The Biggest Bluff Maria Konnikova, 2021-06-08 A New York Times bestseller • A New York Times Notable Book “The tale of how Konnikova followed a story about poker players and wound up becoming a story herself will have you riveted, first as you learn about her big winnings, and then as she conveys the lessons she learned both about human nature and herself.” —The Washington Post It's true that Maria Konnikova had never actually played poker before and didn't even know the rules when she approached Erik Seidel, Poker Hall of Fame inductee and winner of tens of millions of dollars in earnings, and convinced him to be her mentor. But she knew her man: a famously thoughtful and broad-minded player, he was intrigued by her pitch that she wasn't interested in making money so much as learning about life. She had faced a stretch of personal bad luck, and her reflections on the role of chance had led her to a giant of game theory, who pointed her to poker as the ultimate master class in learning to distinguish between what can be controlled and what can't. And she certainly brought something to the table, including a Ph.D. in psychology and an acclaimed and growing body of work on human behavior and how to hack it. So Seidel was in, and soon she was down the rabbit hole with him, into the wild, fiercely competitive, overwhelmingly masculine world of high-stakes Texas Hold'em, their initial end point the following year's World Series of Poker. But then something extraordinary happened. Under Seidel's guidance, Konnikova did have many epiphanies about life that derived from her new pursuit, including how to better read, not just her opponents but far more importantly herself; how to identify what tilted her into an emotional state that got in the way of good decisions; and how to get to a place where she could accept luck for what it was, and what it wasn't. But she also began to win. And win. In a little over a year, she began making earnest money from tournaments, ultimately totaling hundreds of thousands of dollars. She won a major title, got a sponsor, and got used to being on television, and to headlines like How one writer's book deal turned her into a professional poker player. She even learned to like Las Vegas. But in the end, Maria Konnikova is a writer and student of human behavior, and ultimately the point was to render her incredible journey into a container for its invaluable lessons. The biggest bluff of all, she learned, is that skill is enough. Bad cards will come our way, but keeping our focus on how we play them and not on the outcome will keep us moving through many a dark patch, until the luck once again breaks our way.

Making Your Own Luck Fred Glass, 2021-11-02 One man's odyssey from skid row to rebuilding a major collegiate sports program. In *Making Your Own Luck*, former Indiana University athletic director Fred Glass recounts how even a self-described knucklehead learned to be prepared to recognize and seize opportunities and thus make his own luck through life. Growing up in a skid row bar, having an alcoholic father, struggling with anxiety and self-doubt, and making his share of stupid mistakes, Glass had much to contend with in early life. However, supported by socially enlightened parents, a Jesuit education, and his soulmate, Barbara, his odyssey has led him to serve a mayor, a governor, a senator, and even a president. With great humor and insightful reflection, Glass details how he helped keep the Colts in Indianapolis—he spearheaded a massive convention center expansion and the building of Lucas Oil Stadium and even helped to attract the Super Bowl to his hometown. Any of these accomplishments individually would be more than enough to call Glass's career a resounding success, but they were only the beginning. In the latest stage of his journey, Glass led the rebuilding of the athletic program of his beloved alma mater, Indiana University. Featuring a foreword from IU

alumnus and owner of the Dallas Mavericks, Mark Cuban, *Making Your Own Luck* is a must-read not only for Indiana sports fans, but for anyone that recognizes the importance of preparation, opportunity and action in creating your own success.

Myth of Catastrophy Vance Jasen Garrison, 2018-06-22 Read with understanding how it used to be, and how it's supposed to be regarding the inconvenience known as cerebral palsy. In an ever-changing world, I have watched as society has slowly but surely changed their way of thinking toward the cerebral-palsied and for that matter all types of handicaps, embracing positive instead of negative connotations. The purpose of this book is to present an opinion as to why there is such a large amount of stigma associated with the condition known as cerebral palsy. This stigma affects all facets of one's life such as social, emotional, mental, as well as physical handicaps. Chapters 1 through 14 parade different facets we all encounter in this journey and how cerebral palsy alters these different aspects of life. I encounter these aspects not as an observer but through the eyes of one that has cerebral palsy.

