

Lunar Madness

Aimée Crocker Gouraud

The Moon and Madness Niall McCrae,2011-10-19 Lunacy, the legendary notion of minds unhinged by the moon, continues to captivate the popular imagination. Although it violates the assumptions of modern science and psychiatry, such belief remains common among mental health workers. Furthermore, several studies have found a small, unexplained correlation between behaviour and the lunar cycle. The book is divided into two parts. It begins with a historical account of the lunacy concept, followed by an investigation of hypothetical mechanisms for a lunar effect.

Dark Side of the Moon Gerard Degroot,2006-11 Discusses the myths constructed by the Eisenhower, Kennedy, and Johnson administrations that were used to exploit American fears of what Russians would do in space.

Moon Madness J. W. Hicks,2021-11-27 What would you do if you found out that almost everything that your government has told you was a lie? Jeremy Carlson and his fiancé , Brittany Parsons, decide to take a vacation in a Lunar Cabin. Everything was going great, until strange things started happening after they went to sleep. Are they being abducted? Or are they catching Moon Madness, a strange phenomenon thought to be caused by the lower gravity of the moon? After a fateful meeting with a guy named Zack Martial, things become a lot clearer. They are now determined to expose the governing body of the Earth and Moon known as: The World Council. Will the three of them succeed, or will things go horribly wrong?

The Lunar Effect Arnold L. Lieber,1978 A practicing psychiatrist presents new scientific evidence which indicates that the moon may influence not only man's geophysical environment but his day-to-day behavior as well.

Moon Madness Chris Baker,2008-01 The Interplanetary Federation is suffering from acts of terrorism. The only clues suggest that there is a link with SAGE (The School for Advanced Galactic Education) on Earth Moon. Archie is sent, with two friends, as students to the school to look for clues. From the moment they leave their home planet of Concordia they are faced with danger and difficulties. At SAGE they have to work with other students and they learn about power - the power of knowledge, of fear and 'people power'. They use their knowledge to build a moon buggy which they take out onto the Moon's surface. On the trip the buggy is sabotaged and the boys are scared by events. They get lost and are rescued by the Lunar pods. On another adventure they travel by time machine to Berlin in 1989 and observe 'people power' at work. They are caught by the Stasi, but released in time for the excitement of the Fall of the Wall. More adventures follow. Finally, at a meeting of the Interplanetary Council, the mind behind the acts of terrorism makes a bid for supreme power. Archie leads the struggle to stop the madness.

Moon Madness (Dazon Agenda #4) [SciFi Romance] Aurelia Skye,Juno Wells,2016-10-18 When General Orix Monash defected from the Dazon armada to protect Earth, he expected some fear and suspicion. What he didn't expect was to find his mate among the Earth women at the Moon's consulate. Mary Catherine Jones is the caretaker for the orphaned human-Dazon hybrid babies, but when he looks at Mac, he wants to take care of her forever. She feels the pull too, and they're quickly drawn together—and drawn into a plot that involves a traitor and the first battle in Emperor Aryk's bid to steal Earth women for mating purposes. Each book in the Dazon Agenda series focuses on a different couple while expanding the overarching plot. It is recommended to read the books in order. Search Terms: kidnapped women, breeders, war with aliens, alien civil war, alien invasion, genetic engineering, multicultural romance, contemporary romance, suspense, medical, alien science and technology, space battle, adoption, babies, triplets, marriage, family, love, passion, romance, fighting, war, alien invasion, scifi romance, dazon series, fated mates, alien romance

Lunar Croakies (Enchanting Inquiries, Book 13) Sam Cheever,2021-12-12 I'd heard the term "howl at the moon" before. But how was I supposed to know my little demon dog, Vel, would turn it into a compulsion? Moon Madness has hit Croakies like an out-of-control freight train. My demon dog is howling at the moon. Somebody ate one of my neighbors. And things are falling apart in the city of Enchanted. Buckle up lunar lovers. This ride is about to get bumpy

