Conjuring With Computation: A Manual Of Magic And Computing For Beginners Paul Curzon, Peter William Mcowan, 2023-05-25 The team behind Computer Science for Fun (CS4FN), brings you Conjuring with Computation: A Manual of Magic and Computing for Beginners. Develop your skills as a magician while also learning the basics of computer science by exploring its links to magic. Each chapter explains how to do a simple magic trick, step-by-step, then uses the trick to introduce linked fundamental ideas in computer science in a fun way. By reading the book you will learn to do self-working tricks, be able to hold magic shows, create your own versions of tricks, and with creativity even invent your own. We cover: The book includes profiles of computer scientists, alongside magicians with links to technology, through history. Master conjuring and thinking computationally.

Geometric Magic Squares Lee C. F. Sallows, 2013 Traditional magic squares employ a chessboard-like arrangement of numbers in which the total of all rows, columns, and diagonals add up to the same number. This innovative approach by a Dutch engineer challenges puzzlists to think two dimensionally by replacing numbers with colorful geometric shapes. Dozens of creative puzzles, suitable for ages 12 and up.

Mathematics for the Million: How to Master the Magic of Numbers Lancelot Hogben, 1993-09-17 It makes alive the contents of the elements of mathematics.—Albert Einstein Taking only the most elementary knowledge for granted, Lancelot Hogben leads readers of this famous book through the whole course from simple arithmetic to calculus. His illuminating explanation is addressed to the person who wants to understand the place of mathematics in modern civilization but who has been intimidated by its supposed difficulty. Mathematics is the language of size, shape, and order—a language Hogben shows one can both master and enjoy.

Magical Doctor of Life Tie BeiLe, 2020-06-04 Li Yifan, with the Nine Yin Meridians on his body, was able to reach the world with just his hands alone. He had stolen the hearts of countless young girls, and facing the women around him, Li Yifan chuckled and waved his hand, Come ... Let this Divine Doctor treat your illnesses.

Chillin' in Another World with Level 2 Super Cheat Powers: Volume 12 (Light Novel) Miya Kinojo, 2023-12-15 The ancient war between humans and demons is over thanks to Flio, the unassuming and omnipotent shopkeeper from another world, but peace hasn't been an easy change for everyone. The end of hostilities between the Magical Kingdom of Klyrode and the Dark Army has left countless demons and magic beasts adrift, roaming the wilderness or selling their combat skills to unscrupulous villains. At least the Fli-o'-Rys General Store is always hiring! And with Flio's newest invention, a gem that nullifies the toxic malicium lesser demons emit, true coexistence between humans and demons may yet be possible... Meanwhile, is Flio's son Garyl ready for higher education? Does the Maiden Queen have a rival in love? And did Hero Gold-Hair remember to pick up his companion Wuha Gappoli after forgetting her in an inn during his adventure in the last book?

The Varieties of Magical Experience Lynne L. Hume Ph.D., Nevill Drury, 2013-01-24 A rare combination of personal and academic, this book showcases the myriad avenues for transcending the boundaries of reality through direct sensory experience. The Varieties of Magical Experience: Indigenous, Medieval, and Modern Magic provides a comprehensive volume that examines magic in all its aspects. Through detailed case studies, verbatim accounts of personal experiences, and first-hand experience from the authors' own active participation in many alternative religious rituals and ceremonies, this unique book reveals how magic can be a universal phenomenon that crosses cultural, historical, and spatial boundaries. The work is organized in five sections that embrace several broad themes: indigenous magical and shamanic practices; medieval witchcraft; sorcery and hermetic magic; and contemporary Western magical practices, including the role of sexuality, trance, and meditation. The introductory section explores the idea of magic, other realities, and the employment of all the senses, while the final section discusses contemporary issues of ecology and cybermagic. The authors give voice to the powerful emotions and feelings that result from a magical encounter, providing engaging and accessible information to general readers, while those well versed in the opaque world of magic and occultism, consciousness studies, and imaginal and disembodied realms will appreciate the book's content at a deeper level.

Mathematical Circus Martin Gardner, 2020-10-06 Martin Gardner's Mathematical Games columns in Scientific American inspired and entertained several generations of mathematicians and scientists. Gardner in his crystal-clear prose illuminated corners of mathematics, especially recreational mathematics, that most people had no idea existed. His playful spirit and inquisitive nature invite the reader into an exploration of beautiful mathematical ideas along with him. These columns were both a revelation and a gift when he wrote them; no one--before Gardner--had written about mathematics like this. They continue to be a marvel. This volume, first published in 1979, contains columns published in the magazine from 1968-1971. This 1992 MAA edition contains a foreword by Donald Knuth and a postscript and extended bibliography added by Gardner for this edition.

Magic and Divination in the Middle Ages Charles Burnett, 1996 After discussing the terminology of talismanic magic (or necromancy) and its position in divisions of science in the Middle Ages, this book traces the history of talismanic texts from the Classical period through the Arabic world to the Latin Middle Ages. The principal authorities are Hermes and Aristotle, and the search for the 'secret knowledge' of these ancient sages is shown to have been a catalyst for the translating activity from Arabic into Latin in 12th-century Spain. The second half of the volume is devoted to examples of the kinds of divination prevalent in Arabic and Latin-reading societies: chiromancy, onomancy, scapulimancy, geomancy and fortune-telling. The book ends with advice on when to practice alchemy and a prophetic letter of supposed Arabic provenance, warning of the coming of the Mongols. Several editions of previously unedited texts are included, with translations.

The Legacy of Muslim Spain Salma Khadra Jayyusi, Manuela Marín, 1992 The civilisation of medieval Muslim Spain is perhaps the most brilliant and prosperous of its age and has been essential to the direction which civilisation in medieval Europe took. This volume is the first ever in any language to deal in a really comprehensive manner with all major aspects of Islamic civilisation in medieval Spain.

Morgan and the Monster of the Deep: A Magic Math Adventure Addie Abacus, 2019-11-14 Nine-year-old Morgan is helping guard a magical secret—an ancient medallion of great power. During a voyage on the high seas with her friend Rusty, the two encounter a monstrous sea creature and menacing sailors. Will they be able to save each other from the dangers facing them? And who is the traitor in their midst? Set in the early summer of 1899 off the coast of Nantucket, Morgan and the Monster of the Deep continues with the winning format of weaving mathematical theory and practice into a captivating adventure story. Book Two of the series explores the relationship between multiplication and division and presents the mathematical concept of Symmetry. The Morgan tales are designed as early Middle-Grade books. The sentence structure is simple and straightforward so that the book is accessible to younger readers, while the storyline is complex and intriguing enough to engage older readers. The Magic Math Adventure series is loosely based upon the collection of tales, The Thousand and One Nights or The Arabian Nights. These stories were created during the Golden Age of Islam in Persia and the Indian subcontinent.
