*Geology and Landscapes of the Eastern Pyrenees* Marc Calvet,Magali Delmas,Yanni Gunnell,Bernard Laumonier,2022-06-04 This book provides a synthesis of the physiography and geodynamics of the entire Pyrenean orogen and its foreland basins, providing the big picture (structure of the orogen and chronology of its formation, overview of its post-orogenic evolution, and Quaternary and recent landscape history). One part of the book proposes a 6–7 day itinerary across the eastern and east-central Pyrenees, two areas that currently provide the richest, best-documented, and most carefully curated database on the post-orogenic evolution of the mountain belt. The book deals with three complementary topics: (i) geodynamics, i.e. the long-term post-orogenic evolution of the Pyrenees since the declining stages of tectonic collision ca. 30 million years ago, and within the wider reference frame of Iberia, the Western Mediterranean, and the Atlantic margin; (ii) geomorphological processes and landforms that have conspired to shape the eastern part of the French and Spanish Pyrenees in response to base-level and climate-related changes over than same time period; (iii) geoheritage, i.e. educational vignettes of the flagship landscape units and typical geological sections of the study area. Written as a field guide, it is designed to help readers to construct discovery-based itineraries through the region (with options and variants depending on time and physical ability), allowing them to appreciate the key landscape and geoheritage features over the course of 1 week, with potential for much more. This GeoGuide is primarily aimed at confirmed geoscientists from most disciplines in Earth science, at postgraduate students engaged in field studies, and at curiosity-driven, educated amateurs keen to enhance their understanding of spectacular or enigmatic features encountered on their travels.

*God's Lions - Realm of Evil* John Lyman,2014-02-20 Driven into hiding in the French Pyrenees by the advancing forces of a new, one world government, Cardinal Leopold Amodeo receives a mysterious radio message from an unknown source in Northern Europe inviting him to a secret meeting. Fearful of a trap, and with time running out as a web of evil spreads around the globe, he must decide if he should leave the safety of his friends in an ancient Cathar sanctuary to travel alone into the far reaches of the north to meet with a man who may hold the key to their salvation. In this, the fourth book in the God's Lions series, the non-stop action moves across the European continent as the cardinal and his dedicated team of scientists, code-breakers, archaeologists, and intelligence specialists join with others to face their greatest challenge yet in a climactic confrontation with an evil entity that has vowed to wipe them from the face of the earth.

**Harbors and High Seas** Dean King,John B. Hattendorf,2012-03-20 This companion for fans of the Napoleonic sea sagas offers maps of the novels’ streets, seas, and coasts, and much more. The tall-masted sailing ships of the early nineteenth century were the technological miracles of their day, allowing their crews to traverse the seas with greater speed than had ever been possible before. Novelist Patrick O’Brian captured the thrill of that era with his characters Jack Aubrey and Stephen Maturin, who visited exotic locales in the service of the Royal Navy. From frigid Dieppe to balmy Batavia, they strolled the ports of the world as casually as most do the streets of their hometown. Packed with maps and illustrations from the greatest age of sail, this volume shows not just where Aubrey and Maturin went, but how they got there. An incomparable reference for devotees of O’Brian’s novels and anyone who has dreamed of climbing aboard a warship, Harbors and High Seas is a captivating portrait of life on the sea, when nothing stood between man and ocean but grit, daring, and a few creaking planks of wood.
