The Chemical Dynamics and Kinetics of Small Radicals Kopin Liu, Albert Wagner, 1995 This book highlights recent progress in the chemistry of radicals. Developments include the growing use of lasers to generate radicals, the application of lasers to provide state, angular, polarization, energy and real-time resolution in kinetics and dynamics experiments, the development of theories for handling the reactions of radicals, and the simulation of the reaction dynamics of increasingly larger systems for direct comparison to experimental results. The book emphasizes the increasing interaction between experimental dynamics, kinetics and theory. It is appropriate for chemistry graduate students and researchers about to enter the field. However, the discussions of some topics progress to a more advanced level so that even an expert will find the book useful.

Greatest Ever Footballers The Greatest Ever, 2014-11-06 Who is the greatest ever footballer? Pele? Maradona? Cruyff? Who is the greatest ever British footballer? Charlton? Best? Dalglish? Who is the country's greatest defender, midfielder, goalkeeper? What are the greatest teams fielded by every club in the English and Scottish leagues? And what is the greatest international team of all time? How do you decide? Well, the facts don't lie. Based on a unique and comprehensive network of national and international football databases, compiled by football statisticians across the globe, each player is awarded points (for games played for both club and country) according to a series of criteria, such as win, lose, draw, whether they scored, goals conceded, captaincy, etc. Points accumulated for each game are also weighted in line with the competition in which the game featured and the quality of the opponents played. Each player's points are then fed through to the Greatest Ever compilers who update their lists on a weekly basis. The end result is the only objective, comprehensive and incontrovertible record of who are the greatest talents ever to have graced the beautiful game.

John Dennis: The Oakwell Years John Dennis, Matthew Murray, 2012-03-07 What is life like as a football club chairman? Find out in this revealing, thrilling and insightful account into Barnsley Football Club from former Reds Chairman, John Dennis. Read how John's father, Ernest, used his own money to help save the club from going bust, how John's first task as chairman was to replace Manager Allan Clarke with Mel Machin, laying the foundation for the future success of the club under Danny Wilson, who took the Reds to the Premiership for the one and only time in the club's history. During John's tenure, the club also made its first appearance at the Twin Towers of Wembley and Oakwell was transformed from a below-par ground into the impressive all-seater stadium complete with the academy facilities that it is today. Behind the scenes of any football club are the wheelings and dealings of transfers, contract talks with players and disputes with agents and members of the press - and John's down-to-earth approach was both dignified and humorous. *John Dennis inside view* is a must-read for any Barnsley fan - and an enjoyable insight for any true football fan.

Analysis of the Effects of Boundary-layer Control on the Power-off Landing

Performance Characteristics of a Liaison Type of Airplane Elmer A. Horton,Laurence K.

Loftin,Stanley F. Racisz,1950 An investigation was made to determine the effects of boundary-layer control on the landing performance characteristics of a liaison type of airplane having a payload of 1500 pounds and a flight duration of 5 hours. The aspect ratio was varied from 5 to 15, the wing span from 30 to 100 feet, and the brake horsepower from 300 to 1200. The use of boundary-layer control caused reduction in total landing distance (25 to 40 percent), ground-run distance, gliding speed, and stalling speed whereas sinking speed was increased only slightly.
