**Agricultural Implications of the Fukushima Nuclear Accident (III)** Tomoko M. Nakanishi, Martin O'Brien, Keitaro Tanoi, 2019-01-30 This open access book presents the findings from on-site research into radioactive cesium contamination in various agricultural systems affected by the Fukushima Daiichi Nuclear Power Plant accident in March 2011. This third volume in the series reports on studies undertaken at contaminated sites such as farmland, forests, and marine and freshwater environments, with a particular focus on livestock, wild plants and mushrooms, crops, and marine products in those environments. It also provides additional data collected in the subsequent years to show how the radioactivity levels in agricultural products and their growing environments have changed with time and the route by which radioactive materials entered agricultural products as well as their movement between different components (e.g., soil, water, and trees) within an environmental system (e.g., forests). The book covers various topics, including radioactivity testing of food products; decontamination trials for rice and livestock production; the state of contamination in, trees, mushrooms, and timber; the dynamics of radioactivity distribution in paddy fields and upland forests; damage incurred by the forestry and fishery industries; and the change in consumers' attitudes. Chapter 19 introduces a real-time radioisotope imaging system, a pioneering technique to visualize the movement of cesium in soil and in plants. This is the only book to provide systematic data on the actual change of radioactivity, and as such is of great value to all researchers who wish to understand the effect of radioactive fallout on agriculture. In addition, it helps the general public to better understand the issues of radio-contamination in the environment. The project is ongoing; the research groups from the Graduate School of Agricultural and Life Sciences of The University of Tokyo continue their work in the field to further evaluate the long-term effects of the Fukushima accident.

**The Art of Ploog**, 2015-12-15 A comprehensive art book on the work of Mike Ploog. This oversize 9 x 12, 320-page retrospective covers every aspect of Ploog's career, from his earliest days of working with Leatherneck Magazine, while still a young man serving in the Marines, to his extremely popular work in comics and film, right up through his latest work on Goliath. THE ART OF PLOOG reproduces, quite literally, hundreds of pieces of art, as well as commentary by the likes of Ralph Bakshi, John Carpenter, Frank Oz, Roy Thomas, and the master himself; Mike Ploog. You will find Ploog's best known artwork contained in this book. Included is work he did for Marvel comics (on titles such as Frankenstein, Ghost Rider, Man-Thing, Planet of the Apes, and Werewolf By Night), as well as a wide range of his film work on animated features (such as Lord of the Rings, Shrek, and Wizards) and live-action features (including Little Shop of Horrors, John Carpenter's THE THING, and X-MEN). The book also contains many of his most popular paintings; paintings that were created for his own fantasy art trading card series; as well as paintings he worked on for the collectible card games Guardians and Magic the Gathering, most of which have never been reproduced larger than trading card size. This is the ultimate collection spanning Ploog's entire career.

**London 2012 Olympic and Paralympic Games** Tom Knight, Sybil Ruscoe, 2012-10-22 A limited, leather bound, individually numbered edition of the magnificent official celebration of the London 2012 Olympic and Paralympic

Games. A glorious keepsake of the London 2012 Olympic Games and Paralympic Games, full of unforgettable images, powerful quotes and fascinating statistics. It traces the whole incredible story, from early preparation through the creation of the Olympic Park, the Torch Relay and the innovative Cultural Olympiad. It explores both Games in detail, revealing how record-breaking athletes, spectators, volunteers and locals have all made London 2012 their own. Beautifully designed and featuring the Games' most evocative photography and a foreword by Sebastian Coe KBE, London 2012 Olympic and Paralympic Games: The Commemorative Book captures the magical atmosphere of a once in a lifetime event. Only 2012 have been produced and will only be available for sale until the end of the year.

*Hiroshige Prints* Ando Hiroshige, 1988 Exquisite depictions of romantically idealized landscapes from woodcut master's superb Fifty-three Stages on the Tokaido. Fuji in the Morning from Hara.

The Culture of Capital Punishment in Japan David T. Johnson, 2019-11-18 This open access book provides a comparative perspective on capital punishment in Japan and the United States. Alongside the US, Japan is one of only a few developed democracies in the world which retains capital punishment and continues to carry out executions on a regular basis. There are some similarities between the two systems of capital punishment but there are also many striking differences. These include differences in capital jurisprudence, execution method, the nature and extent of secrecy surrounding death penalty deliberations and executions, institutional capacities to prevent and discover wrongful convictions, orientations to lay participation and to victim participation, and orientations to "democracy" and governance. Johnson also explores several fundamental issues about the ultimate criminal penalty, such as the proper role of citizen preferences in governing a system of punishment and the relevance of the feelings of victims and survivors.

