**Architecture Live Projects** Harriet Harriss,Lynnette Widder,2014-05-23 Architecture Live Projects provides a persuasive, evidence-based advocacy for moving a particular kind of architectural learning, known as Live Projects, towards a holistic integration into current and future architectural curricula. Live Projects are work completed in the borderlands between architectural education and built environment practice; they include design/build work, community-based design, urban advocacy consulting and a host of other forms and models described by the book's international group of authors. Because of their position, Live Projects as vehicle for simultaneously providing teaching and service has the potential to recalibrate the contesting claims that both academia and profession make to architecture. This collection of essays and case studies consolidates current discussions on theory and learning ambitions, academic best practices, negotiation with licensure and accreditation, and considerations of architectural integrity. It is an invaluable resource to current and future Live Projects advocates – whether they aim to move from pedagogy into practice or practice into pedagogy.

Python Crash Course, 3rd Edition Eric Matthes,2023-01-10 Python Crash Course is the world's bestselling programming book, with over 1,500,000 copies sold to date! Python Crash Course is the world's best-selling guide to the Python programming language. This fast-paced, thorough introduction will have you writing programs, solving problems, and developing functioning applications in no time. You'll start by learning basic programming concepts, such as variables, lists, classes, and loops, and practice writing clean code with exercises for each topic. You'll also learn how to make your programs interactive and test your code safely before adding it to a project. You'll put your new knowledge into practice by creating a Space Invaders-inspired arcade game, building a set of data visualizations with Python's handy libraries, and deploying a simple application online. As you work through the book, you'll learn how to: Use powerful Python libraries and tools, including pytest, Pygame, Matplotlib, Plotly, and Django Make increasingly complex 2D games that respond to keypresses and mouse clicks Generate interactive data visualizations using a variety of datasets Build apps that allow users to create accounts and manage their own data, and deploy your apps online Troubleshoot coding errors and solve common programming problems New to this edition: This third edition is completely revised to reflect the latest in Python code. New and updated coverage includes VS Code for text editing, the pathlib module for file handling, pytest for testing your code, as well as the latest features of Matplotlib, Plotly, and Django. If you've been thinking about digging into programming, Python Crash Course will provide you with the skills to write real programs fast. Why wait any longer? Start your engines and code! **Liveness on Stage** Claudia Georgi,2014-08-27 Theatre is traditionally considered a live medium but its 'liveness' can no longer simply be taken for granted in view of the increasing mediatization of the stage. Drawing on theories of intermediality,Liveness on Stageexplores how performances that incorporate film or video self-reflexively stage and challenge their own liveness by contrasting or approximating live and mediated action. To illustrate this, the monograph investigates key aspects such as 'ephemerality', 'co-presence', 'unpredictability', 'interaction' and 'realistic representation' and highlights their significance for re-evaluating received notions of liveness. The analysis is based on productions by Gob Squad, Forkbeard Fantasy, Station House Opera, Proto-type Theater, Tim Etchells and Mary Oliver. In their playful approaches these practitioners predominantly present such media combination as a means of cross-fertilisation rather than as an antagonism between liveness and mediatization. Combining an original theoretical approach with an in-depth analysis of the selected productions, this study will appeal to scholars and practitioners of theatre and performance as well as to those researching intermedial phenomena.

A Year to Live Stephen Levine,2009-10-07 In his new book, Stephen Levine, author of the perennial best-seller Who Dies?, teaches us how to live each moment, each hour, each day mindfully--as if it were all that was left. On his deathbed, Socrates exhorted his followers to practice dying as the highest form of wisdom. Levine decided to live this way himself for a whole year, and now he shares with us how such immediacy radically changes our view of the world and forces us to examine our priorities. Most of us go to extraordinary lengths to ignore, laugh off, or deny the fact that we are going to die, but preparing for death is one of the most rational and rewarding acts of a lifetime. It is an exercise that gives us the opportunity to deal with unfinished business and enter into a new and vibrant relationship with life. Levine provides us with a year-long program of intensely practical strategies and powerful guided meditations to help with this work, so that whenever the ultimate moment does arrive for each of us, we will not feel that it has come too soon.

TV Content Analysis Yiannis Kompatsiaris,Bernard Merialdo,Shiguo Lian,2012-03-19 The rapid advancement of digital multimedia technologies has not only revolutionized the production and distribution of audiovisual content, but also created the need to efficiently analyze TV programs to enable applications for content managers and consumers. Leaving no stone unturned, TV Content Analysis: Techniques and Applications provides a detailed exploration of TV program analysis techniques. Leading researchers and academics from around the world supply scientifically sound treatment of recent developments across the related subject areas—including systems, architectures, algorithms, applications, research results, emerging approaches, and open issues. The book is organized into six parts: Content Extraction - deals with automatic analysis and annotation of TV content, addressing generic semantics and concepts as well as TV content Content Structuring - examines techniques for identifying interesting parts of TV programs and supplying direct access to it Content Recommendation - explores the problem of providing users with the most relevant content, addressing the problem of an ever-increasing amount of available content Content Quality - considers visual perception and quality approaches in the multi-display TV context and the specific mobile TV scenario Web and Social TV - presents studies on Web and TV convergence and on how user-generated content in Web 2.0 applications can be used to enhance services Content Production - covers postproduction, visual effects, and presentation standards Most parts start with a chapter that provides an overview of that area, followed by state-of-the-art approaches focusing on specific issues covered in that section. Reporting on recent advances in the field, the book provides you with the global view and up-to-date understanding of emerging trends needed to participate in the development of the digital TV domain.

