You Can't Make This Stuff Up Lee Gutkind,2012-08-14 From the godfather behind creative nonfiction (Vanity Fair) comes this indispensable how-to for nonfiction writers of all levels and genres, reminiscent of Stephen King's fiction handbook *On Writing* (Kirkus). Whether you're writing a rags-to-riches tell-all memoir or literary journalism, telling true stories well is hard work. In *You Can't Make This Stuff Up*, Lee Gutkind, the go-to expert for all things creative nonfiction, offers his unvarnished wisdom to help you craft the best writing possible. Frank, to-the-point, and always entertaining, Gutkind describes and illustrates every aspect of the genre. Invaluable tools and exercises illuminate key steps, from defining a concept and establishing a writing process to the final product. Offering new ways of understanding the genre, this practical guidebook will help you thoroughly expand and stylize your work.

**Dutch Messengers** Cornelis Dirk Andriessse,2008 In this pioneering work, based upon interviews with many of the surviving protagonists, Cornelis ('Cees') Andriessse tells the story of the role that Dutch publishing houses played in the rise of English language commercial science publishing after the Second World War, that was preceded by the decline of science publishing in German. Using the existing literature as well as many privately held archival sources, the author follows the fortunes of the leading publishers, Martinus Nijhoff, Elsevier and North Holland while also briefly discussing smaller houses like Dr. W. Junk and Reidel. The book contains lively portraits of the main characters involved and will no doubt stimulate further research and discussion of the role of publishing in the history of science. The authorsa (TM) main thesis that successful publishing requires a strong, fruitful partnership between an academic publisher and an academic editor, will no doubt convince most readers. This is a great book on the most productive friendships and partnerships in the history of science publishing.

**A Language Older Than Words** Derrick Jensen,2004-03-01 At once a beautifully poetic memoir and an exploration of the various ways we live in the world, *A Language Older Than Words* explains violence as a pathology that touches every aspect of our lives and indeed affects all aspects of life on Earth. This chronicle of a young man's drive to transcend domestic abuse offers a challenging look at our worldwide sense of community and how we can make things better.

**Our Appalachia** Laurel Shackelford,Bill Weinberg,2014-10-17 Many books have been written about Appalachia, but few have voiced its concerns with the warmth and directness of this one. From hundreds of interviews gathered by the Appalachian Oral History Project, editors Laurel Shackelford and Bill Weinberg have woven a rich verbal tapestry that portrays the people and the region in all their variety. The words on the page have the ring of truth, for these are the people of Appalachia speaking for themselves. Here they recollect an earlier time of isolation but of independence and neighborliness. For a nearer time they tell of the great changes that took place in Appalachia with the growth of coal mining and railroads and the disruption of old ways. Persisting through the years and sounding clearly in the interviews are the dignity of the Appalachian people and their close ties with the land, despite the exploitation and change they have endured. When first published, *Our Appalachia* was widely praised. This new edition again makes available an authentic source of social history for all those with an interest in the region.

**Well-being, Sustainability and Social Development** Harry Lintsen,Frank Veraart,Jan-Pieter Smits,John Grin,2018-06-14 This open access book examines more than two centuries of societal development using novel historical and statistical approaches. It applies the well-being monitor developed by Statistics Netherlands that has been endorsed by a significant part of the international, statistical community. It features The Netherlands as a case study, which is an especially interesting example; although it was one of the world’s richest countries around 1850, extreme poverty and inequality were significant problems of well-being at the time. Monitors of 1850, 1910, 1970 and 2015 depict the changes in three dimensions of well-being: the quality of life 'here and now', 'later' and 'elsewhere'. The analysis of two centuries shows the solutions to the extreme poverty problem and the appearance of new sustainability problems, especially in domestic and foreign ecological systems. The study also reveals the importance of natural capital: soil, air, water and subsoil resources, showing their relation with the social structure of the ‘here and now’. Treatment and trade of natural resources also impacted on the quality of life ‘later’ and ‘elsewhere.’ Further, the book illustrates the role of natural capital by dividing the capital into three types of raw materials and concomitant material flows: bio-raw materials, mineral and fossil subsoil resources. Additionally, the analysis of the institutional context identifies the key roles of social groups in well-being development. The book ends with an assessment of the

solutions and barriers offered by the historical anchoring of the well-being and sustainability issues. This unique analysis of well-being and sustainability and its institutional analysis appeals to historians, statisticians and policy makers.

A family member recollects a backyard pole dressed for all occasions; Jeff faces horrifying ultimatums and the prospect of Darkenfloxx(TM) in some unusual drug trials; and Al Roosten hides his own internal monologue behind a winning smile that he hopes will make him popular. With dark visions of the future riffing against ghosts of the past and the ever-settling present, this collection sings with astonishing charm and intensity.
