Jewelry from the Iron Age II Levant Amir Golani, 2013 Jewelry has always had an irresistible allure yet in the past also had a significance and function within society that went far beyond ornamentation. Jewelry is an important, if often forgotten facet of material culture. Its study is interdisciplinary, involving archaeology, anthropology, art history, historical/textual studies, and research of materials and manufacturing techniques. While the renowned jewelry from regions such as Egypt and Mesopotamia has been studied, that of the southern Levant has received only limited attention, yet research of its archaeological/contextual, technological and socio-cultural perspectives is illuminating. The book is a final publication of the author's doctoral dissertation made available to the archaeological and academic community at large. The book is geared to be a working tool for archaeologists dealing in this period and region and to scholars who study its arts and crafts. It provides a handy typological structure for jewelry classification as well as a comprehensive and useful catalogue for research in this and related fields. In addition, the book illustrates the significance, meaning and functions of jewelry and the development of the jeweler's craft in the southern Levant during the first and second millennia BCE.

Data Mining Techniques for the Life Sciences Oliviero Carugo, Frank Eisenhaber, 2016-08-23 Most life science researchers will agree that biology is not a truly theoretical branch of science. The hype around computational biology and bioinformatics beginning in the nineties of the 20th century was to be short lived (1, 2). When almost no value of practical importance such as the optimal dose of a drug or the three-dimensional structure of an orphan protein can be computed from fundamental principles, it is still more straightforward to determine them experimentally. Thus, experiments and observations do generate the overwhelming part of insights into biology and medicine. The extrapolation depth and the prediction power of the theoretical argument in life sciences still have a long way to go. Yet, two trends have qualitatively changed the way how biological research is done today. The number of researchers has dramatically grown and they, armed with the same protocols, have produced lots of similarly structured data. Finally, high-throughput technologies such as DNA sequencing or array-based expression profiling have been around for just a decade. Nevertheless, with their high level of uniform data generation, they reach the threshold of totally describing a living organism at the biomolecular level for the first time in human history. Whereas getting exact data about living systems and the sophistication of experimental procedures have primarily absorbed the minds of researchers previously, the weight increasingly shifts to the problem of interpreting accumulated data in terms of biological function and biomolecular mechanisms.

Spinoza's Ethics Beth Lord, 2010-02-28 Everything you need to know about Spinoza's Ethics in one volume. The Ethics presents a complete metaphysical, epistemological and ethical world-view that is immensely inspiring. However, it is also an extremely difficult text to read. This book takes readers through the text, stopping at the most perplexing passages to explain key terms, unfold arguments, offer concrete examples and raise questions for further thought. It is designed to be read alongside the Ethics, enabling students to think critically about Spinoza's views and build an understanding of his complex system.

Scrupulosity (al-Wara ') in Early Islam Mateusz Wilk, 2019-12-31 This book aims to discuss religious scrupulousness (al-wara') - an important phenomenon in Islamic spirituality and tradition in the 3rd/9th century. Through the study of hadith compilations devoted to piety the author tries not only to define the concept of scrupulousness itself, but also to present the world of Muslim scholars who composed these collections of traditions. An important aspect of the book will be a discussion of a possible social impact of religious scrupulousness as well as of its cultural context. Thus, another examined subject will be the link of religious scrupulousness with the Islamic eschatology, as well as with the visions of the Hereafter. On the whole, religious scrupulousness will be analysed as one of the portents of changes occurring in the Islamic society and civilisation in the 3rd/9th century, when new forms of piety are accompanied by apocalyptic fears and anxieties.

