The Last Amateurs John Feinstein,2008-11-16 America's favorite sportswriter takes readers on a thrilling and unforgettable journey into the world of college basketball in this national bestseller. Like millions who love college basketball, John Feinstein was first drawn to the game because of its intensity, speed and intelligence. Like many others, he felt that the vast sums of money involved in NCAA basketball had turned the sport into a division of the NBA, rather than the beloved amateur sport it once was. He went in search of college basketball played with the passion and integrity it once inspired, and found the Patriot League. As one of the NCAA's smallest leagues, none of these teams leaves college early to join the NBA and none of these coaches gets national recognition or endorsement contracts. The young men on these teams are playing for the love of the sport, of competition and of their schools. John Feinstein spent a season with these players, uncovering the drama of their daily lives and the passions that drive them to commit hundreds of hours to basketball even when there is no chance of a professional future. He offers a look at American sport at its purest.

A March to Madness John Feinstein,2014-05-27 It's the book in which America's favorite sportswriter returns to the arena of his most successful bestseller, *A Season on the Brink*. It's the book that takes us inside the intensely competitive Atlantic Coast Conference & paints a portrait of how college basketball is coached & played at the highest level. It's the book that takes us onto the courts, into the locker rooms, & inside the high-pressure world of the talented coaches who have helped make the ACC's nine colleges - Duke, North Carolina, North Carolina State, Clemson, Georgia Tech, Virginia, Maryland, Wake Forest, & Florida State - world-renowned for their championship basketball teams. The author's afterword to this edition will recap the ACC's current season & preview the 1998-99 rivalries.

Bracketology Joe Lunardi,David Smale,Mark Few,2021-03-02 Lunardi delves into the early days of Bracketology, details its growth, and dispels the myths of the process The NCAA Tournament has become one of the most popular sports events in the country, consuming fans for weeks with the run to the Final Four and ultimately the crowning of the champion of college hoops.? Each March, millions of Americans fill out their bracket in the hopes of correctly predicting the future. Yet, there is no true Madness without the oft-debated question about what teams should be seeded where—from the Power-5 Blue Blood with some early season stumbles on their resume to the mid-major that rampaged through their less competitive conference season—and the inventor of Bracketology himself, Joe Lunardi, now reveals the mystery and science behind the legend. While going in depth on his ever-evolving predictive formula, Lunardi compares great teams from different eras with intriguing results, talks to the biggest names in college basketball about their perception of Bracketology (both good and bad), and looks ahead to the future of the sport and how Bracketology will help shape the conversation. This fascinating book is a must-read for college hoops fans and anyone who has aspired to win their yearly office pool.

Sports-Related Concussions in Youth National Research Council,Institute of Medicine,Board on Children, Youth, and Families,Committee on Sports-Related Concussions in Youth,2014-02-04 In the past decade, few subjects at the intersection of medicine and sports have generated as much public interest as sports-related concussions - especially among youth. Despite growing awareness of sports-related concussions and campaigns to educate athletes, coaches, physicians, and parents of young athletes about concussion recognition and management, confusion and controversy persist in many areas. Currently, diagnosis is based primarily on the symptoms reported by the individual rather than on objective diagnostic markers, and there is little empirical evidence for the optimal degree and duration of physical rest needed to promote recovery or the best timing and approach for returning to full physical activity. *Sports-Related Concussions in Youth: Improving the Science, Changing the Culture* reviews the science of sports-related concussions in youth from elementary school through young adulthood, as well as in military personnel and their dependents. This report recommends actions that can be taken by a range of audiences - including research funding agencies, legislatures, state and school superintendents and athletic directors, military organizations, and equipment manufacturers, as well as youth who participate in sports and their parents - to improve what is known about concussions and to reduce their occurrence. *Sports-Related Concussions in Youth* finds that while some studies provide useful information, much remains unknown about the extent of concussions in youth; how to diagnose, manage, and prevent concussions; and the short- and long-term consequences of concussions as well as repetitive head impacts that do not result in concussion symptoms. The culture of sports negatively influences athletes' self-reporting of concussion symptoms and their adherence to return-to-play guidance. Athletes, their teammates, and, in some cases, coaches and parents may not fully appreciate the health threats posed by concussions. Similarly, military recruits are immersed in a culture that includes devotion to duty and service before self, and the critical nature of concussions may often go unheeded. According to *Sports-Related Concussions in Youth*, if the youth sports community can adopt the belief that concussions are serious injuries and emphasize care for players with concussions until they are fully recovered, then the culture in which these athletes perform and compete will become much safer. Improving understanding of the extent, causes, effects, and prevention of sports-related concussions is vitally important for the health and well-being of youth athletes. The findings and recommendations in this report set a direction for research to reach this goal.

