Love at First Click Laurie Davis, 2013-01-08 One in five relationships starts on an online dating site, Laurie Davis provides the first ultimate guide to finding love online.

Single in the City Laura Bilotta, 2017-02-07 Dating can be fun. Or difficult. It can be easy. Or complicated. With millions of singles wanting to date, those who develop successful relationships have equipped themselves with secrets to success. What are these secrets? Just ask dating/relationship expert, Laura Bilotta. Laura has coached and advised thousands of men and women in their quest to find their perfect match. Now, for the first time ever, she has compiled her coaching and advice into one book, Single in the City. Technology has turned the dating world upside down, and traditional dating rules no longer apply. Single in the City addresses all the dating rules when it comes to modern dating, such as online dating, communication and being flexible with your list of partner requirements. In a world where dating is dictated by algorithms and predetermined categories, Laura offers expert and personal guidance to help readers navigate their way through the complicated dating landscape in the ever elusive search for the one. Through personal stories and anecdotes, Single in the City will take you on a dating discovery expedition, helping you to find out who you are and why you attract the people you do. Providing real world examples and thoughtful advice, Laura equips you with the tools you need to find the person you are meant to be

with - and to put an end to your single status!

The Uses of Digital Literacy John Hartley, 2017-07-28 At the heart of this book lies a reappraisal of humanities research and its use in understanding the conditions of a consumer-led society. This is an open, investigative, critical, scientific task as well as an opportunity to engage with creative enterprise and culture. Now that every user is a publisher, consumption needs to be rethought as action not behavior, and media consumption as a mode of literacy. Online social networks and participatory media are often still ignored by professionals, denounced in the press and banned in schools. But the potential of digital literacy should not be underestimated. Fifty years after Richard Hoggart's pioneering *The Uses of Literacy* reshaped the educational response to popular culture, John Hartley extends Hoggart's argument into digital media. Media evolution has made possible the realism of the modern age journalism, the novel and science not to mention mass entertainment on a global scale. Hartley reassesses the historical and global context, commercial and cultural dynamics and the potential of popular productivity through analysis of the use of digital media in various domains, including creative industries, digital storytelling, YouTube, journalism, and mediated fashion. Encouraging mass participation in the evolutionary growth of knowledge, *The Uses of Digital Literacy* shows how today's teenage fad may become tomorrow's scientific method. Hartley claims the time has come for education to catch up with entertainment and for the professionals to learn

from popular culture. This book will stimulate the imagination and stir further research.

Tinder Nightmares Unspirational, 2017-01-21 "Will have you in hysterics over truly epic Tinder fails . . . it captures real life conversations potential couples have exchanged over the app." –Spy
Tinder Nightmares is a hilarious look at some of the most epic fails of the often racy, always ridiculous, "romantic" exchanges on Tinder. The Instagram account of the same name has skyrocketed to popularity for its captivating—and sometimes titillating—ability to capture the real-life conversations between people who are looking to connect with that special someone. Tinder Nightmares is organized by theme, with chapters such as Bad English, Broetry, Strange Requests, Sneak Attacks, and more. This book explores everything from pickup lines to breakups, and all the moments that come in between. It's the perfect gift for anyone who has ever suffered through online dating. Praise for the Tinder Nightmares Instagram account "Taking submissions from womankind worldwide, the account posts the funniest and most tragic lines, which serve to make us simultaneously jubilant with comfort that others out there are enduring the same terror, and weepy at our complete loss of faith in humanity." –Cosmopolitan "So, for anyone who has ever had a nightmarish experience on Tinder, Tinder Nightmares is here to remind you that you're not alone. Because when life gives you innocuously bizarre Tinder messages, make jokes." –HuffPost

Mating Intelligence Unleashed Glenn Geher PhD, Scott Barry Kaufman PhD, 2013-01-30 Psychologists often paint a picture of human mating as visceral, instinctual. But that's not the whole story. In courtship and display, sexual competition and rivalry, we are also guided by what Glenn Geher and Scott Barry Kaufman call Mating Intelligence--a range of mental abilities that have evolved to help us find the right partner. Mating Intelligence is at work in our efforts to form, maintain, and end relationships. It guides us in flirtation, foreplay, copulation, finding and choosing a mate, and many other behaviors. In *Mating Intelligence Unleashed*, psychologists Geher and Kaufman take readers on a fascinating tour of the crossroads of mating and intelligence, drawing on cutting-edge research on evolutionary psychology, intelligence, creativity, personality, social psychology, neuroscience, and more. The authors show that despite what you may read in the latest issue of Maxim, Playboy, Vogue, or GQ, physical attractiveness isn't the whole story. Human mating draws on a range of mental skills and attributes--from the creative use of pick-up lines, to displays of charisma, intelligence, humor, personality, and compassion. Along the way, the authors shed new light on age-old questions, such as: What role does personality play in mating? Which traits are attractive--and which traits repulse? How do people really choose mates? How do men and women deceive each other? How important is emotional intelligence? Why do people create art--and does it have anything to do with sex? Do nice guys really finish last? Since

Glenn Geher coined the term Mating Intelligence in 2006, it has drawn a great deal of media attention, ranging from a Psychology Today cover story to articles in the New Scientist, the Washington Times, the Huffington Post, and elsewhere. Now, in Mating Intelligence Unleashed, readers will have the first full account of this revolutionary new approach to dating, mating, and love.

