Terri O's Easy Embellishing Suzanne Chase, Terri O, 2006 Two nationally acclaimed authors present the newest, hottest craft: creative embellishing with tape. It's enough to make anyone get crafty! It's simple, fashionable, and fun: nothing beats embellishing when you want to make a definite style statement. TV personalities Terri O (the Craft Queen™) and Suzanne Chase, co-owner of Treasure Tape™, offer up a host of fabulous ideas for personalizing items quickly and easily. Their trick? Using double-sided tape, which takes no time at all to do--or undo, when you're ready for a change. And the techniques are amazingly diverse,

including paper mosaics, layering, fabric collage, trimming, ribbon designs, and thread effects. Anyone would go wild over the 66 individual projects--shown in more than 200 photos--for beautifying handbags and their contents; home décor clothing, shoes, and accessories; kids' stuff; keepsakes and scrapbooks; and even office equipment. And all the information on techniques and supplies you need is right here. Suzanne Chase is co-owner of Treasure Tape™, and is the author of Instant Paper Treasures and a DVD on home decorating entitled Embellish Your World. She has appeared on HGTV, DIY, and QVC to demonstrate the world of instant embellishing. She has written articles for popular consumer craft magazines including Creating Keepsakes, Home Arts, Memories Community, and Beyond Scrapbooking. Terri O, originally crowned the Craft Queen” some 15 years ago, is the reigning national spokesperson for the Craft & Hobby Association. She regularly appears on morning shows across the country as well as shows on HGTV, The Discovery Channel, and QVC. She is currently the host of her own show, On the Go with Terri O, which specializes in projects for busy lifestyles.

Bioinformatics Biocomputing and Perl Michael Moorhouse,Paul Barry,2005-09-27 Bioinformatics, Biocomputing and Perl presents a modern introduction to bioinformatics computing skills and practice. Structuring its presentation around four main areas of study, this book covers the skills vital to the day-to-day activities of today's bioinformatician. Each chapter contains a series of maxims designed to highlight key points and there are exercises to supplement and cement the introduced material. Working with Perl presents an extended tutorial introduction to programming through Perl, the premier programming technology of the bioinformatics community. Even though no previous programming experience is assumed, completing the tutorial equips the reader with the ability to produce powerful custom programs with ease. Working with Data applies the programming skills acquired to processing a variety of bioinformatics data. In addition to advice on working with important data stores such as the Protein DataBank, SWISS-

PROT, EMBL and the GenBank, considerable discussion is devoted to using bioinformatics data to populate relational database systems. The popular MySQL database is used in all examples. Working with the Web presents a discussion of the Web-based technologies that allow the bioinformatics researcher to publish both data and applications on the Internet. Working with Applications shifts gear from creating custom programs to using them. The tools described include Clustal-W, EMBOSS, STRIDE, BLAST and Xmgrace. An introduction to the important Bioperl Project concludes this chapter and rounds off the book.

War Beneath the Sea Peter Padfield,2008-05-02 Praise for
War Beneath the Sea I am truly filled with awe and admiration...fascinating and a great contribution to the entire lore of submarines.... I wish I had written the book. ?Capt. Edward L. Beach, USN (Ret.) author of Run Silent, Run Deep Peter Padfield is the best British naval historian of his generation now working. [His] book...will now become the standard work on the subject. ?Daily Telegraph (London) Peter Padfield has produced by far the best and most complete critical history of the submarine operations of all the combatants in the Second World War, at the same time providing vivid narrative accounts of particular actions and events.

?'Lloyd's List (London) An excellent account of submarine warfare in 1939?45... [it] recreates the tribulations and horrors of that especially brutal form of warfare within a sturdily analytical and often critical framework. ?The Economist [A] marvelously complete and detailed study of World War II submarine warfare...an interesting, serious, and timely book. ?Houston Chronicle A brilliant submarine warfare study. ?Military Review
