Integrated Approaches to Drug and Alcohol Problems Willm Mistral, 2016-04-14 Integrated Approaches to Drug and Alcohol Problems: Action on Addiction provides a pathway through the field of addiction, giving a clear description of points along that path, from the beginning of problematic use of drugs and alcohol, to treatment, support, recovery and reintegration in society. The book illustrates the principle of integrated approaches to tackling the rise in problems with addiction.

Practical applications of these approaches are demonstrated in the work of UK charity Action on Addiction, one organisation which has been influenced by, and contributed to, the research and practice of the authors. The interventions illustrated within Integrated Approaches to Drug and Alcohol Problems demonstrate how the findings of international research can be brought together to provide effective services for individuals, families and communities suffering from addiction-related problems. Some of the foremost internationally recognized addiction researchers, clinicians and trainers from the UK, USA and Canada have contributed chapters to this book. It will be of interest to all those working in the field of drug and alcohol addiction, including counsellors and therapists, as well as GPs, nurses and public health officers. Integrated Approaches to Drug and Alcohol Problems will also have general appeal to anyone studying Psychology and Mental Health courses at undergraduate or postgraduate level, plus those affected by addiction.

Machine Learning Applications in Electronic Design Automation Haoxing Ren, Jiang Hu, 2023-01-01
□ This book serves as a single-source reference to key machine learning (ML) applications and methods in digital and analog design and verification. Experts from academia and industry cover a wide range of the latest research on ML applications in electronic design automation (EDA), including analysis and optimization of digital design, analysis and optimization of analog design, as well as functional verification, FPGA and system

level designs, design for manufacturing (DFM), and design space exploration. The authors also cover key ML methods such as classical ML, deep learning models such as convolutional neural networks (CNNs), graph neural networks (GNNs), generative adversarial networks (GANs) and optimization methods such as reinforcement learning (RL) and Bayesian optimization (BO). All of these topics are valuable to chip designers and EDA developers and researchers working in digital and analog designs and verification.

This Was Our Pact Ryan Andrews, 2019-06-11 It's the night of the annual Autumn Equinox Festival, when the town gathers to float paper lanterns down the river. Legend has it that after drifting out of sight, they'll soar off to the Milky Way and turn into brilliant stars. This year, Ben and his classmates are determined to find out where those lanterns really go, and they made a pact with two simple rules: No one turns for home. No one looks back. The plan is to follow the river on their bikes for as long as it takes to learn the truth, but it isn't long before the pact is broken by all except for Ben, and (much to Ben's disappointment) Nathaniel, the one kid who just doesn't seem to fit in. Together, Nathaniel and Ben will travel down a winding road full of magic, wonder, and unexpected friendship*. *And a talking bear.

The Devils' Alliance Roger Moorhouse, 2014-10-14 antly, the pact laid the groundwork for Soviet control of Eastern Europe, a power grab that would define the post-war order. Drawing on memoirs, diaries, and official records from newly opened Soviet archives, The Devils' Alliance is the

authoritative work on one of the seminal episodes of World War II. In his characteristically rich and detailed prose, Moorhouse paints a vivid picture of the pact's origins and its enduring influence as a crucial turning point, in both the war and in modern history.

Environmental Planning Handbook Tom

Daniels,2017-11-08 Environmental protection is a global issue. But most of the action is happening at the local level. How can communities keep their air clean, their water pure, and their people and property safe from climate and environmental hazards? Newly updated, The Environmental Planning Handbook gives local governments, nonprofits, and citizens the guidance they need to create an action plan they can implement now. It's essential reading for a post-Katrina, post-Sandy world.

The UAW's Southern Gamble Stephen J.

Silvia,2023-05-15 The UAW's Southern Gamble is the first in-depth assessment of the United Auto Workers' efforts to organize foreign vehicle plants (Daimler-Chrysler, Mercedes-Benz, Nissan, and Volkswagen) in the American South since 1989, an era when union membership declined precipitously. Stephen J. Silvia chronicles transnational union cooperation between the UAW and its counterparts in Brazil, France, Germany, and Japan and documents the development of employer strategies that have proven increasingly effective at thwarting unionization. Silvia shows that when organizing, unions must now fight on three fronts: at the worksite; in the corporate boardroom; and in the political realm. The UAW's Southern Gamble makes clear that the UAW's failed

campaigns in the South can teach hard-won lessons about challenging the structural and legal roadblocks to union participation and effectively organizing workers within and beyond the auto industry.