Data, a Love Story Amy Webb, 2014-01-28 "Amy Webb found her true love after a search that's both charmingly romantic and relentlessly data-driven. Anyone who uses online dating sites must read her funny, fascinating book."—Gretchen Rubin, #1 New York Times bestselling author of The Happiness Project After yet another disastrous date, Amy Webb was preparing to cancel her JDate membership when epiphany struck: her standards weren't too high, she just wasn't approaching the process the right way. Using her gift for data strategy, she found which keywords were digital-man magnets, analyzed photos, and then adjusted her (female) profile to make the most of that intel. Then began the deluge—dozens of men who actually met her own stringent requirements wanted to meet her. Among them: her future husband, now the father of her child.

Think Great Lose Weight Brian Johnson, Christopher VanBerg, Catherine Storing, 2018-06-05 Are you tired of making external changes that go out the window the moment a small wave of problems come your way? Grab your copy today and find out why you eat the way you do, how to stop making decisions that don't support your goals and even better, how to develop healthier habits.

Optimal Cupid Christopher McKinlay, 2014-01-25 An easy-to-implement blueprint from the mathematician who reverse-engineered OkCupid and met the woman of his dreams in 90 days. Christopher McKinlay has been featured in Wired Magazine and Good Morning America for his groundbreaking analysis of OkCupid. For the first time he's showing non-experts how to turn Internet dating on its head. This concise guide will show anyone (straight, gay, male or female) the procedure McKinlay used to meet his fiancée and how the same ideas can transform their lives and bring them from browsing to contact. One summer evening while logged into a supercomputer in Colorado waiting for a large computation, McKinlay was killing time on OkC when he was troubled by a problem: what if large groups of people responded to OkCupid's personality questionnaire in statistically similar ways? He created custom software to scrape data from the site, collecting over 6,000,000 answers to OkC's "match

questions” from more than 20,000 real users. This data made clear he'd been using the site the wrong way. Based on his findings, McKinlay (a mathematics PhD), optimized his own profile. The transformation was profound. He went from showing a “match percentage” of 90% with a few hundred women in the L.A. area to showing 90% or higher with over 30,000 local women. Unsolicited messages from attractive strangers began flooding his inbox. With a foreword by Jon Finkel, McKinlay's insightful how-to will teach you how to benefit from the buried statistical patterns of online romance.

Impression Management Theory and Social Psychological Research James T. Tedeschi, 2013-09-24 Impression Management Theory and Social Psychological Research gathers together the various strands of thinking and research on impression management. This book does not easily lend itself to a singular organization. Not only do the authors deal with very different topics, they sometimes disagree with one another on assumptions and interpretations. Nevertheless, there are chapters that tend to group together. The book can be organized into six parts. Part I, General Theory, consists of chapters that deal primarily with issues related to the reasons for, and specific tactics of, impression management. Part II, Impression Management and Laboratory Research, includes two chapters that make a major contribution to the social psychology of the experiment. Part III, Attitudes as Tactics of Self-

Presentation, centers around the concept of attitudes. The chapters in Part IV, Self-Presentation and Harm-Doing, are organized around the theme of harm-doing. Part V, Bargaining, Distributive Justice, and Impression Management, focuses on the distribution of rewards in groups. Part VI, Individual Differences and Impression Management, is concerned with individual differences such as mental illness, social anxiety, and shyness.

The Emotions Peter Goldie, 2002-08 Peter Goldie opens the path to a deeper understanding of our emotional lives through a lucid philosophical exploration of this surprisingly neglected topic. He illuminates the phenomena of emotion by drawing not only on philosophy but also on literature and science. He considers the roles of culture and evolution in the development of our emotional capabilities. He examines the links between emotion, mood, and character, and places the emotions in the context of such related phenomena as consciousness, thought, feeling, and imagination. He explains how it is that we are able to make sense of our own and other people's emotions, and how we can explain the very human things which emotions lead us to do. A key theme of *The Emotions* is the idea of a personal perspective or point of view, contrasted with the impersonal stance of the empirical sciences. Goldie argues that it is only from the personal point of view that thoughts, reasons, feelings, and actions come into view. He suggests that there is a tendency for philosophers to over-intellectualize the emotions, and investigates how far it is possible to explain emotions in

terms of rationality. Over-intellectualizing can also involve neglecting the centrality of feelings, and Goldie shows how to put them where they belong, as part of the intentionality of emotional experience, directed towards the world from a point of view. Goldie argues that the various elements of emotional experience—including thought, feeling, bodily change, and expression—are tied together in a narrative structure. To make sense of one's emotional life one has to see it as part of a larger unfolding narrative. The narrative is not simply an interpretative framework of a life: it is what that life is. Goldie concludes by applying these ideas in a close study of one particular emotion: jealousy. This fascinating book gives an accessible but penetrating exploration of a subject that is important but mysterious to all of us. Any reader interested in emotion, and its role in our understanding of our lives, will find much to think about here.

