### **The Changing World Religion Map** Stanley D.

Brunn, 2015-02-03 This extensive work explores the changing world of religions, faiths and practices. It discusses a broad range of issues and phenomena that are related to religion, including nature, ethics, secularization, gender and identity. Broadening the context, it studies the interrelation between religion and other fields, including education, business, economics and law. The book presents a vast array of examples to illustrate the changes that have taken place and have led to a new world map of religions. Beginning with an introduction of the concept of the "changing world religion map", the book first focuses on nature, ethics and the environment. It examines humankind's eternal search for the sacred, and discusses the emergence of "green" religion as a theme that cuts across many faiths. Next, the book turns to the theme of the pilgrimage, illustrated by many examples from all parts of the world. In its discussion of the interrelation between religion and education, it looks at the role of missionary movements. It explains the relationship between

religion, business, economics and law by means of a discussion of legal and moral frameworks, and the financial and business issues of religious organizations. The next part of the book explores the many “new faces” that are part of the religious landscape and culture of the Global North (Europe, Russia, Australia and New Zealand, the U.S. and Canada) and the Global South (Latin America, Africa and Asia). It does so by looking at specific population movements, diasporas, and the impact of globalization. The volume next turns to secularization as both a phenomenon occurring in the Global religious North, and as an emerging and distinguishing feature in the metropolitan, cosmopolitan and gateway cities and regions in the Global South. The final part of the book explores the changing world of religion in regards to gender and identity issues, the political/religious nexus, and the new worlds associated with the virtual technologies and visual media.

**The Methuen Drama Handbook of Theatre History and Historiography** Claire Cochrane, Jo Robinson, 2019-10-31 The Methuen Drama Handbook of Theatre History and Historiography is an authoritative guide to contemporary debates and practices in this field. The book covers the key themes and methods that are current in theatre history research, with a particular focus on expanding the object of study to include engagement with theatre and performance practices and the development of theatre histories around the world. Central to the book are eighteen specially commissioned essays by established and emerging scholars from a wide range of international contexts, whose discussion of individual case studies is predicated on their understanding and experience of their 'local' landscape of theatre history. These essays reveal where important work continues to be done in the field and, most valuably, draws on academic contexts beyond the Western academy to expand our knowledge of the exciting directions that such an approach opens up. Prefaced by an introduction tracing the development of the

discipline of theatre history and changing historiographical approaches, the Handbook explores current issues pertaining to theatre and performance history research, as well as providing up to date and robust introductions to the methods and historiographic questions being explored by researchers in the field. Featuring a series of essential research tools, including a detailed list of resources and an annotated bibliography of key texts, this is an indispensable scholarly handbook for anyone working in theatre and performance history and historiography.

*Educational Research* Jerry Wellington, 2015-01-29 What is educational research? What are its current approaches, methods and methodologies? How should existing literature be reviewed and evaluated critically? What are the key philosophical debates in and on educational research? How should research in education be conducted and how should it be presented? And what is the value of such research? With this extensively revised edition of a much-admired and engaging guide, Jerry Wellington provides clear and constructive answers to these questions, complete with detailed advice on methods such as interviewing, surveys, documentary research and the use of focus groups. Thoroughly overhauled and updated, this edition includes new case studies, helpful 'theory summary' boxes, and a range of activities or 'points to ponder' to foster engagement with current issues. Retaining the clarity and concision of the previous edition, and its approachable and practical style, Jerry Wellington provides an invaluable text for all those engaged in educational research.

**Environmental Online Communication** Arno Scharl, 2013-03-09 This book brings together high quality articles exploring the design, implementation, management, funding, promotion and evaluation of networked information systems that advocate sustainability and the protection of natural ecosystems. Case studies of deployed and planned information systems complement theoretical work on the methodological,

technological and organizational foundations of environmental online communication.

Advances and New Trends in Environmental Informatics

Volker Wohlgemuth, Frank Fuchs-Kittowski, Jochen

Wittmann, 2016-09-02 This book presents the latest findings and ongoing research in the field of green information systems as well as green information and communication technology (ICT). It provides insights into a whole range of cross-cutting concerns in ICT and environmental sciences and showcases how information and communication technologies allow environmental and energy efficiency issues to be handled effectively. Offering a selection of extended and reworked contributions to the 30th International Conference EnviroInfo 2016, it is essential reading for anyone wanting to extend their expertise in the area.