UK Banks and the Lessons of the Great Financial Crisis Adam Barber, 2021-05-10 This book demonstrates the variation in the reaction of the UK's 'big four' banks – RBS, Lloyds, Barclays and HSBC – to the Great Financial Crisis 2008. Over a decade on from the financial crisis, this book asks: have banks in the UK learned lessons from the crisis? Bank learning in the UK after the Great Financial Crisis is something we need to know more about. Whether banks are now safer and more likely to aid rather than disrupt the economy are important questions of social relevance. Through a documentary analysis of Britain's 'big four' banks in the post-crisis decade (2008–2018), this book demonstrates that while some institutions have become more risk averse and display positive signs of learning, others have shown little evidence of change. The book uses notions of agency, path dependency and structural competitive pressures to explain these inter-bank variations of behaviour. This book contributes to wider post-crash structural debates about growth, markets, and regulatory reform, showing how the agency of banks has played a vital role in driving the reform process.

Distributed Graph Analytics Unnikrishnan Cheramangalath, Rupesh Nasre, Y. N. Srikanth, 2020-04-17 This book brings together two important trends: graph algorithms and high-

performance computing. Efficient and scalable execution of graph processing applications in data or network analysis requires innovations at multiple levels: algorithms, associated data structures, their implementation and tuning to a particular hardware. Further, programming languages and the associated compilers play a crucial role when it comes to automating efficient code generation for various architectures. This book discusses the essentials of all these aspects. The book is divided into three parts: programming, languages, and their compilation. The first part examines the manual parallelization of graph algorithms, revealing various parallelization patterns encountered, especially when dealing with graphs. The second part uses these patterns to provide language constructs that allow a graph algorithm to be specified. Programmers can work with these language constructs without worrying about their implementation, which is the focus of the third part. Implementation is handled by a compiler, which can specialize code generation for a backend device. The book also includes suggestive results on different platforms, which illustrate and justify the theory and practice covered. Together, the three parts provide the essential ingredients for creating a high-performance graph application. The book ends with a section on future directions, which offers several pointers to promising topics for future research. This book is intended for new researchers as well as graduate and advanced undergraduate students. Most of the chapters can be read independently by those familiar with the

basics of parallel programming and graph algorithms. However, to make the material more accessible, the book includes a brief background on elementary graph algorithms, parallel computing and GPUs. Moreover it presents a case study using Falcon, a domain-specific language for graph algorithms, to illustrate the concepts.

The Pact Karina Halle, 2014 *The Pact is a full-length, standalone friends to lovers contemporary adult romance* It all started with a pinky swear...Linden McGregor is tall, rugged, and gunslinger handsome; a helicopter pilot with a Scottish brogue and charm to spare. He's also one of Stephanie Robson's best friends and has fit into that box for as long as she's known him. Beautiful, funny and an ambitious businesswoman (with one hell of an ass), Stephanie Robson is one of Linden McGregor's best friends and has fit into that box for as long as he's known her. But some relationships can't be boxed, can't be classified, can't be tamed. Back in their mid-twenties and tired of the competitive hit-or-miss dating scene of San Francisco, Steph and Linden made a pact to marry each other if neither one of them were in a serious relationship by the time they hit thirty. It sounded like fun and games at the time but as the years to thirty tick past and lovers come and go out of their lives, the pact becomes larger than life. Sex is inevitable. Friendships are tested. Hearts are on the line. The pact is about to change everything. Note: due to the dirty talk and sexy times, The Pact is not meant for anyone under the age of 18.

Development-Oriented Corporate Social

Responsibility: Volume 2 Dima Jamali,Charlotte Karam,Michael Blowfield,2017-09-08 This volume provides a platform for localized perspectives on CSR in developing countries across the globe. The chapters bring local context and business to the forefront and highlight the efforts spearheaded by indigenous actors from within the developing world. They present insights from developing countries through successful and less successful examples of locally-led CSR efforts. Together, these perspectives capture the complex paradoxes of CSR in developing countries and highlight common features in national institutions across the developing world, such as weak political and regulatory institutions, that shape local CSR initiatives and often limit its developmental impact.The editors argue the need to embrace partnership models that leverage the strengths of different actors to promote effective development and tackle the complex challenges facing the developing world. This important series will be the reference source for academics, practitioners, policy-makers and NGOs involved in development-oriented CSR.

