Marketing High Profit Product/Service Solutions Roger More,2016-05-06 Marketing High Profit Product/Service Solutions addresses one of the most exciting and growing strategic marketing opportunities facing product and service companies - 'bundling'. Many customers want bundled products and services which represent integrated solutions to their problems, rather than buying individual products and services piecemeal, and if you become that supplier it can transform a company. There are many outstanding examples: Magna International grew in several stages from a supplier of basic individual auto parts to a company manufacturing a product/service 'super-bundle'; ultimately sourcing and assembling the entire car itself. GE developed their business involving the supply of medical imaging machines to hospitals to become a 'super-bundler' of complete hospital radiological floor imaging operations planning, installation, and integration. IBM transformed their position as a supplier of individual hardware, software, and peripherals to companies into a product/service solution 'bundler' of increasing complexity, and finally into the 'super-bundle' of BPO (Business Process Outsourcing); representing an outsourced and complete integrated IT solution set for clients' entire global operations. Roger More explores what was learned by these leading companies (amongst others) when they transformed their market strategies to become bundlers of complex integrated customer solutions. Over many years the author has developed and tested new concepts, maps and tools for use by a wide variety of managers in developing strategies for these bundled product/service solutions. His book now offers these maps and tools to all who invest in a copy.

Strasburg,2005-01-01 This book shows today's job candidates a new, more targeted way to write resumes to get them back on the same playing field with the best employers and improve their odds of winning the job they want. The system an employer uses when filling jobs has changed significantly in the past few years, and it is still evolving. Rather than simply looking at an applicant's past jobs, companies are instead looking at candidate's experiences in certain key areas including measurable work habits and the personal skills, known as competencies, used to achieve objectives at work. Competency-Based Resumes offers you a new and effective way to create resumes that emphasize the knowledge, skills, and abilities that you have and employers need.

Decentralized Capacity Building Development Academy of the Philippines,2005-01-01 A new definition of capacity-building is evolving--one that is veering away from conventional ideas of organizational engineering . As it encompasses the broad environment or system in which social changes occur, capacitybuilding has become more complex, yet also more rewarding . Today, some of the buzzwords are empowerment, social capital, enabling environment. Moreover, culture, values and power relations that influence and motivate organizations and individuals are gaining more attention. There is respect and even appreciation now for informal patterns of personal and culture-bound organizational behavior- the unwritten rules of the game, so to speak. As well, there is the urge to complement, not replace, indigenous habits and practices. All of these are progressively coalescing into a body of concepts called capacity development.
