The Shanghai Connection – Science fiction space opera adventure inspired by Mass Effect Alexei Cyren,2014-03-18 Ariel Blake is a rookie Guardian cop who's trying to get revenge against the Black Phoenix terrorists who killed her mother. She's willing to do almost anything it takes and is worried that she'll cross the line. She finds herself in the middle of a possible gang war but a beautiful information broker hints that the Jade Dragons might know a way to find her elusive prey. She must discover the link between the gangs and her mom's killers. Her hunt will lead to a post-apocalyptic virtual world to find the answers though the stakes are high: someone will die in less than 48 hours unless she succeeds. Drug kingpin, kung fu master and Jade Dragon lieutenant Wen Chang, however stands in Ariel's way. He is a man who has never been defeated in combat and he wields fearsome powers that she can't even fathom. If he gets what he wants, the System Alliance worlds could be plunged into chaos. The Shanghai Connection is part of an action packed science fiction novel space opera that is inspired by Mass Effect, Star Wars, Judge Dredd, Die Hard, Continuum and Blade Runner. Electronic Literature Scott Rettberg,2018-12-14 Electronic Literature considers new forms and genres of writing that exploit the capabilities of computers and networks – literature that would not be possible without the contemporary digital context. In this book, Rettberg places the most significant genres of electronic literature in historical, technological, and cultural contexts. These include combinatory poetics, hypertext fiction, interactive fiction (and other game-based digital literary work),

kinetic and interactive poetry, and networked writing based on our collective experience of the Internet. He argues that electronic literature demands to be read both through the lens of experimental literary practices dating back to the early twentieth century and through the specificities of the technology and software used to produce the work. Considering electronic literature as a subject in totality, this book provides a vital introduction to a dynamic field that both reacts to avant-garde literary and art traditions and generates new forms of narrative and poetic work particular to the twenty-first century. It is essential reading for students and researchers in disciplines including literary studies, media and communications, art, and creative writing.

DIR 8.5 STUDIO, ROBBINS,2001-08-20 There are things that Flash does badly or not at all—namely, sound and 3D. These two also happen to be the hottest areas for web development, as more and more segments of the entertainment industry realise that for sound and 3D, and a heavyweight project, Director is the tool of choice. Director has long been established as the premier multimedia authoring tool. Version 8 brought closer web focus. But Director 8.0 did not include Flash asset management, nor was it capable of working in 3D. With the upgrade to 8.5, Director has become an important Flash-compatible 3D development tool. This integration of two of Macromedia's

most exciting graphics tools, as well as the inclusion of a sophisticated 3D modelling environment, mean that Director 8.5 is not a half-version so much as a rapid response to a burgeoning and demanding market. Following the multi-author single-voice Studio format, this book brings together experts in the many different facets of Director lore and technique, programming and modelling. What you'll learnWho this book is for Multimedia designers interested in working with the net and/or multimedia computer graphics Flash 5 users who need to deepen and perfect their Director skills, required for working with 3D and more sophisticated interactivity than they can achieve with Flash