Media Independence James Bennett, Niki Strange, 2014-11-20 Media independence is central to the organization, make-up, working practices and output of media systems across the globe. Often stemming from western notions of individual and political freedoms, independence has informed the development of media across a range of platforms: from the freedom of the press as the fourth estate and the rise of Hollywood's Independent studios and Independent television in Britain, through to the importance of Indy labels in music and gaming and the increasing importance

of independence of voice in citizen journalism. Media independence for many, therefore, has come to mean working with freedom: from state control or interference, from monopoly, from market forces, as well as freedom to report, comment, create and document without fear of persecution. However, far from a stable concept that informs all media systems, the notion of media independence has long been contested, forming a crucial tension point in the regulation, shape, size and role of the media around the globe. Contributors including David Hesmondhalgh, Gholam Khiabany, José van Dijck, Hector Postigo, Anthony Fung, Stuart Allan and Geoff King demonstrate how the notion of independence has remained paramount, but contested, in ideals of what the media is for, how it should be regulated, what it should produce and what working within it should be like. They address questions of economics, labor relations, production cultures, ideologies and social functions.

from an impoverished and polluted island to the
world's beacon of environmental progress has been

nothing short of miraculous. Miracles, however, are hard to repeat elsewhere, therefore, we are very fortunate that Singapore's environmental transformation was not at all a miracle. Instead, it happened thanks to clever and consistent strategies and brilliant execution. Over the last 30 years, as I got to gradually know the Singapore miracle workers and their methods, I often prayed that other jurisdictions would learn the steps involved. This book about the Singapore miracle provides an opportunity for environmental leaders everywhere to extract the policies and procedures they need to bring about progress in their own jurisdiction. Dr Andrew Benedek Founder, Chairman and CEO of ZENON Environmental Inc. and Anaergia Inc. Winner of the inaugural Lee Kuan Yew Water Prize in 2008 For a seriously resource-constrained nation, Singapore has come a long way since its independence in 1965. Very few people, if any, 50 years ago would have predicted that this city-state would become the envy of the world by 2015. While everyone knows and admires the remarkable progress of the past half century, not many people are familiar with the achievements in the field of environment and the enabling conditions that made this possible. One of the very few serious studies that is available is Tan Yong Soon's earlier book Clean, Green and Blue: Singapore's Journey Towards Environmental and Water Sustainability. The present text is a worthy complement that adds to the in-depth analysis of this important journey. The book is strongly recommended. Professor Asit K Biswas Distinguished Visiting Professor Lee Kuan Yew School of Public Policy, Singapore and Co-

founder, Third World Centre for Water Management, Mexico This book charts a 50-year visionary journey that began on the right foot, with recognition that sustainable economic growth and a clean environment are mutually reinforcing goals. Over these decades, Singapore has moved from cleaning up the land and rivers, through controlling pollution and meeting water needs, to the current use of cutting-edge research and technology to build clean and renewable energy for the future. With the city-state now ranking near the top of the world in terms of environmental standards, the book offers many lessons for other countries looking for ways to meet the growing demand for water and energy while preserving a health-promoting environment. Dr Margaret Chan Director-General, World Health Organization Singapore celebrates its 50th anniversary of nationhood in a milestone year as countries of the world come together to agree a climate-safe path to sustainable development. Since its establishment, Singapore has sought to leverage sound environmental stewardship and social engagement into prosperity and growth. Singapore has been remarkably successful. The 50 Years of Environment publication demonstrates how progressive policy such as ecologically sound natural resource management, incentives to innovate and emphasis on clean development are at the heart of this vibrant modern economy. This is a welcome addition to the global dialogue on development as a powerful case study for what is possible. As governments move towards a set of Sustainable Development Goals and a new, universal

climate change agreement in Paris this year, the knowledge and experiences in this book showcase real world policy success and inspire the world. Ms Christiana Figueres Executive Secretary, UN Framework Convention on Climate Change Singapore's success in becoming a developed country and, at the sametime, taking good care of its environment, is a vindication of what we were trying to achieve at the 1992 Earth Summit. This important book explains how Singapore did it and outlines present and future challenges as Singapore continues its journey into environmental sustainability and sustainable development. Professor Tommy Koh Chairman, Preparatory Committee and Chairman, Main Committee UN Conference on Environment and Development 2006 Champion of the Earth, awarded by UNEP 2006 President's Award for the Environment, Singapore Singapore is well known globally for its brilliant economic success story. It deserves to be equally well-known for its environmental success story. It is truly remarkable that unlike other successful economies, Singapore did not sacrifice its environment in pursuit of economic growth. This is why this book edited by Tan Yong Soon could not be more timely. The world can learn a lot of lessons from this volume. Professor Kishore Mahbubani Dean, LKY School of Public Policy, National University of Singapore, and author of The Great Convergence: Asia, the West, and the Logic of One World With a population density of around 7,500 people to the square kilometre, Singapore is one of the most densely populated countries on Earth. This book of essays by some of those most closely involved shows how

the country evolved through half a century of commitment and foresight into one of the world's most liveable cities with green spaces and fresh water and how it is addressing present environmental challenges to develop sustainable strategies and solutions.