**Changing Television Environments** Manfred Tscheligi,Marianna Obrist,Arthur Lugmayr,2008-06-25 This book constitutes the refereed proceedings of the 6th European Conference on Interactive Television, EuroITV 2008, held in Salzburg, Austria, in July 2008. The 42 revised full papers were carefully reviewed and selected from 156 submissions. The contributions cover significant aspects of the interactive television domain including submissions on user studies, technical challenges related to new developments as well as new kind of formats. The papers are organized in topical sections on interactive TV, interactive authoring, personalisation and recommender systems, mobile TV, social TV, new TV environments, iTV architectures and systems, user interfaces and interaction design, user studies, and accessibility.

*Theatre Symposium, Vol. 19* J K Curry,2011-10-02 Despite a shared history and many common present practices, the relationship between

theatre and film often remains uncertain. Does a close study of film enrich an understanding of drama on the stage? What ongoing connections do theatre and film maintain, and what elements do they borrow from each other? Does the relative popularity and accessibility of film lead to an increased scholarly defensiveness about qualities exclusive to theatrical performances? Do theatre and film demand two different kinds of attention from spectators, or do audiences tend to experience both in the same ways? The essays in “Theatre Symposium: Volume 19” present this dynamic coexistence of theatre and film, and examine the nature of their mutual influence on each other. Bruce McConachie, in his contribution to the collection, “Theatre and Film in Evolutionary Perspective,” argues that the cognitive functions used to interpret either media arise from the same evolutionary foundation, and that therefore the viewing experiences of theatre and film are closely linked to each other. In “Robert Edmond Jones: Theatre and Motion Pictures, Bridging Reality and Dreams,” Anthony Hostetter and Elisabeth Hostetter consider Jones’ influential vision of a “theater of the future,” in which traditional stage performances incorporate mediated video material into stage productions. Becky Becker’s “Nollywood: Film and Home Video, of the Death of Nigerian Theatre,” by focusing on the current conversation in Nigeria, discusses the anxiety generated by a film and video industry burgeoning into and displacing theatre culture. These and the six other essays in “Theatre Symposium: Volume 19” shed light on the current state of affairs—the collaborations and the tensions—between two distinctly individual yet inextricably related artistic media.

**Why IPTV?** Johan Hjelm, 2008-09-15 Find out how modern IPTV technologies will change your experience of television. Internet Protocol Television (IPTV) is rapidly being deployed as a compliment service to existing distribution technologies. Why IPTV? traces the changes in Internet Protocol Television since the mid-1990s and examines what IPTV means today. The author analyzes what delivery of TV over an IP network means, both in terms of possibilities for new services, and in terms of the impact on the network and how it has to be managed. In addition, Why IPTV? helps you understand how introducing IPTV into the Web 2.0 world will impact the new services. It looks at the current trends in the consumer electronics industry as well as the network industry, and describes how the new technology can enhance and extend the existing business models in the TV industry, particularly in advertising; and also how it creates new possibilities, for instance, through personalization. Why IPTV? Interactivity, Technologies, Services: Provides an accessible introduction to IPTV. Covers the technology to build IPTV systems, and shows what lies beyond traditional business models and existing distribution technologies. Considers how IPTV technologies can exploit and change the current trends in consumer electronics and network industry. Explores how the merging of Web 2.0 and IPTV will open new opportunities for services. Addresses hot topics such as IPTV Interaction and Channel Switching, Networking and Streaming with Information Management Systems, Advertising and Personalization of IPTV. Why IPTV? will provide engineers in networking, TV broadcast companies, technology specialists in content creation companies and people in the IPTV industry (including management) with an engaging and insightful reference into Internet Protocol Television.

**Towards Radical Regeneration** Christoph Gengnagel, Olivier Baverel, Giovanni Betti, Mariana Popescu, Mette Ramsgaard Thomsen, Jan Wurm, 2022-09-17 This book reflects and expands on the current trends in the Architecture Engineering and Construction (AEC) industries to respond to the unfolding climate and biodiversity crisis. Shifting away from the traditional focus, narrowly centered on efficiency, the book presents a variety of approaches to move the AEC community from an approach that presents new challenges in all areas of the industry, from a linear, extractive paradigm to circular and regenerative one. The book presents contributions including research papers and case studies, providing a comprehensive overview of the field as well as perspectives from related disciplines, such as computer science, biology and material science. The chapter authors were invited speakers at the 8th Design Modelling Symposium “Towards Radical Regeneration”, which took place at the University of the Arts in Berlin in September 2022.

**Screen plays** Amanda Wrigley, John Wyver, 2022-04-05 Screen plays is a ground-breaking collection that chronicles the rich and surprising history of stage plays produced for the small screen between 1930 and the present. The volume opens with a substantial historical outline of how plays originally written for the theatre have been presented by the BBC and ITV, as well as independent producers and cultural organisations. Subsequent chapters utilise a variety of critical methodologies to analyse a wide range of outside broadcasts from theatres, screen adaptations of existing stage productions, along with original television productions of classic and contemporary drama. Making a compelling case for the centrality of the theatre to British television’s past and present, Screen plays opens up new areas of research for all those engaged in theatre, media and adaptation studies.

**Philippe Grandrieux** Greg Hainge, 2017-02-23 Philippe Grandrieux is one of cinema's only living true radicals and feted as one of the most innovative and important film makers of his generation. His consistently controversial work remains, however, relatively unknown outside of the international art film festival circuit. In this volume, the first book-length study of the work of Grandrieux in any language, Greg Hainge provides an overview and critical analysis of Grandrieux's entire career during which he has produced works for television, video installations, photography, performance pieces, documentary films, short films and prize-winning feature films. As well as providing an overview, the book argues that a critical appraisal of his work necessarily leads us to problematize many of the critical orthodoxies that have been formed in recent times, to reject the concept of a haptic cinema and to supplant this instead with the idea of a sonic cinema.
