**Smart Resources in Ophthalmology** Parul Ichhpujani, Sahil Thakur, 2018-06-06

This book provides information on how to extract the most from mobile applications and easily adapt and integrate them into daily practice. Today mobile applications that can optimize patient flow, help in examinations, perform anterior/posterior segment imaging, offer differential diagnosis and therapeutic options and even serve as patient drug reminders and councilors are easily available. Most of them have been developed by individuals and as a result lack marketing, even though they are free to download and use. Ophthalmology has always been at the forefront of medicine when it comes to adopting the latest developments – be they lasers, off-label anti-VEGF drugs or biocompatible implants. Mobile phones and tablets have infiltrated our private and professional lives and they are here to stay. As such, this book explores the endless possibilities that mobile computing offers, and introduces the vista of opportunities for providing better care, one download at a time. As part of the series “Current Practices in Ophthalmology” this volume is intended for residents and fellows in-training, as well as general and specialist ophthalmologists.

Sino-Nasal and Olfactory System Disorders Thomas Heinbockel, Balwant Singh Gendeh, 2020-10-21 Our sense of smell is of critical importance in our daily lives and it contributes to our personal wellbeing and safety as well as communication with others. However, it is only when disease or injury impairs

its function that we appreciate the relevance of this sensory modality. During the past three decades, research of the olfactory sense has seen an ever-growing interest in this exciting field of study. This book provides the reader with an overview of the latest developments in sino-nasal and olfactory system disorders and focuses on the most important evidence-based developments in this area. This book addresses disorders, dysfunctions, diseases, and syndromes of the olfactory system ranging from molecular, cellular, and systems to cognitive and behavioral topics. Individual chapters center around recent advances in specific areas of chemosensory pathological conditions, while other chapters focus on technological developments to study the function and dysfunction of the olfactory pathways.
