How the World Changed Social Media Daniel Miller, Elisabetta Costa, Nell Haynes, Tom McDonald, Razvan Nicolescu, Jolynna Sinanan, Juliano Spyer, Shriram Venkatraman, Xinyuan Wang, 2016-02-29 How the World Changed Social Media is the first book in Why We Post, a book series that investigates the findings of anthropologists who each spent 15 months living in communities across the world. This book offers a comparative analysis summarising the results of the research and explores the impact of social media on politics and gender, education and commerce. What is the result of the increased emphasis on visual communication? Are we becoming more individual or more social? Why is public social media so conservative? Why does equality online fail to shift inequality offline? How did memes become the moral police of the internet? Supported by an introduction to the project's academic framework and theoretical terms that help to account for the findings, the book argues that the only way to appreciate and understand something as intimate and ubiquitous as social media is to be immersed in the lives of the people who post. Only then can we discover how people all around the world have already transformed social media in such unexpected ways and assess the consequences

Before I Die Candy Chang, 2013-11-05 After losing someone she loved, artist Candy Chang painted the side of an abandoned house in her New Orleans neighborhood with chalkboard paint and stenciled the sentence, Before I die I want to _____. Within a day of the wall's completion, it was covered in colorful chalk dreams as neighbors stopped and reflected on their lives. Since then, more than four hundred Before I Die walls have been created by people all over the world. This beautiful hardcover book is an inspiring celebration of these walls and the stories behind them. Filled with hope, fear, humor, and heartbreak, Before I Die presents an intimate portrait of the dreams within our communities and a chance to ponder life's ultimate question.

Experimenting with Ethnography Andrea Ballester, Brit Ross Winthereik, 2021-05-28 Experimenting with Ethnography collects twenty-one essays that open new paths for doing ethnographic analysis. The contributors—who come from a variety of intellectual and methodological traditions—enliven analysis by refusing to take it as an abstract, disembodied exercise. Rather, they frame it as a concrete mode of action and a creative practice. Encompassing topics ranging from language and the body to technology and modes of collaboration, the essays invite readers to focus on the imaginative work that needs to be performed prior to completing an argument. Whether exchanging objects, showing how to use drawn images as a way to analyze data, or working with smartphones, sound recordings, and social media as analytic devices, the contributors explore the deliberate processes for pursuing experimental thinking through ethnography. Practical and broad in theoretical scope, Experimenting with Ethnography is an indispensable companion for all ethnographers. Contributors. The Internet Literacy Handbook Betsy Burdick, Chris Coakley, Janice Patricia Richardson, 2006-01-01 Over the past decade, Internet technology, now merging into that of mobile technology, has transformed the multiple facets of life in society across the world, changing work and leisure patterns, and placing greater demands on us as active, democratic citizens. The Internet literacy handbook, intended for parents, teachers and young people throughout Europe, is a guide to exploiting to the fullest this complex network of information and communication. The handbook is comprised of 21 fact sheets, each covering a particular topic on Internet use, from searching for information to setting up blogs through to e-shopping and e-citizenship. These fact sheets offer teachers and parents sufficient technical know-how to allow them to share young people's and children's voyages through communication technology. They highlight ethical and safety considerations, give insight into added value in education, provide ideas for constructive activities in class or at home, share best practice in Internet use, and provide a wealth of definitions and links to sites that give practical examples and further in-depth information.

Smartphone Communication Francisco Yus, 2021-09-05 This book offers a unique model for understanding the cognitive underpinnings, interactions and discursive effects of our evolving use of smartphones in everyday app-mediated communication, from text messages and GIFs to images, video and social media apps. Adopting a cyberpragmatics framework, grounded in cognitive pragmatics and relevance theory, it gives attention to how both the particular interfaces of different apps and users' personal attributes influence the contexts and uses of smartphone communication. The communication of emotions - in addition to primarily linguistic content - is foregrounded as an essential element of the kinds of ever-present paralinguistic and phatic communication that characterises our exchange of memes, GIFs, likes, and image- and video-based content. Insights from related disciplines such as media studies and sociology are incorporated as the author unpacks the timeliest questions of our digitally mediated age. Aimed primarily at scholars and graduate students of communication, linguistics, pragmatics, media studies, and sociology of mass media, Smartphone Communication traffics in topics that will likewise engage upper-level undergraduate students.

Executing Practices Helen Pritchard, Eric Snodgrass, Magda Tyżlik-Carver, 2018-12 From the contestable politics of emoji modifier mechanisms and micro-temporalities of computational processes to genomic exploitation and the curating of digital content, Executing Practices highlights a range of ways in which execution emerges and how it participates within networked forms of liveliness.

