Marketing Traps: How to Spot Fake Discounts versus Real Discounts in Stores Things You Must Know About Store Coupon Policies Loyalty Programs: Why do they exist and why should you care? 16 Useful Resources for Snagging the Best Deals Conclusion Final Word/About the Author An excerpt from the book: The notion of bargain shopping for groceries has been around at least as long as grocery stores themselves. Back in the 14th century, there were small locally owned grocers (also known as trading posts) that would sell dry items such as tea, herbs, spices, sugar, coffee, and other baking goods. As time passed, they began to sell other household staple foods such as canned meat, fruit, vegetables, or soups. Typically, customers would walk into these types of stores; hand a list to the clerk, and the clerk would bag up the items and ring them up. Since most of the foods were nonperishable, there were seldom sales like we see today. Bargains were only found in the case of an over stocked item, or through friendly one-on-one negotiations. In 1916 in Memphis Tennessee, Clarence Saunders established Piggly Wiggly, a popular common store seen throughout the southern United States. This was the first 'self-serve' grocer. This way of shopping proved to be very popular for both customers and storeowners. The customer enjoyed the freedom of browsing for the most desired items. Piggly Wiggly carried a whopping 605 different items (a sharp contrast to the then dated smaller local stores) and there was a greater opportunity for the consumer to purchase more than what they initially intended, making the storeowner happy as well. However, because there were a wider variety of perishable goods the store had to mark down prices on fresh produce, meats, dairy and eggs. It did not take a smart shopper long to figure out that the best day for shopping was the day before the next delivery was expected. The clerks always marked down the older items, to make room for the new. Bargain Fever Mark Ellwood, 2014-09-25 Almost half of everything sold in America is listed at some kind of promotional price. People don't only want a deep discount, they expect it - and won't settle for anything less. In this playful, deeply researched book, journalist Mark Ellwood takes a trip into this new landscape. From the floor of upscale department store Serpordorf Goodman to the bustling aisles of a Turkish bazaar, from the outlet Disneyworld of rural Pennsylvania to a town in Florida that can claim to be couponing's spiritual capital, Ellwood shows how some people are, quite literally, born to be bargain junkies thanks to a quirk of their DNA. He also uncovers the dark side of discounting: the sales-driven sleights of hand that sellers employ to hoodwink unsuspecting buyers. Bargain Fever is a manual for thriving in this new era, when deal hunting has gone from being a sign of indigence to one of intelligence. There's never been a better time to be a buyer - at least if you know how the game works. 'This book is a bargain hunter's bible.' Michael Tonello, author of *Bringing Home the Birkin* 'Bargain Fever is just as fierce, funny, tenacious, and tantalizing as its author. I love this book.' Kelly Cutrone, founder, People's Revolution, and author of *Normal Gets You Nowhere* 'A book after my own heart. Bargain Fever lifts the veils off the sales, ensuring even more that you'll never pay retail again.' Carmen Wong Ulrich, financial contributor, CBS This Morning, and author of *Generation Debt* 'Highly informative and entertaining.'

Local Store Marketing For Retailers John J Matthews,2008-10 Most store owners get into retail because they have a love for both people and the products they sell. They build their stores, hire friendly staff, unlock the doors and wait for the world to come in. The question in their minds isn't if customers will come, but when. All too often, retail business owners fall victim to the new guy syndrome: they build a new store, open their doors, and rest on their laurels only to see their sales erode--rapidly. It's easy to get excited about your new business when your store first becomes visible to customers during your grand opening, but it's another thing to generate this customer excitement some two years later. Successful retailers don't fall for the new guy syndrome and develop marketing strategies to maintain their sales momentum well beyond their break-in period. These marketing strategies may include brand advertisements in newspapers, direct mail, radio and television-all the usual advertising options available to retailers.But where the real war is won is in the trenches at the local store marketing (LSM) level. The most successful retailers win the battle for customer traffic because they make an operational commitment to local store marketing. They know local store marketing captures the entire customer base in the critical three-mile radius surrounding their store. In addition, they know that implementing local store marketing is low cost or no cost. (Notice I didn't say no work, though!) Successful retailers effectively infuse their year-long promotional campaigns with local store marketing, building a strong sales foundation for sustained and long-term growth-and you can too! That is where this manual comes in. Local store marketing is a must for you to fully capitalize on the sales potential of your store. Successfully capturing these customers will translate into both short- and long-term sales growth--in addition to effectively locking out your competition. The sales success of your store depends on you proactively going after sales using local store marketing, instead of passively waiting for customers to find you.The decision is yours: you can either choose the passive route --letting your success or failure be predicated on customers opting for your store--OR you can aggressively maximize the sales opportunities within your three-mile business area. Prudent store operators take control of their marketplaces to maximize every sales opportunity. This manual is designed to help you do just that by tapping into the power of local store marketing for your own store.

Sales & Celebrations Sarah Elvins,2004 Between the two world wars, the retail world experienced tremendous changes. New forms of competition, expanded networks of communication and transportation, and the proliferation of manufactured goods posed challenges to department store and small shopkeeper alike. In western New York, and in Buffalo and Rochester in particular, retailers were a crucial part of urban life, acting as cultural brokers and civic leaders. They were also cultivators of area pride. Even as they adopted the latest merchandising techniques or stocked the newest items, merchants emphasized their local roots and their ability to put a local spin on national trends and innovations. Regional identity became a powerful selling tool not only during the prosperity of the 1920s but also through the economic crisis of the Great Depression. Sales and Celebrations explains how local traditions and institutions affected the evolution of American consumer culture. It expands our understanding of American consumerism, demonstrating that local particularities and loyalties could often coexist with, and occasionally challenge, the spread of mass consumption. In her award-winning study, Professor Sarah Elvins provides new insight into the relationship between America's largest metropolises and its smaller centers. Retailers in Buffalo and Rochester did not simply imitate the practices of their counterparts in Manhattan and Chicago; they highlighted their unique ability to serve the wants and needs of their particular markets. By drawing attention to this persistent power of the local, Sales and Celebrations illuminates a neglected aspect of the story of American culture in the interwar period.

Social – Local – Mobile Gerrit Heinemann,Christian Gaiser,2014-11-20 n the future, shopping will be greatly influenced by a combination of localization issues, mobile internet at the point of sale, and use of social networks. This book focuses on the ‘SoLoMo synergies’ that arise from this paradigm shift in future shopping, which also promises new and effective marketing options for traditional retailers. It also reflects the current status of research and business practice, analyzing the basic factors of SoLoMo in detail. The importance of Location-based Services (LBS) is elaborated and analyzed in an empirical study using a market based case of kaufDA – a leading German online shopping network. The evidence shows that customers see LBS as an attractive tool and are prepared to change their buying behavior. Though LBS is still in its early stages and its professional longevity remains to be seen, it also promises tremendous potential for the future.