**Handbook of Crime Prevention and Community Safety**

Nick Tilley, Aiden Sidebottom, 2017-03-27 This second edition of

the Handbook of Crime Prevention and Community Safety provides a completely revised and updated collection of essays focusing on the theory and practice of crime prevention and the creation of safer communities. This book is divided into five comprehensive parts: Part I, brand new to this edition, is concerned with theoretical perspectives on crime prevention and community safety. Part II considers general approaches to preventing crime, including a new chapter on the theory and practice of deterrence. Part III focuses on specific crime prevention strategies, including a new chapter on regulation for crime prevention. Part IV focuses on the prevention of specific categories of crime and the fear they generate, including new chapters on organised crime and cybercrime. Part V considers the preventative process: the methods through which presenting problems can be analysed, responses formulated and implemented, and their effectiveness evaluated. Bringing together leading academics and practitioners from the UK, US, Australia and the Netherlands, this volume will be an invaluable

reference for researchers and practitioners whose work relates to crime prevention and community safety, as well as for undergraduate and postgraduate courses in crime prevention.

### **Learning ArcGIS Runtime SDK for .NET** Ron

Vincent,2016-06-30 Learn how to build native, cross-platform mapping apps with this comprehensive and practical guide, using the MVVM pattern About This Book Enhance the user experience with the power of ArcGIS runtime SDK for .NET. This clear, well segregated book has all the information you need on ArcGIS Runtime SDK. Just name it—this book has it! This highly practical book empowers you to build your own custom application! Get to know the inner details of ArcGIS Runtime SDK from our experts, in this book written by Ron Vincent, with 24 years' experience in the GIS industry and many in GIS training. Who This Book Is For This book caters to long-term users of Esri's technologies that are new to mobile development or are transitioning from older Esri technologies such as ArcGIS Engine. It is also for users who are unfamiliar with Esri or GIS and are in need of a mapping solution for either their desktop or a mobile platform, or both. The book requires knowledge of .NET. What You Will Learn Understand and implement the MVVM pattern using MVVM Light Create and add layers from offline and online resources such as ArcGIS Online or ArcGIS for Server Create a 2D or 3D map and decide what kind of symbology to use Symbolize the layers based on the geometry Search and find objects in the layers Geocode an address and create a route using an address Edit layer objects from online content and offline content Test the application using test-driven development and then build and release the application for the intended audience In Detail ArcGIS is a geographic information system (GIS) that enables you to work with maps and geographic information. It can be used to create

and utilize maps, compile geographic data, analyze mapped information, share and discover geographic information and manage geographic information in a database. This book starts by showing you where ArcGIS Runtime fits within Esri's overall platform strategy. You'll create an initial map using the SDK, then use it to get an understanding of the MVVM model. You'll find out about the different kinds of layers and start adding layers, and you'll learn to transform maps into a 3D scene. The next chapters will help you comprehend and extract information contained in the maps using co-ordinates and layer objects. Towards the end, you will learn to set the symbology, decide whether to use 2D or 3D, see how to implement 2D or 3D, and learn to search and find objects. You'll also get to grips with many other standard features of the Application Programming Interface (API), including create applications and finally testing, licensing, and deploying them. Once completed, you will be able to meet most of the common requirements of any mapping application for desktop or mobile platforms. Style and approach This comprehensive book takes a completely practical approach, where every chapter explains the important concepts and demonstrates a practical application of them in a hands-on manner.

*Medical Image Computing and Computer-Assisted Intervention -- MICCAI 2009* Guang-Zhong Yang, David J. Hawkes, Daniel Rueckert, Alison Noble, Chris Taylor, 2009-09-07  
The two-volume set LNCS 5761 and LNCS 5762 constitute the refereed proceedings of the 12th International Conference on Medical Image Computing and Computer-Assisted Intervention, MICCAI 2009, held in London, UK, in September 2009. Based on rigorous peer reviews, the program committee carefully selected 259 revised papers from 804 submissions for presentation in two volumes. The first volume includes 125 papers divided in topical sections on cardiovascular image guided intervention and robotics; surgical navigation and tissue interaction; intra-operative imaging and endoscopic navigation; motion modeling

and image formation; image registration; modeling and segmentation; image segmentation and classification; segmentation and atlas based techniques; neuroimage analysis; surgical navigation and robotics; image registration; and neuroimage analysis: structure and function.