Innovation and ICT in Education José Gómez Galán, 2022-09-01 The adequate integration of information and communication technologies (ICT) in educational and training processes is one of the biggest current challenges in education. The classroom of the present is very different from just a few decades ago, new technological tools are completely transforming its characteristics and activities. This internationally authored book offers a timely, effective and practical vision of this new educational scenario. The book takes a multidisciplinary approach in looking at the problems and possible solutions that are faced by the educational professional of the 21st century when, by necessity or obligation, they face the use of ICT in their daily tasks. Divided into two parts, one theoretical and another practical, this book offers the highlights of the most important lines of research that are being developed today in educational technology, and importantly presents the innovations which have had the most impact over recent years. From the profound transformations in the physical classroom to everything that involves new virtual scenarios, where online teaching requires innovative strategies and training processes, this book describes the diverse scenarios that ICT has generated and will continue to generate in the field of education. It presents a new and a very different type of education that can be adapted to the needs of the citizen of the digital society.

Social Media in Iran David M. Faris, Babak Rahimi, 2015-11-20 First comprehensive account of how the Internet has impacted life in Iran. Social Media in Iran is the first book to tell the complex story of how and why the Iranian people—including women, homosexuals, dissidents, artists, and even state actors—use social media technology, and in doing so create a contentious environment wherein new identities and realities are constructed. Drawing together emerging and established scholars in communication, culture, and media studies, this volume considers the role of social media in Iranian society, particularly the time during and after the controversial 2009 presidential election, a watershed moment in the postrevolutionary history of Iran. While regional specialists may find studies on specific themes useful, the aim of this volume is to provide broad narratives of actor-based conceptions of media technology, an approach that focuses on the experiential and social networking processes of digital practices in the information era extended beyond cultural specificities. Students and scholars of regional and media studies will find this volume rich with empirical and theoretical insights on the subject of how technologies shape political and everyday life. David M. Faris is Chair of the Department of Political Science and Public Administration at Roosevelt University and the author of Dissent and Revolution in a Digital Age: Social Media, Blogging and Activism in Egypt. Babak Rahimi is Associate Professor of Communication, Culture, and Religion at the University of California, San Diego. He is the author of Theater State and the Formation of Early Modern Public Sphere in Iran: Studies on Safavid Muharram Rituals, 1590–1641 CE.

Data Algorithms Mahmoud Parsian, 2015-07-13 If you are ready to dive into the MapReduce framework for processing large datasets, this practical book takes you step by step through the algorithms and tools you need to build distributed MapReduce applications with Apache Hadoop or Apache Spark. Each chapter provides a recipe for solving a massive computational problem, such as building a recommendation system. You'll learn how to implement the appropriate MapReduce solution with code that you can use in your projects. Dr. Mahmoud Parsian covers basic design patterns, optimization techniques, and data mining and machine learning solutions for problems in bioinformatics, genomics, statistics, and social network analysis. This book also includes an overview of MapReduce, Hadoop, and Spark. Topics include: Market basket analysis for a large set of transactions Data mining algorithms (K-means, KNN, and Naive Bayes) Using huge genomic data to sequence DNA and RNA Naive Bayes theorem and Markov chains for data and market prediction Recommendation algorithms and pairwise document similarity Linear regression, Cox regression, and Pearson correlation Allelic frequency and mining DNA Social network analysis (recommendation systems, counting triangles, sentiment analysis)

The Story of the Selma Voting Rights Marches in Photographs David Aretha, 2014-01-01 The Civil Rights Act of 1964 was a momentous victory for civil rights activists, but one major obstacle remained in the path toward equal rights for African Americans: the right to vote. In the South, segregationists prevented African Americans from voting. Civil rights leaders believed it was time for strong action and chose Selma, Alabama, as the rallying point. There, the marches and protests captured the nation's attention. Through gripping primary source photographs, author David Aretha explores this important time in American history.

The Emoji Revolution Philip Seargeant, 2019-07-11 Explores the evolution of emoji, how people use them, and what they tell us about the technology-enhanced state of modern society.

High Growth Handbook Elad Gil,2018-07-17 High Growth Handbook is the playbook for growing your startup into a global brand. Global technology executive, serial entrepreneur, and angel investor Elad Gil has worked with high-growth tech companies including Airbnb, Twitter, Google, Stripe, and Square as they’ve grown from small companies into global enterprises. Across all of these breakout companies, Gil has identified a set of common patterns and created an accessible playbook for scaling high-growth startups, which he has now codified in High Growth Handbook. In this definitive guide, Gil covers key topics, including: · The role of the CEO · Managing a board · Recruiting and overseeing an executive team · Mergers and acquisitions · Initial public offerings · Late-stage funding. Informed by interviews with some of the biggest names in Silicon Valley, including Reid Hoffman (LinkedIn), Marc Andreessen (Andreessen Horowitz), and Aaron Levie (Box), High Growth Handbook presents crystal-clear guidance for navigating the most complex challenges that confront leaders and operators in high-growth startups.
