Spoiled Climate Andreas Ruby, 2004 Architectural projects which expose the hidden contradictions of our everyday reality in a lively yet challenging way. François Roche (born in 1961 in Paris) and his partner Stephanie Lavaux (born in 1966 on the Reunion Island) are radical advocates of an architecture which is to be perceived as a tool for increasing critical awareness, as a discipline which provokes thought and inspires the imagination. Their buildings and projects, which include the new art museum in Bangkok and the Glacier Museum in Switzerland, both of which would have been unthinkable without the latest IT methods of design, strive towards designs which are unique and unmistakable in both function and appearance. François Roche is guest professor at the London Bartlett School and the Technical University of Vienna, and has made a name for himself internationally as a pioneer of a new architecture through his lecture activities and his participation in many exhibitions. This monograph is the first complete overview of his work and will be published to coincide with the exhibition No Standard Architecture which opens in November at the Centre Pompidou in Paris, where R & Sie... architects are one of the 12 invited architectural firms.
