest. In the 1960s and '70s, however, lobbyists were aggressive but were countered by progressive senators and representatives, as several books have documented. What has remained untold is the major behind-the-scenes contribution of entrepreneurial Congressional staff, who planted the seeds of public interest bills in their bosses' minds and maneuvered to counteract the influence of lobbyists to pass laws in consumer protection, public health, and other policy arenas crying out for effective government regulation. They infuriated Nixon's advisor, John Ehrlichman, who called them bumblebees, a name they wore as a badge of honor. For his insider account, Pertschuk draws on many interviews, as well as his fifteen years serving on the staff of the Senate Commerce Committee that Senator Warren Magnuson chaired and as the committee's Democratic Staff Director. That committee became, in Ralph Nader's words, the Grand Central Station for consumer protection advocates.

NATO's Secret Armies Daniele Ganser,2005-06-21

This fascinating new study shows how the CIA and the British secret service, in collaboration with the military alliance NATO and European military secret services, set up a network of clandestine anti-communist armies in Western Europe after World War II. These secret soldiers were trained on remote islands in the Mediterranean and in unorthodox warfare centres in England and in the United States by the Green Berets and SAS Special Forces. The network was armed with explosives, machine guns and high-tech communication equipment hidden in underground bunkers and secret arms caches in forests and mountain meadows. In some countries the secret army linked up with right-wing terrorist who in a secret war engaged in political manipulation, harassment of left wing parties, massacres, coup d'états and torture. Codenamed 'Gladio' ('the sword'), the Italian secret army was exposed in 1990 by Italian Prime Minister Giulio Andreotti to the Italian Senate, whereupon the press spoke of The best kept, and most damaging, political-military secret since World War II (Observer, 18. November 1990) and observed that The story seems straight from the pages of a political thriller. (The Times, November 19, 1990). Ever since, so-called 'stay-behind' armies of NATO have also been discovered in France, Spain, Portugal, Germany, Belgium, the Netherlands, Luxemburg, Denmark, Norway, Sweden, Finland, Switzerland, Austria, Greece and Turkey. They were internationally coordinated by the Pentagon and NATO and had their last known meeting in the NATO-linked Allied Clandestine Committee (ACC) in Brussels in October 1990.

Connectography Parag Khanna, 2016-04-19 From the visionary bestselling author of *The Second World and How to Run the World* comes a bracing and authoritative guide to a future shaped less by national borders than by global supply chains, a world in which the most connected

powers—and people—will win. Connectivity is the most revolutionary force of the twenty-first century. Mankind is reengineering the planet, investing up to ten trillion dollars per year in transportation, energy, and communications infrastructure linking the world's burgeoning megacities together. This has profound consequences for geopolitics, economics, demographics, the environment, and social identity. Connectivity, not geography, is our destiny. In Connectography, visionary strategist Parag Khanna travels from Ukraine to Iran, Mongolia to North Korea, Pakistan to Nigeria, and across the Arctic Circle and the South China Sea to explain the rapid and unprecedented changes affecting every part of the planet. He shows how militaries are deployed to protect supply chains as much as borders, and how nations are less at war over territory than engaged in tugs-of-war over pipelines, railways, shipping lanes, and Internet cables. The new arms race is to connect to the most markets—a race China is now winning, having launched a wave of infrastructure investments to unite Eurasia around its new Silk Roads. The United States can only regain ground by fusing with its neighbors into a super-continental North American Union of shared resources and prosperity. Connectography offers a unique and hopeful vision for the future. Khanna argues that new energy discoveries and technologies have eliminated the need for resource wars; ambitious transport corridors and power grids are unscrambling Africa's fraught colonial borders; even the Arab world is evolving a more peaceful map as it builds resource and trade routes across its war-torn landscape. At the same time, thriving hubs such as Singapore and Dubai are injecting dynamism into young and heavily populated regions, cyber-communities empower commerce across vast distances, and the world's ballooning financial assets are being wisely invested into

building an inclusive global society. Beneath the chaos of a world that appears to be falling apart is a new foundation of connectivity pulling it together. Praise for Connectography “Incredible . . . With the world rapidly changing and urbanizing, [Khanna’s] proposals might be the best way to confront a radically different future.”—The Washington Post “Clear and coherent . . . a well-researched account of how companies are weaving ever more complicated supply chains that pull the world together even as they squeeze out inefficiencies. . . . [He] has succeeded in demonstrating that the forces of globalization are winning.”—Adrian Woolridge, The Wall Street Journal “Bold . . . With an eye for vivid details, Khanna has . . . produced an engaging geopolitical travelogue.”—Foreign Affairs “For those who fear that the world is becoming too inward-looking, Connectography is a refreshing, optimistic vision.”—The Economist “Connectivity has become a basic human right, and gives everyone on the planet the opportunity to provide for their family and contribute to our shared future. Connectography charts the future of this connected world.”—Marc Andreessen, general partner, Andreessen Horowitz “Khanna’s scholarship and foresight are world-class. A must-read for the next president.”—Chuck Hagel, former U.S. secretary of defense This title has complex layouts that may take longer to download.

