*Charlotte Riddell's City Novels and Victorian Business* Silvana Colella, 2016-03-22 In spite of the popularity she enjoyed during her lifetime, Charlotte Riddell (1832-1906) has received little attention from scholars. Silvana Colella makes a strong case for the relevance of Riddell's novels as narrative experiments that shed new light on the troubled experience of Victorian capitalism. Drawing on her impressive knowledge of commerce and finance, Riddell produced several novels that narrate the fate of individuals - manufacturers, accountants, entrepreneurs, City men and their female companions - who pursue the liberal dream of self-determination in the unstable world of London business. Colella situates novels such as *Too Much Alone*, *George Geith*, *The Race for Wealth*, *Austin Friars* and *The Senior Partner* in the broader cultural context, examining business manuals, commercial biographies, and essays to highlight Victorian constructions of the business ideal and the changing cultural status of the City of London. Combining historicist and formalist readings, Colella charts the progression of Riddell's imaginative commitment to the business world, focusing on the author's gendered awareness of the promises and disenchantments associated with the changing dynamics of capitalist modernisation. Her book enriches our understanding of Victorian business culture, the literary history of capitalism, and the intersections of gender, genre and economics.

**Pedagogical Specialised Lexicography** Pedro Antonio Fuertes Olivera, Ascensión Arribas-Baño, 2008 This stimulating new book, which combines dictionary research and linguistic knowledge, analyses the representation of meaning in business dictionaries from a pedagogical perspective. By examining in detail the macrostructure, mediostructure, access structure and microstructure of eight business dictionaries, this book presents interesting findings on how the dictionaries studied represent the 'noun-term', and on how they cope with the principles of new lexicography that aims at solving the needs of a specific type of user with specific types of problems related to a specific type of user situation. This exhaustive study, which makes simultaneous contributions to the theory of terminology, lexicography, and LSP teaching, defends a methodological confluence between LSP lexicography and

terminology, and proposes some guiding principles towards the construction of pedagogically-oriented specialised dictionaries that must target students enrolled in LSP courses: Business English, Business Spanish, Business Translation, etc.

**Corpora and Language Education** Lynne Flowerdew, 2012-01-15 Corpora and Language Education critically examines key concepts and issues in corpus linguistics, with a particular focus on the expanding interdisciplinary nature of the field and the role that written and spoken corpora now play in the fields of professional communication, teacher education, translation studies, lexicography, literature, critical discourse analysis, and forensic linguistics. The book also presents a series of corpus-based case studies illustrating central themes and best practices in the field.

Specialised Dictionaries for Learners Pedro A. Fuertes-Olivera, 2010-03-26 The need for constructing a lexicographical theory with a particular focus on specialised dictionaries for learners is well documented in recent publications. This will imply paying attention to, at least, four basic lexicographic categories: learners; the learner's situation; the learner's needs; dictionary assistance. In one or other way, these categories are analysed in this book, whose eleven chapters are grouped into three parts. Part 1 reflects on some of the main ideas defended by the function theory of lexicography, perhaps the theoretical framework that has paid more attention to specialised lexicography. Part 2 presents some proposals that have already been explored in the field of general learner's dictionary and must be incorporated into specialised metalexicography: cultural aspects; figurative meaning; the inclusion of grammatical information; the use of corpora. Part 3 introduces the state of play regarding specialised dictionaries in China and offers some ideas for coping with the proliferation of terminological glossaries in Internet. The book also describes Enrique Alcaraz's academic achievements, together with some personal anecdotes, and a personal short tribute to his memory.

Shareholder Value and the Common Good David Lutz, Paul Mimbi, 2005-12-29 What is the objective or purpose of business Management? According to the dominant theory of contemporary financial management scholarship, agency theory, business managers are obligated to maximise owner or shareholder value. According to most theories of business ethics, however, some owner-value-maximising actions should not be performed, because they would be unethical. Because business management scholars and business ethics scholars have not resolved this contradiction, students of commerce receive a contradictory education. The twenty-five essays in this interdisciplinary, international volume address the question of the objective or purpose of business management from a wide range of theoretical perspectives. Since some of the writers contradict one another, it is not possible that all of them are correct. Nevertheless, the fact that many of them argue persuasively that business managers should aspire to more than maximisation of a financial variable challenges everyone with a theoretical or practical interest in commerce to reconsider acceptance of the owner-value paradigm and to develop a richer conception of the profession of business management.