Pseudoscience and the Paranormal Terence Hines,2010-09-30 Television, the movies, and computer games fill the minds of their viewers with a daily staple of fantasy, from tales of UFO landings, haunted houses, and communication with the dead to claims of miraculous cures by gifted healers or breakthrough treatments by means of fringe medicine. The paranormal is so ubiquitous in one form of entertainment or another that many people easily lose sight of the distinction between the real and the imaginary, or they never learn to make the distinction in the first place. In this thorough review of pseudoscience and the paranormal in contemporary life, psychologist Terence Hines teaches readers how to carefully evaluate all such claims in terms of scientific evidence.Hines devotes separate chapters to psychics; life after death; parapsychology; astrology; UFOs; ancient

astronauts, cosmic collisions, and the Bermuda Triangle; faith healing; and more. New to this second edition are extended sections on psychoanalysis and pseudopsychologies, especially recovered memory therapy, satanic ritual abuse, facilitated communication, and other questionable psychotherapies. There are also new chapters on alternative medicine, which is now marketed in our drug stores, and on environmental pseudoscience, with special emphasis on the evidence that certain technologies like cell phones or environmental agents like asbestos cause cancer. Finally, Hines discusses the psychological causes for belief in the paranormal despite overwhelming evidence to the contrary. This valuable, highly interesting, and completely accessible analysis critiques the whole range of current paranormal claims.

Earth-Moon Relationships Cesare Barbieri, Francesca Rampazzi, 2013-06-29 The Conference on the Earth-Moon relationships brought together a number of distinguished scientists from different fields - such as Astronomy, Celestial Mechanics, Chemistry - but also scholars of Literature and Art, to discuss these relationships, their origins, and their influence on human activities and beliefs.

Moon Edgar Williams, 2014-06-15 Long before a rocket hit the Man in the Moon in the eye in Georges Méliès's early film *Le Voyage dans la Lune*, the earth's lone satellite had entranced humans. We have worshipped it as a deity, believed it to cause madness, used it as a means of organizing time, and we now know that it manipulates the tides—our understanding of the moon continues to evolve. Following the moon from its origins to its rich cultural resonance in literature, art, religion, and politics, *Moon* provides a comprehensive account of the significance of our lunar companion. Edgar Williams explores the interdependence of the Earth and the moon, not only the possibility that life on Earth would not be viable without the moon, but also the way it has embedded itself in culture. In addition to delving into roles the moon has played in literature from science fiction and comics to poetry, he examines how Elizabeth I was worshipped as the moon goddess Diana, the moon's place in folklore and astrology, and humanity's long-standing dream of inhabiting its surface. Filled with entertaining anecdotes, this book is the kind of succinct, witty, and informative look at everything lunar that only comes around once in a blue moon.

Moon Signs Donna Cunningham, 1988-12-13 If you think your astrological fate is sealed by your Sun sign, think again! Your emotions, instincts, intuition, and most private passions are dominated by your Moon sign. In this eye-opening volume, world-famous astrologer and therapist Donna Cunningham unravels the often bewildering effects of lunar influence: a person's potential for intimacy, sense of security, family ties, susceptibility to indulgence in food or drink, career ambition, as well as how men and women respond differently to the same lunar promptings in love and life. Cunningham provides all the information you need to determine your own and others' Moon signs—and analyze their power. *Moon Signs* also charts the daily, monthly, and yearly courses of the moon, which create those predictable mood swings—our “emotional weather.” The time-honored tradition of astrology has come into its own as a resource for human development and spiritual insight. For astrological novices and veterans alike, Cunningham's invaluable guide will pave the way to a more profound understanding of the uncharted and sometimes dark side of the soul.

LIFE, 1958-12-15 *LIFE* Magazine is the treasured photographic magazine that chronicled the 20th Century. It now lives on at LIFE.com, the largest, most amazing collection of professional photography on the internet. Users can browse, search and view photos of today's people and events. They have free access to share, print and post images for personal use.