Automotive News, 2002

Agency of Fear Edward Jay Epstein, 1990 President Bush has made the war against drugs the number one issue on the contemporary American political agenda. In this revised edition of his classic book, available for the first time in paperback, Edward Jay Epstein argues that the president has adopted the strategy of his forebear, Richard Nixon, in using the drugs war to blame foreigners for the crisis in America’s cities, and to provide a smokescreen for

unrelated political activity designed to bolster executive power. The drugs crackdown has seen an almost hundredfold increase in the federal budget for narco-politics in the fifteen years since *Agency of Fear* was first published, while statistics on drug-running have been massaged. Epstein points out that, despite the massive budgets and public relations brouhaha, drug importation, as measured against wholesale price, has in fact grown.

Fordham Father Raymond A. Schroth S.J., 2009-08-25
Fordham University is the quintessential American-Catholic institution—and one now looked upon as among the best Catholic universities in the country. Its story is also the story of New York, especially the Bronx, and Fordham's commitment to the city during its rise, fall, and rebirth. It's a story of Jesuits, soldiers, alumni who fought in World Wars, chaplains, teachers, and administrators who made bold moves and big mistakes, of presidents who thought small and those who had vision. And of the first women, students and faculty, who helped bring Fordham into the 20th century. Finally it's the story of an institution's attempt to keep its Jesuit and Catholic identity as it strives for leadership in a competitive world. Combining authoritative history and fascinating anecdotes, Schroth offers an engaging account of Fordham's one hundred thirty-seven years—here, updated, revised, and expanded to cover the new presidency of Joseph M. McShane, S.J., and the challenges Fordham faces in the new century.

Creative Strategy in Advertising Bonnie L. Drewniany, A. Jerome Jewler, 2008
Focusing on the idea that good advertising always starts with an understanding of people and an awareness of their needs, this text moves through the creative process step by step. Complementing the instructions are examples of layouts and ad copy, giving

students the tools to create their own advertising.

Product Design and Development Karl T. Ulrich, Steven D. Eppinger, 2003 Treating such contemporary design and development issues as identifying customer needs, design for manufacturing, prototyping, and industrial design, Product Design and Development, 3/e, by Ulrich and Eppinger presents in a clear and detailed way a set of product development techniques aimed at bringing together the marketing, design, and manufacturing functions of the enterprise. The integrative methods in the book facilitate problem solving and decision making among people with different disciplinary perspectives, reflecting the current industry trend to perform product design and development in cross-functional teams.

Computer-Related Risks Peter G. Neumann, 1994-10-18 This sobering description of many computer-related failures throughout our world deflates the hype and hubris of the industry. Peter Neumann analyzes the failure modes, recommends sequences for prevention and ends his unique book with some broadening reflections on the future.

—Ralph Nader, Consumer Advocate This book is much more than a collection of computer mishaps; it is a serious, technically oriented book written by one of the world's leading experts on computer risks. The book summarizes many real events involving computer technologies and the people who depend on those technologies, with widely ranging causes and effects. It considers problems attributable to hardware, software, people, and natural causes. Examples include disasters (such as the Black Hawk helicopter and Iranian Airbus shootdowns, the Exxon Valdez, and various transportation accidents); malicious

hacker attacks; outages of telephone systems and computer networks; financial losses; and many other strange happenstances (squirrels downing power grids, and April Fool's Day pranks). Computer-Related Risks addresses problems involving reliability, safety, security, privacy, and human well-being. It includes analyses of why these cases happened and discussions of what might be done to avoid recurrences of similar events. It is readable by technologists as well as by people merely interested in the uses and limits of technology. It is must reading for anyone with even a remote involvement with computers and communications—which today means almost everyone. Computer-Related Risks: Presents comprehensive coverage of many different types of risks Provides an essential system-oriented perspective Shows how technology can affect your life—whether you like it or not!

The Palgrave Handbook of Deceptive Communication Tony Docan-Morgan,2019-04-29 Deception and truth-telling weave through the fabric of nearly all human interactions and every communication context. The Palgrave Handbook of Deceptive Communication unravels the topic of lying and deception in human communication, offering an interdisciplinary and comprehensive examination of the field, presenting original research, and offering direction for future investigation and application. Highly prominent and emerging deception scholars from around the world investigate the myriad forms of deceptive behavior, cross-cultural perspectives on deceit, moral dimensions of

deceptive communication, theoretical approaches to the study of deception, and strategies for detecting and deterring deceit. Truth-telling, lies, and the many grey areas in-between are explored in the contexts of identity formation, interpersonal relationships, groups and organizations, social and mass media, marketing, advertising, law enforcement interrogations, court, politics, and propaganda. This handbook is designed for advanced undergraduate and graduate students, academics, researchers, practitioners, and anyone interested in the pervasive nature of truth, deception, and ethics in the modern world.