*Japanese Rinzai Zen Buddhism* Jørn Borup, 2008-02-28 Japanese Rinzai Zen Buddhism gives a new perspective on contemporary Japanese Zen Buddhism. Ideas, ritual practices, temples and interactions between the clergy, the laity and the institution are investigated as living representations of a unique and yet common Japanese religion.

One Hundred Aspects of the Moon Tamara Tjardes, Yoshitoshi Taiso, 2003 A wealth of information about herbal remedies native to the Southwest, infused with wisdom, wit, and personal reminiscences.

Mary Cassatt Nancy Mowll Mathews, 1998-01-01 One of the few women Impressionists, Mary Cassatt (1844-1926) had a life of paradoxes: American born, she lived and worked in France; a classically trained artist, she preferred the company of radicals; never married, she painted exquisite and beloved portraits of mothers and children. This book provides new insight into the personal life and artistic endeavors of this extraordinary woman. Brilliant, lively life of long lived American Impressionist.--Kirkus Reviews Rich in historical and archeological detail, thoroughgoing in its resurrection of the contexts and conditions of Cassatt's life as an artist.--Carol Armstrong, New York Times Book Review Mathews informatively and entertainingly documents Cassatt's tumultuous relations with

various members of both the American and Parisian avant-garde. . . . An impressive biography.--Siri Huntoon, New York Newsday A superb piece of scholarship.--Ruth Johnstone Wales, Christian Science Monitor In this admirable biography, art historian Mathews . . . presents a compelling portrait of this contradictory woman.--Publishers Weekly Authoritative, unsentimental, clear as a bell, this is a model of the new biography by and about talented women.--Kennedy Fraser This will probably be the definitive biography for our generation.--John Wilmerding, Princeton University

The Kimono of the Geisha-diva Ichimaru Barry Till, Michiko Warkentyne, Judith Patt, 2006 This collection features approximately 20 color photos of kimonos owned by the Art Gallery of Greater Victoria and worn by Ichimaru (1906-1997), a geisha, musician, and well-known singer in Japan. Preliminary details about the geisha world and life of Ichimaru are presented, followed by information on kimono design, manufacture, and types, and the

**The Tale of Tea** George L. van Driem, 2020-12-11 The Tale of Tea is the saga of globalisation. Tea gave birth to paper money, the Opium Wars and Hong Kong, triggered the Anglo-Dutch wars and the American war of independence, shaped the economies and military history of Táng and Sòng China and moulded Chinese art and culture. Whilst black tea dominates the global market today, such tea is a recent invention. No tea plantations existed in the world's largest black tea producing countries, India, Kenya and Sri Lanka, when the Dutch and the English went to war about tea in the 17th century. This book replaces popular myths about tea with recondite knowledge on the hidden origins and detailed history of today's globalised beverage in its many modern guises.

**West African Chimpanzees** Rebecca Kormos, 2003 Wild chimpanzees are only found in tropical Africa, where their populations have declined by more than 66% in the last 30 years. This Action Plan focuses on one of the four chimpanzee subspecies, the western chimpanzee, which is one of the two subspecies most threatened with extinction. This publication presents a plan for action that represents a consensus among all parties concerned with the conservation of chimpanzees.

**One Hundred Million Philosophers** Adam Bronson, 2016-03-31 After the devastation of World War II, journalists, scholars, and citizens came together to foster a new culture of democracy in Japan. Adam Bronson explores this effort in a path-breaking study of the Institute for the Science of Thought, one of the most influential associations to emerge in the early postwar years. The institute's founders believed that the estrangement of intellectuals from the general public had contributed to the rise of fascism. To address this, they sought to develop a science of thought that would reconnect the world of ideas with everyday experience and thus reimagine Japan as a democratic nation, home to one hundred million philosophers. To tell the story of Science of Thought and postwar democracy, Bronson weaves together several strands of Japan's modern history that are often treated separately: the revival of interest in the social sciences and Marxism after the war, the appearance of new social movements that challenged traditional class and gender hierarchies, and the ascendance of a mass middle-class culture. This story is transnational in both connective and comparative senses. Most of the Science of Thought founders were educated in America, and they drew upon a network of American thinkers and institutions for support.