Reach for the Summit Pat Summitt,1999-04-13 I'm someone who will push you beyond all reasonable limits. Someone who will ask you not to just fulfill your potential but to exceed it. Someone who will expect more from you than you may believe you are capable of. So if you aren't ready to go to work, shut this book. --Pat Summitt Pat Summitt, head coach of the University of Tennessee Lady Vols, was a phenomenon in women's basketball. Her ferociously competitive teams won the NCAA championship in 1996 and 1997 and made her the winningest coach in NCAA Division 1 women's history. Summitt wrote the first motivational book by a high-achieving female coach. In *Reach for the Summit*, she presented her formula for success, which she called the Definite Dozen System. In each of the

book's twelve chapters, Summitt talked about one of the system's principles--such as responsibility, discipline, and loyalty--and showed how to apply it to your own situation. Pat Summitt used her own remarkable story as a vehicle for explaining how anyone can transform herself through ambition. Through many amusing anecdotes and a few very painful memories, she revealed her mistakes and triumphs as a beginning basketball player, as an Olympic athlete, as a Division 1 coach, and as a mother. Although Summitt was not born to the easy life--she was born into a hard-working farm family in a remote corner of Tennessee--she became one of the most successful and highest-paid coaches in the country. She candidly talked about how she turned her losses into wins and then showed how you can do the same. Wonderfully entertaining and brilliantly instructive, *Reach for the Summit* discloses the winning secret to building a principled system and making it to the top at whatever you do. Pat Summitt's story will motivate you to achieve in sports, business, and the most important game of all--life.

Now, in their own words, the men and women who made ESPN great reveal the secrets behind its success-as well as the many scandals, rivalries, off-screen battles and triumphs that have accompanied that ascent. Black Market Merl Code,2022-03-01 From a former college basketball player and Executive at Nike, a riveting (Sports Illustrated) insider's account into the business of college basketball exposes the corrupt and racist systems that exploit young athletes and offers a new way forward For Merl Code, basketball was life. In college he played point guard for Clemson before turning pro. Later, when he pivoted to marketing, he found himself thrust into a startling world of profit-driven college basketball programs. He realized that the NCAA's amateurism rules could be used to exploit young athletes, and athletes of color in particular. Now, for the first time, Code will share his side of the explosive story of college basketball's dark reality—a system that begins with young talent in AAU programs and culminates at the highest levels of the NBA. Propulsive, urgent, and eye-opening, *Black Market* exposes the truth to offer a more just way forward for both colleges and athletes.

The New Plantation B. Hawkins,2010-02-15 *The New Plantation* examines the controversial relationship between predominantly White NCAA Division I Institutions (PWI s) and black athletes, utilizing an internal colonial model. It provides a much-needed in-depth analysis to fully comprehend the magnitude of the forces at work that impact black athletes experiences at PWI s. Hawkins provides a conceptual framework for understanding the structural arrangements of PWI s and how they present challenges to Black athletes academic success; yet, challenges some have overcome and gone on to successful careers, while many have succumbed to these prevailing structural arrangements and have not benefited accordingly. The work is a call for academic reform, collective accountability from the communities that bear the burden of nurturing this athletic talent and the institutions that benefit from it, and collective consciousness to the Black male athletes that make of the largest percentage of athletes who generate the most revenue for the NCAA and its member institutions. Its hope is to promote a balanced exchange in the athletic services rendered and the educational services received.
