Behold Our Magical Garden Allan Wolf, 2022-03-08

Witty and inspiring, Allan Wolf's upbeat poems are poised to cultivate a new crop of gardeners, aided by Daniel Duncan's bountiful illustrations. In our garden, can you see? A grand adventure? And it's free! A green delicious fantasy? Behold our magical garden. There's a lot more to gardens than meets the eye! In this collection of buoyant poems filled with fun facts, young nature enthusiasts and budding gardeners are called on to help solve a mystery by the compost bin, join a Wild West-style standoff between some good bugs and a few bad ones, interview the sun to find out what happens when it drinks a glass of water, and learn the fancy names of plants to spice up dinner conversation. They'll be spurred to grab their own gardening tools, drop in some seeds, encounter a few insects, gather fresh vegetables, and find a whole lot of magic. Allan Wolf's playful poems and Daniel Duncan's whimsically detailed, welcoming illustrations combine in a charming celebration of the many wonders and lessons to be learned from a school garden. For further inspiration, engaging notes on the poems and an author's note on jotting down observations can be found in the back matter.

The Divine Origin of the Craft of the Herbalist E.A.
Wallis Budge,2012-11-12 First Published in 2005. Natural
medicine has never been more popular, nor has the

timeless craft of herbalism. This remarkable book traces the history of herbs far back into antiquity, and shows that the gods themselves were believed to be the original healers, not only by revealing the knowledge of their healing properties of mankind but by creating the sustaining herbs out of their own bodies. Written by the doyen of orientalist with an unrivalled knowledge of Sumerian, Babylonian, Assyrian and Egyptian herbal literature and traditions, this key volume deals with the old gods as herbalists and their divine medicine: water as a divine element; ancient Egyptian, Sumerian and Assyrian herbals; divine plants; the Greek and Latin herbals, herbals in Syrian and Arabic; Coptic lists of plants and the Ethiopian or Abyssinian herbal, illustrated with examples of the original text. Proving conclusively both the antiquity and worth of herbal medicine, this work is indispensable for modern practitioners who want to know about of the true roots of their work, as well as for all those interested in the history of medicine.

Black Magic Yvonne P. Chireau, 2006-11-20 Chireau has written a marvelous text on an important dimension of African American religious culture. Expanding beyond the usual focus of scholarship on Christianity, she describes and analyzes the world of magical-medical-religious practice, challenging hallowed distinctions among religion and magic. Anyone interested in African American religion will need to reckon seriously with Chireau's text on

conjure.—Albert J. Raboteau, Princeton University
Deprived of their own traditions and defined as chattel, enslaved Africans formed a new orientation in America. Conjuring—operating alongside of and within both the remnants of African culture and the acquired traditions of North America—served as a theoretical and practical mode of deciphering and divining within this, enabling them to create an alternate meaning of life in the New World. Chireau's is the first full-scale treatment of this important dimension of African American culture and religion. A wonderful book!—Charles H. Long, Professor of History of Religions University of California, Santa Barbara and author of *Significations: Signs, Symbols and Images in the Interpretation of Religion*

Occult Botany Paul Sédir, 2021-06-01 • Includes a dictionary of nearly 300 magical plants with descriptions of each plant's scientific name, common names, elemental qualities, ruling planets, and zodiacal signatures, with commentary on medico-magical properties and uses • Explores methods of phytotherapy and plant magic, including the Paracelsian "transplantation of diseases," ritual pacts with trees, the secret ingredients of witches' ointments, and the composition of magical philters • Explains the occult secrets of phytogenesis, plant physiology, and plant physiognomy (classification of plants according to the doctrine of signatures) Merging the scientific discipline of botany with ancient, medieval, and Renaissance traditions of occult herbalism, this seminal guide was first published in French in 1902 as a textbook for students of Papus's École hermétique and sparked a revival in the study of magical herbalism in early twentieth-century France. Author Paul Sédir, pseudonym of Yvon Le Loup (1871-1926), explains the occult secrets of

phytogenesis (the esoteric origin and evolutionary development of the plant kingdom), plant physiology (the occult anatomy of plants), and plant physiognomy (classification of plants according to the doctrine of signatures). Unveiling the mysteries behind planetary and zodiacal attributions, he provides readers with the keys to make their own informed determinations of the astral properties of plants. Moving from theory into practice, Sédir explores various methods of phytotherapy and plant magic, including the Paracelsian “transplantation of diseases,” the secret ingredients of witches’ ointments, and the composition of magical philters. In the third section of the book, Sédir offers a dictionary of magical plants that covers nearly 300 plant species with descriptions of their astral signatures, occult properties, and medico-magical uses. Compiled from an array of rare sources and esoterica, this classic text includes a wealth of additional materials and supplemental charts and diagrams drawn from Sédir’s occult colleagues, all of whom adopted and expanded upon Sédir’s pioneering system of plant correspondences.