They also derived inspiration from other efforts to promote a culture of democracy, ranging from thought reform campaigns in the People's Republic of China to the Mass Observation study of the British working classes. By tracing these sources of inspiration around the world, Bronson reveals the contours of a transnational intellectual milieu. Science of Thought embodied a vision of democratic experimentation that had to be re-articulated repeatedly in response to challenges that arose in connection with geopolitical events and social change, prompting the group's evolution from a small research circle in the 1940s into the standard-bearer for citizen activism in the 1960s. Through this history, Bronson argues that the significance of Science of Thought lay in the way it exemplified democracy in practice. The practical experience of the intellectuals and citizens associated with the group remains relevant to those who continue to grapple with the dilemmas of democracy today.

Kawase Hasui Kendall H. Brown, 2003 Considered one of the most important Japanese landscape artists of the 20th century, his prints are the modern continuations of the unforgettable works by Hiroshige and Hokusai the 19th century masters of this genre. This convenient and attractive catalogue is an indispensable tool for collectors, scholars and dealers.

**Satoyama--satoumi Ecosystems and Human Well-being** Anantha K. Duraiappah, 2012 Satoyama is a Japanese term describing mosaic landscapes of different ecosystems--secondary forests, farm lands, irrigation ponds and grasslands--along with human settlements managed to produce bundles of ecosystem services for human wellbeing. The concept of satoyama, longstanding traditions associated with land management practices that allow sustainable use of natural resources, has been extended to cover marine and coastal ecosystems ( satoumi). These landscapes and seascapes have been rapidly changing, and the ecosystem services they provide are under threat from various social, economic, political, and technological factors. Satoyama-Satoumi Ecosystems and Human Well-Being presents the findings of the Japan Satoyama Satoumi Assessment (JSSA), a study of the interaction between humans and ecosystems in Japan. It was written by the 200-plus authors, stakeholders, and reviewers from Japan and elsewhere who make up the JSSA team. The study analyzes changes that have occurred in satoyama-satoumi ecosystems over the last 50 years and identifies plausible future scenarios for the year 2050, taking into account various drivers such as governmental and economic policy, climate change, technology, and sociobehavioral responses. This provides a new approach to land-use planning that addresses not only economic development but also cultural values and ecological integrity. This book is a key reference text for development planners, policymakers, scientists, postgraduate students, and others interested in the environment and development.

**Essential Manual of 24 Hour Blood Pressure Management** Kazuomi Kario, 2015-05-06 It is well known that cardiovascular events occur more frequently in the morning as blood pressure (BP) levels have been shown to increase during the period from night to early morning. In recent years, clinical research using ambulatory blood pressure monitoring (ABPM) or home BP monitoring has clarified that morning BP and BP surge are more closely related to the cardiovascular risk than clinical BP. This practical manual from field leading expert, Dr. Kazuomi Kario, reviews recent evidence on morning and nocturnal hypertension and the IT technologies physicians can use to

support patients in home monitoring BP. Guidance on management via antihypertensive drugs is also discussed and with the aim of promoting perfect 24 hour BP control.

**A Year in Japan** Kate T. Williamson, 2006 New York City-based writer and illustrator Williamson shares discoveries about Japan and its culture based on a recent year spent in Kyoto as a postgraduate student. The text combines the author's colorful illustrations with brief descriptions presented in a script-style text. The end result is a charming, journal-like publication in which Williams

**From Postwar to Postmodern** Doryun Chong, Michio Hayashi, Kenji Kajiya, Fumihiko Sumitomo, 2012 Brings together critical historical documents, many of which are translated into English for the first time, in Japanese arts from the end of World War II through the next four and a half decades.--Page 14.

**Lake Biwa: Interactions between Nature and People** Hiroya Kawanabe, Machiko Nishino, Masayoshi Maehata, 2012-05-24 This book focuses on the long-term interactions between people and nature in and around Lake Biwa, one of the oldest lakes in the world. Accordingly, it not only covers the characteristics of the biota of this ancient lake, but also approaches it as a 'cultural ancient lake.' Furthermore, various problems affecting the lake, especially recent environmental changes that occurred before and after Japan's rapid economic growth of the 1950s and 60s, are reviewed, including water pollution, lakeshore development and the reclamation of attached lakes, alien and invasive species, and problems related to the recent warming of the climate. Lastly, by analyzing data on these problems collected by the local government and residents of the lake basin, the book provides a comprehensive outlook on the future of Lake Biwa and people's lifestyles. As such, it provides indispensable information for all people engaged in improving and conserving water regimes around the world, as well as people interested in the culture and history of Japan.