**The Child Protection Handbook E-Book** Rachael Clawson, Rachel Fyson, Lisa Warwick, 2024-01-03 The Child Protection Handbook explains how to recognise abuse and protect at-risk children for those working with children and young people aged under 18, including in social care, education, health services, and sport and leisure settings. The book has been fully updated to incorporate the impact of new technology as well as current legal and policy frameworks that govern statutory child protection intervention in the UK. It considers all aspects of child protection, including organisational issues, children's rights, the needs of those from diverse backgrounds, and the impacts of the Covid-19 pandemic on child protection work. With accessible, up-to-date information presented in an easy-to-navigate format, the Handbook is ideal for all busy practitioners wanting to improve outcomes for children, young people and their families. Fully updated since the last edition in 2007 - perfect for all those working with children and young people Easy to navigate and locate information - suitable as a reference book for busy practitioners Illustrative boxes in each chapter, drawing on practice case examples to highlight current issues and dilemmas All concepts explained in straightforward, jargon-free language Reflective points to encourage the reader to think about their own practice and apply new knowledge Key questions for students and teachers to check understanding and to explore concepts further Links to resources and further reading Supporting social workers in child protection practice Poverty and child protection New forms of child abuse, including technology assisted child sexual abuse, child sexual exploitation, gangs and criminal exploitation, radicalisation, forced marriage of children and young people,

*Mapping Cyberspace* Martin Dodge, Rob Kitchin, 2003-09-02 Mapping Cyberspace is a ground-breaking geographic exploration and critical reading of cyberspace, and information and communication technologies. The book: \* provides an understanding of what cyberspace looks like and the social interactions that occur there \* explores the impacts of cyberspace, and information and communication technologies, on cultural, political and economic relations \* charts the spatial forms of virtual spaces \* details empirical research and examines a wide variety of maps and spatialisations of cyberspace and the information society \* has a related website at <http://www.MappingCyberspace.com>. This book will be a valuable addition to the growing body of literature on cyberspace and what it means for the future.

Affective Publics Zizi Papacharissi, 2014-11-05 Over the past few decades, we have witnessed the growth of movements using digital means to connect with broader interest groups and express their points of view. These movements emerge out of distinct contexts and yield different outcomes, but tend to share one thing in common: online and offline solidarity shaped around the public display of emotion. Social media facilitate feelings of engagement, in ways that frequently make people feel re-energized about politics. In doing so, media do not make or break revolutions but they do lend emerging, storytelling publics their own means for feeling their way into events, frequently by making those involved a part of the developing story. Technologies network us but it is our stories that connect us to each other,

making us feel close to some and distancing us from others. *Affective Publics* explores how storytelling practices facilitate engagement among movements tuning into a current issue or event by employing three case studies: Arab Spring movements, various iterations of Occupy, and everyday casual political expressions as traced through the archives of trending topics on Twitter. It traces how affective publics materialize and disband around connective conduits of sentiment every day and find their voice through the soft structures of feeling sustained by societies. Using original quantitative and qualitative data, *Affective Publics* demonstrates, in this groundbreaking analysis, that it is through these soft structures that affective publics connect, disrupt, and feel their way into everyday politics.

**Forecasting Travel in Urban America** Konstantinos Chatzis, 2023-07-11 A history of urban travel demand modeling (UTDM) and its enormous influence on American life from the 1920s to the present. For better and worse, the automobile has been an integral part of the American way of life for decades. Its ascendance would have been far less spectacular, however, had engineers and planners not devised urban travel demand modeling (UTDM). This book tells the story of this irreplaceable engineering tool that has helped cities accommodate continuous rise in traffic from the 1950s on. Beginning with UTDM's origins as a method to help plan new infrastructure, Konstantinos Chatzis follows its trajectory through new generations of models that helped make optimal use of existing capacity and examines related policy instruments, including the recent use of intelligent transportation systems. Chatzis investigates these models as evolving entities involving humans and nonhumans that were shaped through a specific production process. In surveying the various generations of UTDM, he delves into various means of production (from tabulating machines to software packages) and travel survey methods (from personal interviews to GPS tracking devices and smartphones) used to obtain critical information. He

also looks at the individuals who have collectively built a distinct UTM social world by displaying specialized knowledge, developing specific skills, and performing various tasks and functions, and by communicating, interacting, and even competing with one another. Original and refreshingly accessible, *Forecasting Travel in Urban America* offers the first detailed history behind the thinkers and processes that impact the lives of millions of city dwellers every day.

*Making Islam Work* Thijs Sunier, 2023-10-16 The development of Islamic landscapes in Europe, is first and foremost related to Islamic authority. Religious authority relies on persuasiveness and deals with issues of truth, authenticity, legitimacy, trust, and ethics with reference to religious matters. This study argues that Islamic authority-making among European Muslims is a social and relational practice that is much broader and versatile than theological proficiency and personal status. It can also be conferred to objects, activities, and events. The book explores various ways in which Islamic authority is being constituted among Muslims in Western Europe with a particular focus on the role of 'ordinary' Muslims. This book is available in its entirety in Open Access.
