The M60 Machine Gun Kevin Dockery,2012-11-20 The US M60 General Purpose Machine Gun, known as “the Pig,” was developed in the years after World War II from two revolutionary German designs. Adopted in 1957, the M60 came into its own in the jungles, hamlets, and city streets of Southeast Asia during the Vietnam War. “Humping the Pig” became common in US military squads, with at least one soldier equipped with an M60 and every squad member carrying ammunition for it. The M60 design transformed infantry tactics as squads took advantage of the immediate volume of fire offered by the design. Although it has now been replaced by the M240 series of weapons in US infantry and mechanized units, the M60 is still in common use with the US armed forces. Meanwhile, its iconic status has been assured by its frequent appearance in many popular films and television shows, from Full Metal Jacket to The A Team. Featuring specially commissioned full-color artwork, this is the full story of the M60, the innovative squad base-of-fire weapon that has equipped the US military from the jungles of Vietnam to the deserts of Iraq.

Browning .30-caliber Machine Guns Gordon L. Rottman,2014-02-20 First adopted in 1917, the rugged and reliable Browning .30-caliber machine gun remained in US service into the Vietnam era,

and is still occasionally found in use elsewhere even today. Produced in both water-cooled and air-cooled versions, it has been employed in every imaginable role for a machine gun – antipersonnel, antiaircraft, mounted on aircraft as both defensive and offensive armament, defensive armament aboard vehicles (armored and soft-skin), mounted on watercraft, and others. Employing gripping first-hand testimony and featuring specially commissioned illustrations and detailed photographs, many in color, this lively study of the Browning .30-caliber machine gun reveals the origins, combat history and legacy of this versatile and dependable weapon.

Complete Guide to the Hotchkiss Machine Gun An Instructor, 2012-03-29 The French designed Hotchkiss machine gun was officially adopted by the British Army as a light machine gun to serve alongside the Lewis gun. However, the Lewis went to infantry units, whilst the Hotchkiss was issued to cavalry and armoured units. This book is extremely well illustrated with photographs and line drawings, covering all aspects of the weapon. The gun is described completely, and anyone who has read the pamphlet will be able to use a Hotchkiss gun. The interesting feed mechanism is shown in the photographs as is the ammunition strip and its box. Care and cleaning are prescribed so that the weapon remained able to fire under all conditions. There is also detailed instruction on all possible stoppages and the immediate action to clear such problems. An important section in this book gives a tactical insight into the use of the weapon as experienced during the First World War and shows how machine guns should be viewed in the mind of the user.

German Machine Guns of World War I Stephen Bull,2016-05-19 World War I's defining weapon for many, Germany's MG 08 machine gun won a formidable reputation on battlefields from Tannenberg to the Somme. Although it was a lethally effective weapon when used from static positions, the MG 08 was far too heavy to perform a mobile role on the battlefield. As the British and French began to deploy lighter machine guns alongside their heavier weapons, the Germans fielded the Danish Madsen and British Lewis as stopgaps, but chose to adapt the MG 08 into a compromise weapon – the MG 08/15 – which would play a central role in the revolutionary developments in infantry tactics that characterized the last months of the conflict. In the 1940s, the two weapons were still in service with German forces fighting in a new world war. Drawing upon eyewitness battlefield reports, this absorbing study assesses the technical performance and combat record of these redoubtable and influential German machine guns, and their strengths and limitations in a variety of battlefield roles.

The Browning Automatic Rifle Robert R. Hodges Jr., Robert R. Hodges, 2012-04-20 For nearly fifty years the hard-hitting, mobile Browning Automatic Rifle, or BAR, served in US infantry units as a light squad automatic “base of fire” weapon, providing quick bursts of concentrated fire. Designed in World War One, it didn't reach the front until September 1918. In the interwar years US forces used the BAR across the world, from China to Nicaragua. It also became a favorite of notorious gangsters like Clyde Barrow and Bonnie Parker, who prized its ability to punch through police armored cars. At the outset of World War II the US armed forces decided to adapt the BAR for a light machine gun role. The BAR was not without its flaws; it was heavy and difficult to dismantle and reassemble, and it didn't cope well with sustained fire. Nevertheless, the BAR saw action in every major theater of World War II and went on to be used in Korea and in the opening stages of the Vietnam War. Featuring arresting first-hand accounts, specially drawn full-color artwork and close-up photographs, many in color, this lively study offers a vivid portrait of this powerful, long-lived and innovative weapon that saw service with US and other forces across the world for much of the 20th century.
