Handbook of Divination and Prognostication in China Michael Lackner,Zhao Lu,2022-05-20 The first book that systematically explores the manifold aspects of divination and prognostication in traditional and modern China.

Dice and Gods on the Silk Road Brandon Dotson,Constance A. Cook,Zhao Lu,2021 What do dice and gods have in common? What is the relationship between dice divination and dice gambling? This interdisciplinary collaboration situates the tenth-century Chinese Buddhist Divination of Maheśvara within a deep Chinese backstory of divination with dice and numbers going back to at least the 4th century BCE. Simultaneously, the authors track this specific method of dice divination across the Silk Road and into ancient India through a detailed study of the material culture, poetics, and ritual processes of dice divination in Chinese, Tibetan, and Indian contexts. The result is an extended meditation on the unpredictable movements of gods, dice, divination books, and divination users across the various languages, cultures, and religions of the Silk Road--

Stalk Divination ,2017-06-20 This book presents for the first time a full translation and analysis of a newly discovered bamboo divination manual from the fourth century BCE China, called the Stalk Divination Method (Shifa). It was used as an alternative to the better-known Zhouyi (popularly known as the I-Ching). The Shifa manual presents a competing method of interpreting the trigrams, the most basic elements of the distinctive sixty-four hexagrams in the Zhouyi. This newly discovered method looks at the combination of four trigrams as a fluid, changeable pattern or unit reflective of different circumstances in an elite man's life. Unlike the Zhouyi, this new manual provides case studies that explain how to read the trigram patterns for different topics. This method is unprecedented in early China and has left no trace in later Chinese divination traditions. Shifa must be understood then as a competing voice in the centuries before the Zhouyi became the hegemonic standard. The authors of this book have translated this new text and cracked the code of its logic. This new divination will change our understanding of Chinese divination and bring new light to Zhouyi studies.

Fortune-tellers and Philosophers Richard J Smith,2021-11-28 Providing an analysis of Chinese divination as a means of organizing and interpreting reality, Richard Smith examines a wide variety of mantic techniques - from the use of the hallowed Yjing to such popular practices as siting (geomancy), astrology, numerology, physiognomy, the analysis of written characters, meteorological divination, the use of mediums (including spirit-writing), and dream interpretation. As he explains the pervasiveness and tenacity of divination in China, the author explores not only the connections between various mantic techniques but also the relationship between divination and other facets of Chinese culture, including philosophy, science and medicine. He discusses the symbolism of divination, its aesthetics, its ritual aspects, and its psychological and social significance, pointing out that in traditional China divination helped to order the future, just as history helped to order the past, and rituals the present.

Yin-Yang Code Ning Lu,2009-01 I-Ching (), a.k.a. The Book of Change, a Chinese literary classic, is one of the oldest books known as talking magically about fortune from drawing lines so called Yang and Yin. A great number of books about I-Ching have been published in many languages, mostly in Chinese, and significantly in English, and always confined by the original I-Ching's literal interpretation treated this book more like a rare relic than a scientific treatise and wrapped with immense archaeological studies on both detailed historic chronicles and meticulous original textual understanding. As result, foremost logic elegance of I-Ching is hardly touched and never explored. This book, for the first time, will introduce you from a brand new angle by revealing I-Ching as a beautiful mathematical model followed by simple and elegant logic deductions, like a book showing the secrets of magic tricks performed by magicians.

Coping with the Future ,2018-06-12 Coping with the Future: Theories and Practices of Divination in East Asia offers contributions to various practical and theoretical aspects of divination from antiquity to the present in East Asia.

The Other Yijing Tze-ki Hon,2021-11-29 This book explains the different ways that the Yijing (Book of Changes) was used in Chinese society. It demonstrates that the Yijing was a living text used by the educated elite and the populace to address their fear and anxiety.

Divining with Achi and Tārā Jan-Ulrich Sobisch,2019-09-02 Divining with Achi and Tārā by Jan-Ulrich Sobisch with contributions by Solvej Nielsen offers an introduction to and two detailed case studies of Tibetan dice and prayer bead divination. Translations, interviews, and glossaries and appendices enrich an already valuable book.

Living Santería Michael Atwood Mason,2016-06-21 In 1992 Smithsonian anthropologist Michael Atwood Mason traveled to Cuba for initiation as a priest into the Santería religion. Since then he has created an active oricha “house” and has initiated five others as priests. He is a rare combination: a scholar-practitioner who is equally fluent in his profession and his religion. Interweaving his roles as researcher and priest, Mason explores Santería as a contemporary phenomenon and offers an understanding of its complexity through his own experiences and those of its many practitioners. Balancing deftly between a devotee's account of participation and an anthropologist's theoretical analysis, Living Santería offers an original and insightful understanding of this growing religious tradition.

Magico-Medical Means of Treating Ghost-Induced Illnesses in Ancient Mesopotamia JoAnn Scurlock,2005-12-01 This work explores the interaction between magic and medicine in ancient Mesopotamia, as applied specifically to ghosts. Included is a discussion of sin and natural causes in Mesopotamian medicine. Additionally, it transliterates and translates 352 prescriptions designed to cure psychological and physical ailments thought to be caused by ghosts.

Chinese Character Manipulation in Literature and Divination Anne Kathrin Schmiedl,2020-04-06 In Chinese Character Manipulation in Literature and Divination, Anne Schmiedl analyses the historical development and linguistic properties of Chinese character manipulation, focusing on a late imperial work on this subject, the Zichu by Zhou Lianggong (1612–1672).

