*Love Charms and Other Catastrophes* Kimberly Karalius,2016-05-17 Aspiring love charm maker Hijiri Kitamura was excited to come back to Grimbaud for her sophomore year-until she learns about the upcoming charm making competition. Grimbaud has just started to recover from the tyranny of Zita's love fortunes and it would be too easy for the winning charm maker to take Zita's place. The only solution is for Hijiri, with the support of her friends and fellow rebels, to win the contest herself. Unfortunately, that's easier said than done, especially when Love itself has decided to meddle in Hijiri's life. Concerned that it's favorite charm maker has given up on finding a boyfriend of her own, Love takes matters into its own hands and delivers the perfect boyfriend to her in a giftwrapped box...literally.

CRC World Dictionary of Medicinal and Poisonous Plants Umberto Quattrocchi,2016-04-19 Following on the successes of two previous dictionary projects, the CRC World Dictionary of Plant Names and the CRC World Dictionary of the Grasses, Umberto Quattrocchi has undertaken this dictionary of economically important plants.... He has done for these plants what was so admirably done in his other works—brought the vast and scattered literature on plant names, and in this case, too, their uses, into coherent order so that the inquisitive scholar can get a foothold. —From the Foreword, Donald H. Pfister, Harvard University and Harvard University Herbaria, Cambridge, Massachusetts The CRC World Dictionary of Medicinal and Poisonous Plants: Common Names, Scientific Names, Eponyms, Synonyms, and Etymology provides the starting point for better access to data on plants used around the world in medicine, food, and cultural practices. The material found in the five volumes has been painstakingly gathered from papers of general interest, reports and records, taxonomic revisions, field studies, herbaria and herbarium collections, notes, monographs, pamphlets, botanical literature, and literature tout court. It includes sources available at various natural history libraries, floras and standard flora works, local floras and local histories, nomenclatural histories, and the International Code of Botanical Nomenclature. Much more than a dictionary, the book provides the names of thousands of genera and species of economically important plants, concise summaries of plant properties, and appropriate observations about medicinal uses. Drawing from a tremendous range of primary and secondary sources, it is an indispensable time-saving guide for all those involved with botany, herbal medicine, pharmacognosy, toxicology, medicinal and natural product chemistry, and agriculture.
