**A Race for Real Sailors** Keith McLaren, 2021-03-26 In the summer of 1920, the public following the latest America's Cup series were frustrated to find that every time the wind got up, the organizers called off the race. There was muttering in the taverns of Halifax and Lunenburg: why not show these fancy yachtsmen what real sailors can do? A Nova Scotia newspaper donated a trophy and put out a challenge to their rivals in New England, inviting them to meet the Maritimes' best in a "race for real sailors." *A Race for Real Sailors* is a vibrant history of the Fishermen's Cup series, which dominated sporting

headlines between the two world wars. The salt spray practically blows off the page as the author's arresting style captures the drama of each race and the personalities of the ships that contested them: the Delawana and the Esperanto, the Columbia and the Gertrude L. Thebaud, and dominating them all the Bluenose, the big brute from Lunenburg whose image shines on the Canadian dime to this day. Vying for the spotlight are the boats' larger-than-life skippers, among them Marty Welch, the hard-charging American who first took the cup; Ben Pine, the Gloucester scrap dealer whose passion kept the races afloat when they seemed destined to fade away; and the irascible, impossible Angus Walters, master of the Bluenose, who repeatedly broke American hearts but whose own heart was broken by Canada's refusal to come to the rescue of his beloved vessel. This stirring and poignant tale is illustrated with 51 historical photographs and five maps, and rounded out by a glossary of sailing terms and an appendix of the ever-changing race rules. This is a story that will keep even confirmed landlubbers pegged to their seats, a tale of iron men and wooden ships whose time will never come again.

### **Introduction to English Semantics and Pragmatics** Patrick

Griffiths, 2006-05-29 An introduction to the linguistic study of meaning, this book outlines the meaning potential (semantics) of English and how language knowledge is put to use (pragmatics). As well as gaining a systematic overview of meaning in English, readers can learn how to argue for analyses. Among the significant concepts introduced are denotation, sense relations, event types, explicature, implicature, presupposition, metaphor, reference, speech acts and (at an elementary level) Generalised Quantifier Theory. Sense relations--such as antonymy and hyponymy--are presented as summarising patterns of entailment. The sense of a word is seen as the contributions it

makes to the entailments carried by sentences.

**Islamic Mystical Poetry** Mahmood Jamal, 2009-10-29 Written from the ninth to the twentieth century, these poems represent the peak of Islamic Mystical

writing, from Rabia Basri to Mian Mohammad Baksh. Reflecting both private devotional love and the attempt to attain union with God and become absorbed into the Divine, many poems in this edition are imbued with the symbols and metaphors that develop many of the central ideas of Sufism: the Lover, the Beloved, the Wine, and the Tavern; while others are more personal and echo the poet's battle to leave earthly love behind. These translations capture the passion of the original poetry and are accompanied by an introduction on Sufism and the common themes apparent in the works. This edition also includes suggested further reading.

The End of Banking Jonathan McMillan, 2014 In this thought-provoking book, Jonathan McMillan dissects banking to reveal its inner workings. He cuts through the complexity of modern finance and explains how banking almost crashed our financial system. Banking is broken, and McMillan reveals why we can no longer fix it. The digital revolution turns out to be the game changer that calls for the end of banking. But McMillan refrains from merely pointing out flaws. Building on economic research and a rigorous analytical approach, he goes on to provide an innovative blueprint for a modern financial system. *The End of Banking* transforms our understanding of the financial system. It identifies the root cause of today's problems with banking and presents a solution that stands out against existing reform proposals.

**The Languages of Paradise** Maurice Olender, 1992 Michel Foucault observed that the birth of philology attracted far less notice in the Western mind than did the birth of biology or political economy. In this penetrating

exploration of the origin of the discipline, Maurice Olender shows that philology left an indelible mark on Western visions of history, and contributed directly to some of the most horrifying ideologies of the twentieth century. A riveting book about a difficult but important subject. Olender plunges into the scientific roots of modern racial myths with verve, wit, and remarkable erudition, producing both a dense, powerful monograph in the history of philology and a fascinating essay on the roots of twentieth-century errors and horrors. -Anthony Grafton, Princeton University The Languages of Paradise is heavenly to read. What languages did the first humans speak? Maurice Olender traces the answers of major scholars to that question from the eighteenth to the twentieth century, showing how rival claims for Hebrew and Sanskrit connect with fundamental ideas about race and culture. Rarely have the intricacies of comparative philology been made so accessible to the common reader as in Maurice Olender's fluid prose, given sparkling translation by Arthur Goldhammer. -Natalie Zemon Davis, Princeton University