The Devil's Own Luck Denis Edwards, 2001-08-01 "A superb and well written book, highly recommended as a true account of one man's war from Pegasus Bridge to the Baltic during WWII." —The Armourer Although strictly forbidden to keep diaries, Denis Edwards managed to record his experiences throughout nearly all his time in Europe in 1944-45. He brilliantly conveys what it was like to be facing death, day after day, night after night, with never a bed to sleep in nor a hot meal to go home to. This is warfare in the raw—brutal, yet humorous, immensely tragic, but sadly, all true. "[An] excellent book . . . chronicles his journey with the 2nd Oxford & Bucks Light Infantry during pre-invasion training, then on to Normandy, the Ardennes, the Rhine Crossing and the advance to the Baltic Sea in 1945." —The Pegasus Archive "From my perspective, if you have any interest in the 2nd Bn. Oxfordshire & Buckinghamshire Light Infantry, and their participation in the action at Pegasus Bridge, the battle for Normandy and the Rhine Crossings, you can do no better than to refer to *The Devil's Own Luck*." —Recollections of WWII "Edwards' thorough descriptions of his daily activities in Normandy bring his narrative to life, from eating rations to digging trenches to the strain of being under continuous bombardment . . . *The Devil's Own Luck* is fast-paced, well-written, and holds the reader's attention." —Colour Sergeant Tombstone's History Pages

Thinking, Fast and Slow Daniel Kahneman, 2011-10-25 Major New York Times bestseller Winner of the National Academy of Sciences Best Book Award in 2012 Selected by the New York Times Book Review as one of the ten best books of 2011 A Globe and Mail Best Books of the Year 2011 Title One of The Economist's 2011 Books of the Year One of The Wall Street Journal's Best Nonfiction Books of the Year 2011 2013 Presidential Medal of Freedom Recipient Kahneman's work with Amos Tversky is the subject of Michael Lewis's *The Undoing Project: A Friendship That Changed Our Minds* In his mega bestseller, *Thinking, Fast and Slow*, Daniel Kahneman, the renowned psychologist and winner of the Nobel Prize in Economics, takes us on a groundbreaking tour of the mind and explains the two systems that drive the way we think. System 1 is fast, intuitive, and emotional; System 2 is slower, more deliberative, and more logical. The impact of overconfidence on corporate strategies, the difficulties of predicting what will make us happy in the future, the profound effect of cognitive biases on everything from playing the stock market to planning our next vacation—each of these can be understood only by knowing how the two systems shape our judgments and decisions. Engaging the reader in a lively conversation about how we think, Kahneman reveals where we can and cannot trust our intuitions and how we can tap into the benefits of slow thinking. He offers practical and enlightening insights into how choices are made in both our business and our personal lives—and how we can use different techniques to guard against the mental glitches that often get us into trouble. Winner of the National Academy of Sciences Best Book Award and the Los Angeles Times Book Prize and selected by The New York Times Book Review as one of the ten best books of 2011, *Thinking, Fast and Slow* is destined to be a classic.

Life Richard Fortey, 2011-03-23 By one of Britain's most gifted scientists: a magnificently daring and compulsively readable account of life on Earth (from the big bang to the advent of man), based entirely on the most original of all sources--the evidence of fossils. With excitement and driving intelligence, Richard Fortey guides us from the barren globe spinning in space, through the very earliest signs of life in the sulphurous hot springs and volcanic vents of the young planet, the appearance of cells, the slow creation of an atmosphere and the evolution of myriad forms of plants and animals that could then be sustained, including the magnificent era of the dinosaurs, and on to the last moment before the debut of *Homo sapiens*. Ranging across multiple scientific disciplines, explicating in wonderfully clear and refreshing prose their findings and arguments--about the origins of life, the causes of species extinctions and the first appearance of man--Fortey weaves this history out of the most delicate tracteries left in rock, stone and earth. He also explains how, on each aspect of nature and life, scientists have reached the understanding we have today, who made the key discoveries, who their opponents were and why certain ideas won. Brimful of wit, fascinating personal experience and high scholarship, this book may well be our best introduction yet to the complex history of life on Earth.
