GöncziSTEM I. Lottery system-book Jozsef Gonczi,2016-03-11 Become a winner! People play the lottery hoping for a better life and to make their dreams come true. Because of the excitement and possibilities, lotteries are popular throughout the world. A gambling enthusiast, author József Gönczi has constructed variations and systems with special and difficult algorithms that attempt to beat the system. He helps gamblers by submitting mathematical formulas and a system that doesn't just rely on chance. Gambling is all about math. This informative book offers numerous variations on mathematical schemes that gamblers can use to better their chances of winning in different forms of gaming. These variations are compiled according to special computer algorithms. All the variations for lotteries require fields of six number positions. Gamblers must substitute their favorite lottery numbers into the position numbers of the variations. The book provides 69 variations in 11 chapters that offer different guarantees for hits. The variations are made with the number of positions in which gamblers must substitute their own lottery numbers (from 1 to 49) whenever numerical order isn't required. Winning is made so much easier by studying the GöncziSTEM I. Lottery system-book.

It was really easy to follow. You only play what you can and you can still win! Shaun and I will only play lotto from now on using these strategies. -Jennifer and Shaun, Florida Since we've been using your method, we have definitely been winning more than we used to. It's easy to follow -Dale, Florida I just wanted to let you know that my husband and I read through your lottery method last night. It seems great. Your Lottery Ticket William C F Pierce, 2012-11-30 If I asked you. " Do you know what the odds are of winning the European Lottery?" You probably would not even be able to hazard a guess. It is in fact 116,541,800 to 1. There is a way to reduce these odds. If I told you that there are 30 main ball numbers from which the 5 main numbers have come out and scored 60 times for the winning jackpots in 525 draws. Which is about once every 8 to 9 draws. The odds from these 30 numbers is 142,506 to 1. So picking 5 main numbers out of 30 plus covering all the star balls over six lines for a total odds of 855,036 to 1. Which would with 5 winning main numbers guarantee you a minimum of 2 lines with five numbers in each line, with each line having at least one Star Ball each. Your winnings might likely be a total of between £0.4 million and £3 million. Worst still, you could even hit the jackpot.

The Cadillac Lottery System Norm Wildey, 1994-09 The easiest, most successful system yet for hitting any three-number lottery. Every day tens of millions are getting in on the excitement of their local lottery, but they rarely win by playing numbers chosen for sentimental or superstitious reasons. Here is a proven mathematical system which calculates the odds and diagrams the most likely winning numbers.
