Teaching Coding through Game Creation Sarah Kepple, 2018-08-24 This engaging guide demonstrates how easy, fun, and rewarding it can be to teach and learn coding at the library. In our technology-obsessed society, computer coding is a highly valued and in-demand skill, but many people consider it an activity only for technology geeks and educated professionals—even more so to teach coding. Not so, says author Sarah Kepple. In this accessible guide, she explains why you don't have to be an expert to lead coding, shows how easy and rewarding learning and teaching coding can be, and provides step-by-step instructions to help you and your community get started. The book shows how to engage students quickly with learning activities that springboard off of the powerful appeal of video games. The author takes users through activities that introduce popular programming languages—including GameMaker, JavaScript, Python, and Scratch—to create video games, and in the process, to learn coding. These activities, themed around classic and popular stories, appeal to a broad age range—from elementary-age youth through high school and beyond to adults and seniors. Readers will see why school and public libraries are venues ideally suited for coding classes, workshops, clubs, or camps, and they will understand why teaching coding not only meets an important need but also serves to highlight the library's relevance to its community.

Documentation as Art Annet Dekker, Gabriella Giannachi, 2022-11-22 Documentation as Art presents documentation as an expanded practice that is radically changing the ways in which to look at, participate in, and generate art. Bringing together expertise from different disciplines, the book provides an in-depth investigation of the development of documentation as a set of production, circulation, and preservation strategies. Illustrating how these are often led by artists, audiences, and museums, the contributions offer new insights into digital art and its history, curation, and preservation, through documentation. Considering documentation as the main method of preserving these art forms, the book analyses how it can address the inherent challenges of capturing live events, visitor experiences, and evolving artworks. Showing how documentation itself can become (part of) an original artwork, the book discusses ways in which these expanded practices can impact the value and experience of the documented event or artwork, giving consideration to how this might affect the traditional authority of the museum as creator of documentation used for future reference, historical relevance, or cultural memory. Documentation as Art demonstrates how the curation and preservation of documentation and the introduction of audience-generated documentation are radically changing exhibition and visiting practices in which documentation is becoming a significant and emergent cultural form in its own right. The book will appeal to researchers and students engaged in the study of museums and curation, art and art history, performance, new media and digital art, library and information science, and conservation.
