Whistler to Cassatt Timothy J. Standring, 2021 A revelatory look at an underexplored chapter of American art, which took place not on American soil but in France In the late nineteenth and early twentieth centuries, American artists flocked to France in search of instruction, critical acclaim, and patronage. Some, including James McNeill Whistler, John Singer Sargent, and Mary Cassatt, became highly regarded in the French press, advancing their careers on both sides of the Atlantic. Others, notably William Merritt Chase, John Twachtman, Childe Hassam, and Thomas Wilmer Dewing--part of the association known as The Ten--found success working in the style of the French Impressionists, while Henry Ossawa Tanner, Cecilia Beaux, and Elizabeth Jane Gardner focused on genre and history subjects. This richly illustrated volume offers a sophisticated examination of cultural and aesthetic exchange as it highlights many figures, including artists of color and women, who were left out of previous histories. Celebrated scholars from both American and French institutions detail the complex history and diverse styles of these expatriate artists--styles ranging from conservative academic modes to Tonalism--and provide original perspectives on this fertile period of creativity, expanding our understanding of what constitutes American art.

Museums in Arabia Karen Exell,Sarina Wakefield,2016-05-12 Museum activity has, in recent years, undergone major and rapid development in the Arabian Peninsula, with the regeneration of existing museums as well as the establishment of new ones. Alongside such rapid expansion, questions are inevitably raised as to the new challenges museums face in this region and whether the museum, as a central focus of heritage preservation, also runs the risk of overshadowing local forms of heritage performance and preservation. With contributions from leading academics from a range of disciplines and heritage practitioners with first-hand experience of working in the region, this volume addresses the issues and challenges facing museums in Kuwait, Saudi Arabia, Qatar, Yemen and the UAE. It focuses on the themes of politics, public engagement and the possibility of a new museum paradigm which might appropriately reflect the interests and culture of the region. The interdisciplinary approaches analyse museum development from both an inside and outside perspective, suggesting that museums do not follow a uniform trajectory across the region, but are embedded within each states' socio-cultural context, individual government agendas and political realities. Including case study analysis, which brings the more marginal nations into the debates, as well as new empirical data and critical evaluation of the role of the museum in the Arabian Peninsula societies, this book adds fresh perspectives to the study of Gulf heritage and museology. It will appeal to regional and international practitioners and academics across the disciplines of museum studies, cultural studies, and anthropology as well as to anyone with an interest in the Gulf and Middle East.

Prosthetic Memory Alison Landsberg,2004 Prosthetic Memory argues that mass cultural forms such as cinema and television in fact contain the still-unrealized potential for a progressive politics based on empathy for the historical experiences of others. The technologies of mass culture make it possible for anyone, regardless of race, ethnicity, or gender, to share collective memories--to assimilate as deeply felt personal experiences historical events through which they themselves did

not live.

Women's Voices in Digital Media Jennifer O'Meara, 2022-04-26 2023 Publication Award Honorable Mention, British Association for Film, Television and Screen Studies An examination of the sound and silence of women in digital media. In today's digital era, women's voices are heard everywhere—from smart home devices to social media platforms, virtual reality, podcasts, and even memes—but these new forms of communication are often accompanied by dated gender politics. In *Women's Voices in Digital Media*, Jennifer O'Meara dives into new and well-established media formats to show how contemporary screen media and cultural practices police and fetishize women's voices, but also provide exciting new ways to amplify and empower them. As she travels through the digital world, O'Meara discovers newly acknowledged—or newly erased—female voice actors from classic films on YouTube, meets the AI and digital avatars in *Her* and *The Congress*, and hears women's voices being disembodied in new ways via podcasts and VR voice-overs. She engages with dialogue that is spreading with only the memory of a voice, looking at how popular media like *Clueless* and *The Simpsons* have been mined for feminist memes, and encounters vocal ventriloquism on *RuPaul's Drag Race* that queers and valorizes the female voice. Through these detailed case studies, O'Meara argues that the digital proliferation of screens alters the reception of sounds as much as that of images, with substantial implications for women's voices.