The Manipulation of Online Self-Presentation A. Attrill, 2015-03-04 This book explores psychological theories around the ways in which people present themselves online. The role of dispositional and situational factors along with the motivations that drive self-presentation across diverse Internet arenas are considered.

Mating Intelligence Glenn Geher, Geoffrey Miller, 2008 Human intelligence is sexually attractive, and strongly predicts the success of sexual relationships, but the behavioral sciences have usually ignored the interface between intelligence and mating. This is the first serious scholarly effort

to explore that interface, by examining both universal and individual differences in human mating intelligence. Contributors include some of the most prominent evolutionary psychologists and promising new researchers in human intelligence, social psychology, intimate relationships, and sexuality. David Buss' foreword and the opening chapter explore what 'mating intelligence' means, and why it is central to human cognition and sexuality. The book's six sections then examine (1) our mating mechanisms – universal emotional and cognitive adaptations for mating intelligently – that guide mate search, mate choice, and courtship; (2) how mating intelligence strategically guides our choice of mating tactics and partners given different relationship goals, personality traits, forms of deception, and the existence of children; (3) the genetic and psychiatric causes of individual differences in mating intelligence; (4) how we use mental fitness indicators – forms of human intelligence such as creativity, humor, and emotional intelligence – to attract and retain sexual partners; (5) the ecological and social contexts of mating intelligence; (6) integrative models of mating intelligence that can guide future research. Mating Intelligence is intended for researchers, advanced students, and courses in human sexuality, intimate relationships, intelligence research, behavior genetics, and evolutionary, personality, social, and clinical psychology.

How Infants Know Minds Vasudevi Reddy, 2010-03-15 Most psychologists claim that we begin to develop a “theory of mind”—some basic ideas about other

people's minds—at age two or three, by inference, deduction, and logical reasoning. But does this mean that small babies are unaware of minds? That they see other people simply as another (rather dynamic and noisy) kind of object? This is a common view in developmental psychology. Yet, as this book explains, there is compelling evidence that babies in the first year of life can tease, pretend, feel self-conscious, and joke with people. Using observations from infants' everyday interactions with their families, Vasudevi Reddy argues that such early emotional engagements show infants' growing awareness of other people's attention, expectations, and intentions. Reddy deals with the persistent problem of "other minds" by proposing a "second-person" solution: we know other minds if we can respond to them. And we respond most richly in engagement with them. She challenges psychology's traditional "detached" stance toward understanding people, arguing that the most fundamental way of knowing minds—both for babies and for adults—is through engagement with them. According to this argument the starting point for understanding other minds is not isolation and ignorance but emotional relation.

The Politics of Our Selves Amy Allen, 2008 Some theorists understand the self as constituted by power relations, while others insist upon the self's autonomous capacities for critical reflection and deliberate self-transformation. All too often, these understandings of the self are assumed to be incompatible. Amy Allen, however, argues that the capacity for autonomy

is rooted in the very power relations that constitute the self. Her theoretical framework illuminates both aspects of what she calls, following Foucault, the politics of our selves. It analyzes power in all its depth and complexity, including the complicated phenomenon of subjection, without giving up on the ideal of autonomy. Drawing on original and critical readings of a diverse group of theorists, Allen shows how the self can be both constituted by power and capable of an autonomous self-constitution.

Emotional Reason Bennett W. Helm, 2007-08-16 How can we motivate ourselves to do what we think we ought? How can we deliberate about personal values and priorities? Bennett Helm rejects the standard philosophical answers to these questions, which presuppose a sharp distinction between cognition and impulse, and develops a detailed alternative theory both of emotions, desires, and evaluative judgments and of their rational interconnections. The result is an innovative theory of practical rationality and how we can control not only what we do but also what we value and who we are as persons.

The Unguide to Dating Camerin Courtney, Todd Hertz, 2006 Because dating formulas don't always work, two editors for prominent Christian magazines deliver candid conversations on everything from making the first move to Internet dating.

Atlas of Echocardiography Scott D. Solomon, 2008-12-15 The second edition of the Atlas of Echocardiography is a complete reference for cardiology professionals who rely on echocardiographic imaging techniques. The Atlas

represents the collective effort of over 30 leading authorities in the field of cardiology working together to compile the most up-to-date and pertinent information in the field of echocardiography. All areas of echocardiography are covered, from diagnostic basics to cutting edge techniques, such as three-dimensional imaging, contrast imaging, and tissue Doppler imaging. Each figure is accompanied by an informative legend that fully explains the image and its importance. This striking, four color atlas serves as both a resource and a reference and is an invaluable tool to all readers, including cardiologists, non-cardiologist physicians, and sonographers.
