Managing Construction Logistics Gary Sullivan, Stephen Barthorpe, Stephen Robbins, 2011-02-25 Every major industry except construction uses logistics to improve its bottom line... Poor logistics is costing the construction industry at least £3 billion a year according to a report – ‘Improving Construction Logistics’ – published by the Strategic Forum for Construction. Additional costs arise as a result of operatives waiting for materials, and skilled craftsmen being used for unskilled jobs. Inadequate management of logistics also has an adverse effect on quality, causes delays to projects, and adds to the health and safety risks on site. This practical book highlights the benefits of good logistics as well as the use of consolidation centres on projects. It shows how reduction in transport movements, less money tied up in stock, less waste, and the more efficient use of skilled craftsmen will reduce the cost of projects, reduce construction time, improve quality, reduce risks to health and safety, improve environmental performance and generally improve the image of the industry. The authors offer practical ways of achieving these benefits through integrated project teams and supply chains and the increased adoption of information technology including electronic communications, bar coding, and electronic tagging for tracing products. They also show how specific roles for each part of the industry can help to improve logistics. • Practical, clear and accessible • First book to address logistics in construction • Written by the industry-recognized logistics experts • Tackles issues of key concern: efficient use of labour; sustainability; waste and supply chain management

Global Logistics Manager S. J. Seeds, 2015-03-30 Between the 1980's deregulation and the 911 Homeland Security re-regulation, there existed a unique period in American commercial history. This book recounts the era of the rise of modern logistics with its mergers, computerization, conventions, RFID and more as the newly deregulated transportation industry grew into the 21st century's modern logistics practice. The author recounts it's twists and turns in carriers and business entities documented in his trade press articles as the most published global logistics manager of the era. The book includes 55 pictures and 9 illustrations or emblems which include the history of Circus Ramps, (Chicago's) Butch O'Hare in his fighter aircraft, the Beatles PanAm jet controversy, as well as background the major players like President Cleveland as the regulator and Congressman Harley Staggers as a deregulator. An excellent book for people that ever worked with trucks or trains or boats and planes, or ports along with the rise of the PC and RFID in logistics practice. With the sunset of the 110 year old Interstate Commerce Commission, this is a fascinating look at a time in American history that has come and gone, and can never come again.