Divination and Prediction in Early China and Ancient Greece Lisa Ann Raphals,2013 This book is an exploration of divination and prediction in Chinese and Greek antiquity, but it is also a part of two ongoing interdisciplinary and intercultural explorations that have informed my scholarly work. One is the engagement between the disciplines of philosophy and history from a perspective also informed by anthropology. The other is the comparative study of Chinese and Greek antiquity from a shifting viewpoint informed by all three disciplines--

Divining the Etruscan World Jean MacIntosh Turfa,2012-07-16 The Etruscan Brontoscopic Calendar is a rare document of omens foretold by thunder. It long lay hidden, embedded in a Greek translation within a Byzantine treatise from the age of Justinian. The first complete English translation of the Brontoscopic Calendar, this book provides an understanding of Etruscan Iron Age society as revealed through the ancient text, especially the Etruscans' concerns regarding the environment, food, health and disease. Jean MacIntosh Turfa also analyzes the ancient Near Eastern sources of the Calendar and the subjects of its predictions, thereby creating a picture of the complexity of Etruscan society reaching back before the advent of writing and the recording of the calendar.

Fate Calculation Experts Geng Li,2019-03-10 Having long been stigmatized as an immoral and even illegal “superstition”, the popular practice of divination is experiencing a revival in contemporary China. Fate Calculation Experts explores how diviners attempt to achieve legitimation in a society which identifies strongly with modernity, science, and rationality. As well as associating with modern knowledge production systems, diviners build a positive social image for their occupation via claims to moral authority and appeals to “tradition”. Beyond matters of image management, diviners’ efforts towards legitimation also figure in the social relationships and fundamental cultural values they develop in their practice.

Divination and Prediction in Early China and Ancient Greece Professor Lisa Raphals,2014-05-14 Compares the intellectual and social history and past and present contexts of mantic practices (divination) in Chinese and Greek antiquity.

To Become a God Michael J. Puett,2020-10-26 Evidence from Shang oracle bones to memorials submitted to Western Han emperors attests to a long-lasting debate in early China over the proper relationship between humans and gods. One pole of the debate saw the human and divine realms as separate and agonistic and encouraged divination to determine the will of the gods and sacrifices to appease and influence them. The opposite pole saw the two realms as related and claimed that humans could achieve divinity and thus control the cosmos. This wide-ranging book reconstructs this debate and places within their contemporary contexts the rival claims concerning the nature of the cosmos and the spirits, the proper demarcation between the human and the divine realms, and the types of power that humans and spirits can exercise. It is often claimed that the worldview of early China was unproblematically monistic and that hence China had avoided the tensions between gods and humans found in the West. By treating the issues of cosmology, sacrifice, and self-divinization in a historical and comparative framework that attends to the contemporary significance of specific arguments, Michael J. Puett shows that the basic cosmological assumptions of ancient China were the subject of far more debate than is generally thought.

Tantric Traditions in Transmission and Translation David B. Gray,Ryan Richard Overbey,2016 This volume explores the movement of tantric Buddhist traditions through time and space, from the early history of tantric Buddhism to the present day. These studies investigate the development of tantric Buddhist traditions in India, their dissemination into Central and East Asia, and exchanges between tantric Buddhist and rival religious traditions. From the hyper-masculine Buddha to the ritualized bodies of the siddhas, the first chapter traces shifts in Indian Buddhist ideal masculinities. The second chapter explores the intersection of Buddhism and Śaivism in early medieval India through the evolving figure of the yoginī. Another chapter explores how tenth- and eleventh-century scholars and translators in Tibet purified a Buddhist deity that showed signs of Śaiva Hindu origins. Two chapters use often-overlooked Tibetan and Chinese materials to explore the influence of incantations and ritual manuals on the formation of early tantric Buddhist literature. The volume's longest chapter is a detailed history of Vajrayāna Buddhism in Nepal. The work concludes with two studies of hybridity and transformation in East Asia: one on the Homa of the Northern Dipper, a fire ritual which passed from India to China to Japan, adapting to Daoist, Buddhist, and Shintō contexts; and another on the True Buddha School, a contemporary Chinese transformation of Vajrayāna Buddhism.

Divination as Science Jeanette C. Fincke,2016-06-14 There is no doubt that Ancient Near Eastern divination is firmly rooted in religion, since all ominous signs were thought to have been sent by gods, and the invocation of omens was embedded in rituals. Nonetheless, the omen compendia display many aspects of a generally scientific nature. In their attempt to note all possible changes to the affected objects and to arrange their observations systematically for reference purposes, the scholars produced texts that resulted in a rather detailed description of the world, be it with respect to geography (the urban or rural environment on earth, or celestial and meteorological phenomena observed in the sky), biology (the outer appearance of the bodies of humans or animals, or the entrails of sheep), sociology (behavior of people) or others. Based on different divination methods and omen compendia, the question discussed during this workshop was whether the scholars had a scientific approach, presented as religion, or whether Ancient Near Eastern divination should be considered purely religious and that the term “science” is inappropriate in this context. The workshop attracted a large audience and lively discussion ensued. The papers presented in this volume reflect the focus of the sessions during the workshop and are likely to generate even more discussion, now that they are published.