Preventing Corporate Accidents R B Whittingham, 2012-06-25 The passing of the Corporate Manslaughter and Corporate Homicide Bill in the UK and increasing public and investor pressure for good Corporate Governance and Corporate Social Responsibility, means organizations now, more than ever, need to ensure they do all they can to prevent major accidents. However, past experience shows that just implementing safety management systems is not enough and this book makes the case for a more holistic and ethical approach to improving corporate systems as a whole. *Preventing Corporate Accidents* shows how major accidents can result from human error and defects in corporate systems. The book describes accident prevention strategies, from safety culture, safety management systems, foresight and planning to safety regulations, corporate ethics, corporate social responsibility and the learning organization. Barry Whittingham illustrates with international case studies from various industries how and why these defences have failed in the past, and more importantly, how to strengthen corporate systems to prevent future major accidents. The case studies include: The loss of the space shuttle Columbia Infant heart surgery at Bristol Royal Infirmary The Davis-Besse nuclear power plant incident The fire and explosion at the Conoco-Phillips Humber oil refinery Herald of Free Enterprise and Southall rail accident manslaughter prosecutions This book is essential reading for all those with a professional interest in health and safety management, the control of major risk and accident prevention, in particular for directors, senior managers and health & safety professionals in high-hazard industries and public operations, such as nuclear, chemicals, construction, oil and gas, energy, manufacturing and transportation. Barry Whittingham has worked as a senior manager, design engineer and consultant for the chemical, nuclear, offshore, oil and gas, railway and aviation sectors. He developed a career as a safety consultant specializing in the human factors aspects of accident causation. Barry is a Fellow of the Safety and Reliability Society.

Annales Du Service Supreme Council of Antiquities, 2013-03-31 For centuries, Egyptian civilization and its antiquities have inspired passionate interest. Archaeologists, engineers, astronomers, poets, painters, people of different cultures, and travelers have been riveted by Egypt's ancient monuments. How much do we really know about these awe-inspiring wonders of the ancient world? This publication provides an up-to-date account of archaeology in the land of the pharaohs, including new discoveries and recent studies. This authoritative volume remains the definitive source for the findings of the various archaeological excavations undertaken in Egypt. For more than a hundred years, the *Annales du Service* has been studied by Egyptologists, students, and laypersons alike. Published under the auspices of Egypt's Supreme Council of Antiquities, its contributors include some of the most well-known Egyptologists in the world covering a broad range of archaeological disciplines and spectrums.

Ethnic Identity and Minority Protection Thomas W. Simon, 2013-12 In *Ethnic Identity and*

Minority Protection: Designation, Discrimination, and Brutalization, Thomas W. Simon examines a new framework for considering ethnic conflicts. In contrast to the more traditional theories of justice, Simon's theory of injustice shifts focus away from group identity toward group harms, effectively making many problems, such as how to define minorities in international law, dramatically more manageable. Simon argues that instead of promoting legislative devices like proportional representation for minorities, it is more fruitful to seek adjudicative solutions to racial and ethnic-related conflicts. For example, resources could be shifted to quasi-judicial human-rights treaty bodies that have adopted an injustice approach. This injustice approach provides the foundation for Kosovo's case for remedial secession, and helps to sort out the competing entitlement claims of Malays in different countries. Indeed, the priority of Thomas W. Simon's *Ethnic Identity and Minority Protection* is to ensure the tales of designation and discrimination told at the beginning of the work do not become the stories of brutalization told at the end. In short, the challenge tackled in this text is to assure that reason reigns over hate.

Bioinformatics in Agriculture Pradeep Sharma, Dinesh Yadav, R.K. Gaur, 2022-04-28 Bioinformatics in Agriculture: Next Generation Sequencing Era is a comprehensive volume presenting an integrated research and development approach to the practical application of genomics to improve agricultural crops. Exploring both the theoretical and applied aspects of computational biology, and focusing on the innovation processes, the book highlights the increased productivity of a translational approach. Presented in four sections and including insights from experts from around the world, the book includes: Section I: Bioinformatics and Next Generation Sequencing Technologies; Section II: Omics Application; Section III: Data mining and Markers Discovery; Section IV: Artificial Intelligence and Agribots. Bioinformatics in Agriculture: Next Generation Sequencing Era explores deep sequencing, NGS, genomic, transcriptome analysis and multiplexing, highlighting practices for reducing time, cost, and effort for the analysis of gene as they are pooled, and sequenced. Readers will gain real-world information on computational biology, genomics, applied data mining, machine learning, and artificial intelligence. This book serves as a complete package for advanced undergraduate students, researchers, and scientists with an interest in bioinformatics. Discusses integral aspects of molecular biology and pivotal tool for molecular breeding Enables breeders to design cost-effective and efficient breeding strategies Provides examples of innovative genome-wide marker (SSR, SNP) discovery Explores both the theoretical and practical aspects of computational biology with focus on innovation processes Covers recent trends of bioinformatics and different tools and techniques
