*100 Math Puzzles for Kids Aged 12-14 - A Challenging And Fun Logic Game Brain
Trainer*,2020-06-10              These 200 math logic
puzzles will engage and stimulate your child's problem solving ability through addition, subtraction
and multiplication of healthy foods.           In early
childhood education it has been demonstrated that a correlation exists between the level of a child's
mathematical ability and their future academic success. The reverse of this relationship has also
been observed, where children who are behind the mathematical skills of their peers, continue to fall
behind in future studies (Pelkowski, et al. 2019). Furthermore, it is well established in literature that
the more maths learning opportunities a child is exposed to, the more growth they will experience in
math knowledge (Piasta, et al. 2015). This book is designed to provide a math learning opportunity
to foster the curiosity and confidence of children aged 12-14 and set them well on the path to
academic success.
